

The Johns Hopkins Center For STD Research, Prevention And Training

In the Department of Population, Family, and Reproductive Health

T-32 STD FELLOWSHIP APPLICATION REQUIREMENTS

The Johns Hopkins Training Program in Sexually Transmitted Infections (T32-AI050056) is a multidisciplinary grant to fund the training of pre-doctoral students interested in sexually transmitted disease research. Applicants for this training grant should:

1. demonstrate interest in sexually transmitted infections. Although many of our applicants have interests in HIV, a sole HIV focus is not sufficient as there are other mechanisms for this type of activity. Individuals should have demonstrated interest in sexually transmitted diseases either through work experience, publication, or research activity.
2. be doctoral students starting the second year of their doctoral program. This is to ensure that they have already completed their initial course work, and that the STI Training Grant will be able to participate in the research experience.
3. be in East Baltimore during the two-year funding period. There are a number of onsite activities which are integral to the STD training experience, including a monthly journal club, a seminar series, and interaction with the faculty. Students doing international projects may apply for funding after they have completed the international component of their work.

This funding opportunity is open only to students who are citizens or permanent residents of the United States.

Please submit the following information electronically:

- Curriculum Vitae
- Description of the proposed project
- Johns Hopkins Transcript (unofficial)
- GRE scores
- Two letters of recommendation (at least one must be from your STD Center faculty sponsor)

Applications should be addressed to Dr. Jonathan Zenilman, Program Director (jzenilma@jhmi.edu).
