# A Century of Public Health at Johns Hopkins

In 1916, with a grant from the Rockefeller Foundation, William Henry Welch founded the Johns Hopkins School of Hygiene and Public Health. It was the first independent, degree-granting institution for research and training in public health.

Since then, our work has expanded in scope and across the globe. Our microbiologists work to find a vaccine for malaria, while behavioral scientists research ways to discourage populations from smoking. Environmental health scientists work to discover which foods prevent cancer, while health policy analysts evaluate health insurance programs and make recommendations based on their findings. Epidemiologists identify trends in health and illness, looking for links, causes and interventions in areas such as HIV/AIDS, tuberculosis and infant mortality. And there is so much more.

Join us as we look to another century of “Protecting Health, Saving Lives—Millions at a Time.”

## 1795

# Candidates for the Master of Science

May 1, 2016

**Lanre Idris Adekola**, of Minneapolis, Minnesota; B.A., The Johns Hopkins University. Biochemistry and Molecular Biology. *Effects of Glutathione Depletion on Leydig Cell Aging and Steriodogenesis.*\*

**Claire Marie Anderson**, of Shreve, Ohio; B.A., Kenyon College. Health, Behavior and Society. *Are Genetic Counselors Screening for Adolescent Suicide Risk? A Mixed-methods Study.*

**Alisa Ann Bochnowski**, of Munster, Indiana; B.S., The George Washington University. Molecular Microbiology and Immunology. *The Effect of Donor Sex on Influenza A Infection in Primary Human Nasal Epithelial Cell Cultures.*

**Jacob Lee Carey**, of Danville, Virginia; B.S., Virginia Tech. Epidemiology. *Characterizing Risk of Transmission of Respiratory Viruses among School Children using Proxies of Infectious Contact and Genetic Data.*

**So Yung Choi**, of Busan, South Korea; B.A., University of Hawaii. Biostatistics. *Statistical Considerations for the Analysis of Ordinal Outcomes in Randomized Controlled Trails.*

**Kyle Walter Davis**, of Austin, Texas; B.A., Purdue University. Health, Behavior and Society. *What Counts? The Role of Numeracy in Interpretation of Personalized Genomic Risk Information in Corielle Participants.*

**Molly Deutsch-Feldman**, of Washington, District of Columbia; B.A., Wesleyan University. Epidemiology. *Evaluating a Reactive Test-and-treat Program for a Sub-patent Malaria in Macha, Zambia: Optimal Strategies to Achieve Elimination.*

**Renuka Elizabeth Joseph**, of Kochi, India; B.Tech., Vellore Institute of Technology University. Molecular Microbiology and Immunology. *Adeno-associated Virus Vecteded Immunophylaxis Against Plasmodium falciparum.*

**Jingru Fang**, of Shenzhen, People's Republic of China; B.E., Pharmaceutical University. Molecular Microbiology and Immunology. *Isolation and Characterization of Anti-dengue Virus Proteins from Chromobacterium Panama.*

**Himaja Gaddipati**, of Colorado Springs, Colorado; B.S., University of California, Los Angeles. Biochemistry and Molecular Biology. *Smc5 Depletion Impedes Cell Cycle Progression, Induces DNA Damage, and Causes Genomic Instability in Mouse Embryonic Fibroblasts.*\*

**Geetha Sankar Narayanan Iyer**, of Bangalore, India; M.B.,B.S. & M.D., B.J. Medical College. Epidemiology. *Characterizing Medication Adherence to an Oral Glucose Lowering Drug, Metformin Using Group Based Trajectory Models.*

**Miebaka Jamabo**, of Rivers State, Nigeria; B.Sc., Niger Delta University. *The Role of Polo-like Kinase 4 (PLK4) in Chromosome Segregation and Genome Maintenance in Mammalian Meiosis.*

**Aqsa Jamil**, of Reisterstown, Maryland; B.Sc., Towson University. Molecular Microbiology and Immunology. *Detection of Measles Virus RNA in Lymph Nodes Using Fluorescence Microscopy.*

**Lai Jiang**, of Chongqing, People's Republic of China; M.B., Peking University. Epidemiology. *The Association between Cruciferous Vegetables Intake and Breast Cancer Risk among Women with Familial Breast Cancer.*

**Hongseok Kim**, of Seoul, South Korea; B.S., Korea National Open University; B.K.M., Dongguk University. Epidemiology. *Longitudinal Patterns of HIV Medication Adherence at an Urban HIV Clinic.*

**Jennefer Noe Kohler**, of Los Gatos, California; B.S., University of Washington. Health, Behavior and Society. *Personal Utility in Genomics: A Mixed-methods Study to Identify Key Elements.*

**Shaheen Shiraz Kurani**, of Fayetteville, Georgia; B.Sc., Emory University. Molecular Microbiology and Immunology. *Prevalence of Glucose-6-phosphate Dehydrogenase Deficiency in Southern Province, Zambia.*

**Yury V. Kuzmichev**, of Moscow, Russia; B.S., Pittsburg State University. Molecular Microbiology and Immunology. *A Novel Anti-CD3/CD28 Bead-based PHA/Feeder-cell-free Human Immunodeficiency Virus-1 Outgrowth Assay.*

**Hanying Li**, of Wuhan, People's Republic of China; B.S., Nanjing University. Biostatistics. *Multi-feature Function-on-Scalar Regression for Modelling Stopwatch Activity Data.*

**Menglu Liang**, of Beijing, People's Republic of China; M.P.H., Peking University. Epidemiology. *Association of 1,5-anhydroglucitol, a Biomarker of Glucose Peaks, with Subclinical Cardiovascular Disease.*

**Eleni A. Liapi**, of Athens, Greece; M.D., University of Ioannina. Clinical Investigation. *Longitudinal Imaging and Clinical Assessment of Patients with Unresectable Hepatocellular Carcinoma Treated with Transcatherter Arterial Chemoembolization.*\*

- Sang-Mi Nam**, of Claremont, California; B.S., The Johns Hopkins University. Biochemistry and Molecular Biology. *The Effects of Calprotectin, A Metal Binding Protein, on the Growth of Borrelia burgdorferi*. \*
- Anne Elizabeth Nigra**, of Natrona Heights, Pennsylvania; B.A., Oberlin College. Epidemiology. *Poultry Consumption and Arsenic Exposure in the U.S. Population*.
- Gina Marie Norato**, of Robbinsville, New Jersey; B.S., Dickinson College. Biostatistics. *Modeling the Association between Smoking and Sleep Fragmentation Using Long-linear Models*.
- Amy Kathryn Poupore**, of Livonia, Michigan; B.S., Virginia Commonwealth University. Molecular Microbiology and Immunology. *Elucidating the Dynamics and Role of Macrophages in a Murine Model of Elastase-induced Emphysema*.
- Amrita Rao**, of Newton, Massachusetts; B.S., Cornell University. Epidemiology. *Risk Factors for Poor Adherence to Antiretroviral Therapy by Pregnancy Status in Two Urban Cohorts of Women Living with HIV in the United States and South Africa*.
- Arthur Anthony Alfonso Reyes**, of Lake Hiawatha, New Jersey; B.S., Rutgers University. Molecular Microbiology and Immunology. *The Subcellular Localization of the Uncharacterized Human Disease-associated Protein Potassium Channel Tetramerization Domain 13 (KCTD13)*.
- Jennifer Leigh Rivers**, of San Marcos, Texas; B.S., Texas State University. Molecular Microbiology and Immunology. *Unexpected Antibiotic Resistance in Gram-positive Bacteria Recovered from the Chesapeake Bay and Associated Rivers and Investigating the Antimicrobial Activity of a Wide Variety of Essential Oils as a Means to Identify Novel Drug Targets*.
- Ryan Eduardo Rodriguez**, of Fayetteville, North Carolina; M.S., Missouri University of Science and Technology; B.S., University of North Carolina. Molecular Microbiology and Immunology. *The Mechanism of Binding Between the Plasmodium falciparum H-protein and Lipoate Ligase 1*.

## Dual Degrees

### *M.P.H./J.D.*

The following dual degree candidates have successfully completed the course work for the Master of Public Health program. The M.P.H. diploma will be awarded during the year in which the J.D. degree is completed.

**Christopher Edward Keith Conn**, Boston, Massachusetts.

**Elisabeth Flannery Gallagher**, New York, New York.

### *M.P.H./M.S.W.*

The following dual degree candidates have successfully completed the course work for the Master of Public Health program. The M.P.H. diploma will be awarded during the year in which the M.S.W. degree is completed.

**Anna Maryam Alikhani**, of Kensington, Maryland.

**Lauren Beth Lowenstein**, of New York, New York.

**Katelyn Ely Riegger**, of Pasadena, Maryland

### *M.S.N./M.P.H.*

The following students participated in the M.S.N./M.P.H. program offered by the School of Public Health and the School of Nursing. Their joint Master of Science in Nursing and Master of Public Health diplomas will be awarded at the Universitywide Commencement Ceremony on May 18, 2016.

**Fidela Tak-Yee Chiang**, of Vancouver, Canada; B.A., Wheaton College; B.S., Emory University.\*

**Yoonkyuung Anna Chung**, of Los Angeles, California; B.S., The Johns Hopkins University; B.S., University of California, Los Angeles.\*\*

**Kathryn Helfrich**, of Bemus Point, New York; B.S.N., Case Western Reserve University.\*\*

**Lindsey Kathleen MacNeil**, of Holderness, New Hampshire; B.S., The Johns Hopkins University; B.A., College of the Holy Cross.\*

**Liduina Ngwenyi Ngundam**, of Bethesda, Maryland; B.S.N., University of Virginia. \*

**Carolyn Beth Summer**, of Washington, District of Columbia; B.S., The Johns Hopkins University; B.A., University of Michigan. \*

# Doctoral Candidates

May 1, 2016

## *Biochemistry and Molecular Biology*

### *Doctors of Philosophy*

**Hongfan Chen**, of Hangzhou, People's Republic of China; B.S., Fudan University. Advisor: Scott Bailey, Ph.D. *Biochemical and Structural Characterization of Bacterial RNA-guided DNA Targeting Systems.*

**Daisy del Carmen Colón López**, of Barranquitas, Puerto Rico; B.S., Universidad De Puerto Rico. Advisor: Jurgen Bosch, Ph.D. *Targeting the Role of Subtilisin-like Protease 2 for Inhibition of Erythrocyte Invasion by the Malaria Parasite, Plasmodium.*

**Casey Marie Daniels**, of Harrisburg, Pennsylvania; B.S., University of Maryland, Baltimore County. Advisor: Kar Lun Anthony Leung, Ph.D. *Characterization of the ADP-ribosylated Proteome by Mass Spectrometry.\**

**Michael Anthony Estrella**, of Ridgewood, New York; B.S., St. Francis College. Advisor: Scott Bailey, Ph.D. *Nucleic Acid Degradation by the CRISPR Type III-B Complex.*

**Katherine Hays Reiter**, of Baltimore, Maryland; B.S. & B.A., Emory University. Advisor: Michael Matunis, Ph.D. *Characterizing SUMOylation in the Malaria Parasite, Plasmodium falciparum.\**

## *Biostatistics*

### *Doctors of Philosophy*

**Shaojie Chen**, of Shijiazhuang, Peoples Republic of China; B.S., Tsinghua University; M.S.E., The Johns Hopkins University. Advisor: Brian Caffo, Ph.D. *Statistical Methods to Analyze Massive High-dimensional Neuroimaging Data.\**

**Aaron J. Fisher**, of Baltimore, Maryland; B.A., University of Rochester. Advisor: Vadim Zipunnikov, Ph.D. *Methods for High Dimensional Analysis, Multiple Testing, and Visual Exploration.*

**Jean-Philippe Fortin**, of Montreal, Canada; B.S., McGill University. Advisor: Kasper Hansen, Ph.D. *Statistical Methods for Epigenetic Data and Magnetic Resonance Images.*

**Jonathan Evan Gellar**, of Highland Park, Illinois; M.P.H., The Johns Hopkins University; B.S., University of Southern California. Advisor: Ciprian Crainiceanu, Ph.D. *Functional Regression Methods for Densely-sampled Biomarkers in the ICU.\**

**Fang Han**, of Beijing, People's Republic of China; M.S., University of Minnesota; B.S., Peking University. Advisor: Han Liu Ph.D. *Large-scale Nonparametric and Semiparametric Inference for Large, Complex, and Noisy Datasets.\**

**Lei Huang**, of Shanghai, Peoples Republic of China; B.S., Shanghai Jiao Tong University; M.A., Columbia University. Advisor: Ciprian Crainiceanu, Ph.D. *Statistical Analysis in High Dimensional Structured Data.*

**Amanda F. Mejia**, of St. Francisville, Louisiana; B.S. & M.S., Georgia Institute of Technology. Advisor: Martin Lindquist, Ph.D. *Statistical Methods for Functional Magnetic Resonance Imaging Data*

**John Muschelli**, of Aston, Pennsylvania; Sc.M., The Johns Hopkins University; B.S., The University of Scranton. Advisor: Ciprian Crainiceanu, Ph.D. *Computational Methods for Neuroimaging in R: Stroke Hemorrhage in X-ray Computed Tomography Scanning.*

**Parichoy Pal Choudhury**, of Kolkata, India; B.Stat. & M.Stat., Indian Statistical Institute. Advisor: Daniel Scharfstein, Ph.D. *Statistical Inference with Multiple Data Sources.*

**Prasad Patil**, of Acton, Massachusetts; B.A., New York University. Advisor: Jeffrey Leek, Ph.D. *Assessing Reproducibility and Value in Genomic Signatures*

**Huitong Qiu**, of Shanghai, People's Republic of China; B.S., Fudan University. Advisor: Brian Caffo Ph.D. *Statistical Methods and Theory for Analyzing High Dimensional Time Series.*

**Yifei Sun**, of Beijing, People's Republic of China; B.S., Zhejiang University. Advisor: Mei Cheng Wang, Ph.D. *Statistical Methods for Recurrent Marker Process in the Presence of Terminal Events.\**

# Centennial Convocation Speaker

## **Mona Hanna-Attisha, M.D.**

Mona Hanna-Attisha, MD, MPH, FAAP is director of the Pediatric Residency Program at Hurley Children's Hospital in Flint, Michigan and assistant professor of pediatrics at Michigan State University College of Human Medicine. She is a courageous public health-trained pediatrician who sounded the alarm over the lead contamination in Flint's drinking water.

A Michigan native, Dr. Hanna-Attisha grew up in Royal Oak and first fell in love with Pediatrics while on the Flint campus during her clinical years as a medical student at Michigan State University College of Human Medicine. After completing her residency and chief residency at Children's Hospital of Michigan, she earned a master's degree in Public Health, concentrating in Health Management and Policy, at the University of Michigan School of Public Health.

Dr. Hanna-Attisha was an assistant professor at Wayne State University Department of Pediatrics and an associate director of the Children's Hospital of Michigan Pediatric Residency Program prior to returning to Hurley.

In addition to educating the next generation of physicians, Dr. Hanna-Attisha now directs the Michigan State University and Hurley Children's Hospital Pediatric Public Health Initiative. This model initiative provides the tools and resources for the assessment, continued research and monitoring, and interventions necessary for improving the health and development of the children of Flint.

Dr. Hanna-Attisha received her undergraduate degree from the University of Michigan, Ann Arbor. She serves on the Boards of the Michigan Chapter of the American Academy of Pediatrics and the Oakland Health Plan, and is Honorary Medical Director of the YMCA Camp Copneconic. She is the recipient of multiple honors and awards including, the 2015 William B. Weil, Jr., MD Endowed Distinguished Pediatric Faculty Award from Michigan State University College of Human Medicine, and faculty inductee of the Gold Humanism Honor Society and Alpha Omega Alpha.

# Society of Scholars

The Society of Scholars was created on the recommendation of then president Milton S. Eisenhower and approved by the university board of trustees on May 1, 1967. The society—the first of its kind in the nation—inducts former postdoctoral fellows and junior or visiting faculty at Johns Hopkins who had formative experiences at Johns Hopkins and thereafter gained marked distinction in their respective fields.

Each year, the Society of Scholars Selection Committee elects a limited number of scholars from among the candidates nominated by Johns Hopkins University faculty. Since its inception, 642 individuals have been elected to membership in the society, including 16 members elected in 2016. At an investment ceremony held in the spring of each year, newly elected scholars are formally inducted into the society. Faculty members invest inductees with the Johns Hopkins Society of Scholars medallion and present them with an official certificate of membership.

## **Alain G. Bertoni**

Winston-Salem, North Carolina

*Co-nominated by the Schools of Medicine and Public Health*

Alain Bertoni is a professor and chair of the Department of Epidemiology and Prevention at Wake Forest School of Medicine, where he is also appointed in the Department of Internal Medicine's section on general medicine. He joined the Wake Forest faculty in 2001 as an assistant professor after earning degrees from the schools of Medicine and Public Health at Johns Hopkins University in 1994 and 1999, respectively, and conducting postdoctoral training at Johns Hopkins with the Osler Medical Service and in general internal medicine and epidemiology. Dr. Bertoni focuses his epidemiological research on diabetes, cardiovascular disease, and disparities in health and health care. He is currently the principal investigator or co-principal investigator of several major research efforts and clinical trials related to diabetes, heart failure, and atherosclerosis risk, including the Lifestyle Intervention for Treatment of Diabetes study, the Targeted Analyses of Diabetes and Obesity in the Jackson Heart Study, and the MESA early heart failure study. Dr. Bertoni is also a faculty member of the Maya Angelou Center for Health Equity and the Translational Science Institute's Program for Community Engagement.

## **Gary L. Darmstadt**

Stanford, California

*Co-nominated by the Schools of Medicine and Public Health*

Gary Darmstadt is associate dean for maternal and child health and a professor of pediatrics in the Division of Neonatal and Developmental Medicine at the Stanford University School of Medicine. Previously he was a senior fellow in the Global Development Program at the Bill & Melinda Gates Foundation, where he developed initiatives to address gender inequalities, empower women and girls, and improve health and development outcomes. At the Gates Foundation, he also served as director of family health, leading program development and implementation across nutrition, family planning, and maternal, newborn, and child health. Dr. Darmstadt also served as a senior research adviser for the Saving Newborn Lives program of Save the Children, where he led the development and implementation of the global research strategy for newborn health and survival. He began at Johns Hopkins in 1989 as a resident in pediatrics and continued through 2008 as an associate professor and founding director of the International Center for Advancing Neonatal Health in the Department of International Health at the Johns Hopkins Bloomberg School of Public Health.

**Maura L. Gillison**

Columbus, Ohio

*Co-nominated by the Schools of Medicine and Public Health*

Maura Gillison is a professor of medicine and holder of the Jeg Coughlin Sr. Chair of Cancer Research at the Ohio State University Comprehensive Cancer Center. Her laboratory established human papillomavirus to be a principal cause of a subset of head and neck cancer and now studies the pathogenesis of this malignancy, from risk factors for oral HPV infection at the population level through the genomics of HPV-positive head and neck cancer and the development of targeted therapeutics. Dr. Gillison received the Clinical Investigator Award from the Damon Runyon Cancer Research Institute, is a member of the American Society for Clinical Investigation and a fellow of the American Association for the Advancement of Science, and in 2012 received the Richard and Hilda Rosenthal Award from the American Association for Cancer Research. She has published numerous articles in professional journals and recently received the Muse Prize for Lifetime Achievement in Otolaryngology or Ophthalmology. At Johns Hopkins, Dr. Gillison earned an MD from the School of Medicine and a PhD from the Johns Hopkins Bloomberg School of Public Health.

**Kung-Yee Liang**

Taipei, Taiwan

*Nominated by the Bloomberg School of Public Health*

Since 2010, Kung-Yee Liang has been president of National Yang-Ming University, the first university in Taiwan dedicated to biomedical education and research, where he also has an appointment at the Institute of Public Health, School of Medicine. Dr. Liang served as vice president of the National Health Research Institutes in Taiwan from July 2003 to August 2006 and was the acting president for six months beginning in January 2006. At Johns Hopkins Bloomberg School of Public Health, Dr. Liang was a faculty member in the Department of Biostatistics for 28 years, serving as the graduate program director from 1996 to 2003. His research interest has been developing new statistical methods for analyzing correlated data derived from longitudinal and genetic epidemiological studies and developing statistical theory for inference in the presence of nuisance parameters. Among many awards, Dr. Liang shared two—the Snedecor Award and the Karl Pearson Prize—with Scott Zeger, a colleague from Johns Hopkins. He has been elected to the American Statistical Association, the Academia Sinica in Taiwan, the Academy of Sciences for the Developing World, and the National Academy of Medicine.

**Maureen Y. Lichtveld**

New Orleans, Louisiana

*Nominated by the Bloomberg School of Public Health*

Maureen Lichtveld has 35 years of experience in environmental public health and is a professor in the Department of Global Environmental Health Sciences at Tulane University's School of Public Health and Tropical Medicine. She holds the Freeport McMoRan Chair of Environmental Policy and is chairman of the department. In 1986, after earning her master's degree in public health from the Johns Hopkins Bloomberg School of Public Health, Dr. Lichtveld began her 18-year tenure with the Centers for Disease Control and Prevention and its Agency for Toxic Substances and Disease Registry. Dr. Lichtveld was one of the highest-ranking environmental health scientists engaged in national environmental health research and policy at the CDC, where she designed research tools and science-driven policies to guide national environmental health studies in communities living near hazardous waste sites nationwide. Dr. Lichtveld's protocols are now part of environmental health programs in all 50 states. Her research integrates environmental health, health disparities, and disasters, with significant bridging expertise in community-based participatory research, women's health, environmental policy, and health systems relevant to disaster preparedness, recovery, and resilience.

**Leslie E. Wolf**

Atlanta, Georgia

*Co-nominated by the Berman Institute of Bioethics and the School of Public Health*

Leslie Wolf is a professor of law and director of the Center for Law, Health and Society at Georgia State University's College of Law. She conducts research in health and public health law and research ethics, and has taught courses on medical liability, human subjects research, public health law, HIV/AIDS and the law, and bioethics. Her research has been funded by the National Institute of Mental Health, the National Cancer Institute, the National Human Genome Research Institute, the Agency for Healthcare Research and Quality, and the Greenwall Foundation. She has served on the Centers for Disease Control and Prevention's Ethics Subcommittee of the Advisory Committee to the Director, and as a peer reviewer for the Department of Defense. Professor Wolf taught at the University of California, San Francisco, where she served on the institutional review board and advisory committee regarding stem cell research. She earned a JD from Harvard Law School in 1991, and in 1996 was selected as one of the first Greenwall Fellows in Bioethics and Health Policy at Johns Hopkins and Georgetown universities. During her postdoctoral fellowship, she earned a master's degree in public health from the Johns Hopkins Bloomberg School of Public Health.

# The School Mace

The Johns Hopkins Bloomberg School of Public Health Mace carried by a Chief Marshal of the Society of Alumni, was first used in the 1986 Convocation Exercises. The head of the mace displays the names of individuals who have served as Dean of the School and their dates of service. The symbols on the seal illustrate the School's dedication to education, research and service in the diverse fields of public health through the promotion of health preservation, control of disease and delivery of health and medical services.

## The Regalia and Symbol

The history of the academic attire can be traced to the medieval period when scholars were also clerics and wore the costume of their monastic order. The hood was originally a cowl attached to the gown, which could be slipped over the head for warmth in the unheated buildings in which they worked. From this necessity evolved the tradition of academic regalia which today is used to identify members of the academic institution by level of degree, academic field, and awarding institutions.

The distinguishing mark of the gown is the sleeve: master—an oblong sleeve open at the wrist; doctor—bell-shaped sleeve with three velvet bars. Academic subjects are identified by the color of the hood trimming. The lining of the hood signifies the colors of the granting institution. The Johns Hopkins University displays a hood lining of gold. The color of the tassel denotes the degree. It may be black or gold thread or the same color as the hood trim. The colors associated with the different academic subjects are:

# International Declaration of Health Rights

*Composed by faculty and students on the occasion of  
The Johns Hopkins School of Public Health's 75th Anniversary*

**W**e as people concerned about health improvements in the world, do hereby commit ourselves to advocacy and action to promote the health rights of all human beings.

The enjoyment of the highest attainable standard of health is one of the fundamental rights of every human being. It is not a privilege for those with power, money or social standing.

Health is more than the absence of disease, but includes the prevention of illness, development of individual potential, a positive sense of physical, mental and social well-being.

Health care should be based on dialogue and collaboration between citizens, professionals, communities and policy makers. Health services should be affordable, accessible, effective, efficient and convenient.

Health begins with healthy development of the child and a positive family environment. Health must be sustained by the active role of men and women in health and development. The role of women, and their welfare, must be recognized and addressed.

Health care for the elderly should preserve dignity, respect and concern for quality of life and not merely extend life.

Health requires a sustainable environment with balanced human population growth and preservation of cultural diversity.

Health depends on the availability to people of basic essentials; food, safe water, housing, education, productive employment, protection from pollution and prevention of social alienation.

Health depends on protection from exploitation without distinction of race, religion, political belief, economic or social condition.

**Health Requires Peaceful and Equitable  
Development and Collaboration of All Peoples**

### **Environmental Impact**

By printing on this combination of papers, the Bloomberg School was able to save:

Trees: 7

Total Energy: 3 million BTUs

Greenhouse Gases: 675lbs CO<sub>2</sub>

Wastewater: 3,659 gallons

Solid Waste: 245 lbs

The JHSPH 2016 Convocation Program was printed on FSC-certified Rolland Opaque 50% pcw. The interior of the JHSPH 2016-2017 Academic Prospectus was printed on FSC-certified Rolland Opaque 50% pcw. The cover was printed on FSC-certified Flo Gloss, 10% pcw.

This paper was supplied by a SmartWay Transport Partner. Since 2004, SmartWay Partners have saved 50 million barrels of oil and 16.5 million metric tons of CO<sub>2</sub> and other emissions that contribute to climate change through a collaboration between the U.S. Environmental Protection Agency and the freight sector.

Environmental impact estimates were made using the Environmental Paper Network Paper Calculator Version 3.2. For more information visit [www.papercalculator.org](http://www.papercalculator.org).
