

# Volunteering at the Coalition

Volunteering Made Easy...

and rewarding, and engaging, and challenging, and educational, and fun...

We want a way to truly engage our volunteers, make volunteering with us a meaningful experience, develop your knowledge, give you leadership opportunities, and create a volunteer system that allows you to choose how you participate.

## Who should attend?

Anyone who is interested in volunteering some of their time to help eliminate lead poisoning in Maryland! Parents, teachers, retirees, students, you!

**Every month the Coalition offers our volunteer orientation class:**

**“Lead 101 and Volunteer Overview”**

**Upcoming Classes: April 13, May 9**

The classes are held in our offices at 2714 Hudson Street, Baltimore 21224

Classes begin at 6:00PM and end at 8:00PM

Pizza is provided

## Classes cover the following information:

- What is Lead Poisoning?
  - How do children get poisoned?
  - What are Lead Hazards?
  - How do you prevent exposure?
  - What resources are available to help parents?
- and**
- How to set-up a community table
  - Answering people’s questions (easy and difficult)
  - What are other volunteer opportunities with the Coalition?

Most volunteer opportunities involve staffing a table at community and health fairs.

This is a great way to directly reach at-risk populations and provide much needed information and education

Fairs are generally held in the evenings or on Saturdays with some weekday events available. More volunteer opportunities are available and are discussed during the orientation.

To register for class or learn more about the program, call Kory Lemmert at 410.534.6447  
or email: [klemmert@leadsafe.org](mailto:klemmert@leadsafe.org)
