

Elev8 Mentoring Opportunities 2010

Big Brothers Big Sisters has a variety of opportunities available in the East Baltimore community. All volunteers make a one year commitment, but many find that a long term relationship develops. We make quality matches so that the one to one mentoring relationships are mutually rewarding.

Community One-to-One is the traditional model and the foundation of all Big Brother Big Sister programs. This program offers some flexibility because Bigs and their Littles plan what, when, and where they get together. Volunteers make a 2-time per month commitment. It is a wonderful opportunity for adults and children alike to have fun together doing whatever activities they both enjoy...play basketball, make pizza, or just hang out. Behind the scenes, there is a Big Brother Big Sister match support specialist helping Littles and their families access additional services. That way, volunteers focus on being a friend and mentor!

“Bigs in School” volunteers spend one hour per week (lunch, mid day, after school) with a student in grades 5 – 8. Outside email and phone contact is encouraged, but all in person meetings occur at the school. Mentors provide support, guidance, and encouragement. The relationship promotes a positive school experience for the child: good attendance, appropriate peer and adult relationships, an optimistic attitude, and academic enrichment. The sessions include a variety of activities such as self-esteem building, social skill development, and academic enrichment. A Big Brothers Big Sisters program specialist manages the program and works along side volunteers at the school, providing guidance and support.
