

Johns Hopkins Cardiovascular Epidemiology Training Program - Other Faculty with Specific Cardiovascular Disease Research Interests at The Johns Hopkins Medical Institutions Collaborating with Program Faculty Advisors

NAME, DEGREE(S)	PRIMARY APPOINTMENT (JOINT APPOINTMENT)	CARDIOVASCULAR DISEASE INTERESTS
Jerilyn Allen, ScD	Professor, Nursing	Cardiovascular risk reduction through risk factor management, case management, and community based participatory research
Karen Bandeen-Roche, PhD	Associate Professor, Biostatistics	Statistical methods; latent class analysis
Diane Becker, RN, ScD, MPH	Professor, Medicine and Nursing (Health Policy and Management)	Community outreach and community interventions
Lewis Becker, MD	Professor, Medicine (Radiology)	Myocardial blood flow and nuclear cardiology
Roger Blumenthal, MD	Associate Professor, CVD Medicine	Estrogens and cardiovascular disease; prevention of cardiovascular disease; subclinical atherosclerosis
Benjamin Caballero, MD, PHD	Associate Professor, International Health	Public health nutrition
George W. Comstock, MD, DrPH	Emeritus Professor, Epidemiology	Serologic data banks for nested case-control studies of cardiovascular disease; antioxidants and chronic disease; community-based epidemiologic studies
Francesca Dominici, PhD	Associate Professor, Biostatistics	
Lisa Cooper-Patrick, MD, MPH	Associate Professor, Medicine	Psychosocial health in minority populations; health service utilization
Rosa M. Crum, MD, MHS	Associate Professor, Epidemiology (Psychiatry and Mental Hygiene)	Psychiatric epidemiology; depression and cardiovascular disease; depression and diabetes
Gary Gerstenblith, MD	Professor, Cardiovascular Medicine	Influence of age on cardiovascular function and disease; cardiovascular metabolism
Leon Gordis, MD, DrPH	Professor, Epidemiology and Pediatrics	Rheumatic heart disease; epidemiology and policy; teaching epidemiology
Martha Hill, RN, PhD	Professor, Nursing (Medicine)	Hypertension, community outreach and nursing research
Peter Kwiterovich, MD, PhD	Professor, Pediatrics and Medicine	Atherosclerosis and lipids/lipoproteins
David Levine, MD, ScD, MPH	Professor, Medicine (Health Policy and Management)	Compliance, community interventions and risk factor modifications
Joao Lima, MD	Associate Professor, Cardiovascular Medicine	Cardiac imaging
Edgar R. Miller, III, MD, PhD	Assistant Professor, Medicine	Oxidative stress, antioxidants and cardiovascular disease; clinical trials of lifestyle interventions
Wendy Post, MD	Assistant Professor, Cardiovascular Medicine	
Thomas Quinn, MD	Professor, Infectious Diseases, Pathology, and International Health	Infections and cardiovascular disease; Chlamydial infections; measurement of infection
Christopher Saudek, MD	Professor, Endocrinology	Diabetes care, prevention and complications
Steven Shulman, MD	Professor, Cardiovascular Medicine	
Kerry Stewart, EdD	Associate Professor, Cardiovascular Medicine	Physical activity

David Thiemann, MD	Assistant Professor, Cardiology (Epidemiology)	Quality of cardiac care and its policy implications; thrombolytic use in the elderly; medical informatics
Ben Tsui, PhD	Visiting Professor, Radiology	
Deborah Rohm Young, PhD	Assistant Professor, Medicine	Exercise and fitness and their measurement and cardiovascular risk; clinical trial of physical activity
Wasserman, Bruce, MD	Assistant Professor, Radiology	
Robert G. Weiss, MD	Professor, Cardiovascular Medicine (Radiology)	
Scott Zeger, PhD	Professor, Biostatistics	Statistical methods for the analysis of longitudinal data; methods in clinical research
