

5th Annual NIH Conference on the Science of Dissemination and Implementation: Research at the Crossroads

REGISTRATION IS AVAILABLE

There is no fee to register for this conference.

Conference registration deadline: February 17, 2012

There is a recognized need to close the gap between research evidence and clinical and public health practice and policy. How is this best accomplished? Dissemination and implementation research in health seeks to answer this question, and is gaining momentum as a field of scientific inquiry. The goal of the annual NIH Conference on the Science of Dissemination and Implementation is to facilitate growth in the research base by providing a forum for communicating and networking about the science of dissemination and implementation.

Researchers, evaluators and implementers who are interested in identifying opportunities and strategies for overcoming obstacles for dissemination and implementation research/evaluation are encouraged to attend this meeting. The goal is to engage in dialog, exchange ideas, explore contemporary topics and challenge one another to identify and test research approaches that will advance dissemination and implementation science.

CALL FOR PROPOSALS

Deadline: 5 PM Pacific Time on November 10, 2011

To meet the goal of the conference—to stimulate interactions among researchers and experts in the field—the conference will include Plenary Sessions, Concurrent Oral Presentation and Panel Sessions, and Poster Sessions. Sessions will be structured to encourage interaction and networking between participants.

Applicants are encouraged to submit abstracts for Oral Presentations, Panels and Posters.

For proposal submission instructions and to register for the conference, please visit:
