Who Should Attend?

Professionals in infection control, occupational health, and workers' compensation settings, third party administrators, workers' compensation attorneys, safety officers, and other professionals responsible for infection /injury prevention programs.

Course Description

The purpose of this course is to provide participants with an overview of the current legal issues, trends, regulations, surveillance, prevention and control strategies utilized in the infectious disease management of patients and employees in health care settings.

Course Objectives

At the completion of this seminar the attendee will be able to:

- Identify methods for compliance with the JCAHO/OSHA regulations.
- Outline the components of and strategies for the integration of infection control and occupational health programs.
- Identify prevention strategies for management of environmental exposures and infectious diseases.
- Identify strategies to minimize legal risk and liability associated with written policies and procedures.
- Discuss epidemiology of TB and outline the components of a fit testing program.

Course Handouts

The course materials include OSHA/JCAHO/CDC standards, regulations, and other materials relevant to the course content.

Continuing Education Credit

This activity for 17.9 contact hours is provided by The Institute for Johns Hopkins Nursing, which is accredited as a provider of continuing education in nursing by the American Nurses Credentialing Center's Commission on Accreditation.
