

**Kamila Mistry, MPH** is currently a doctoral candidate in the Department of Population, Family and Reproductive Health at the Johns Hopkins Bloomberg School of Public Health (JHSPH). Her dissertation explores racial/ethnic disparities in children's early social emotional development. Prior to starting the doctoral program, Ms. Mistry worked as Project Director of the Healthy Steps for Young Children Program National Evaluation at JHSPH, where she focused on research activities relating to parenting practices and early childhood development. Formerly, she also led a number of public health initiatives at the state and local levels. At the Texas Department of Health, Ms. Mistry focused on programs targeting maternal and child health, including designing and implementing the CDC Pregnancy Risk Assessment Monitoring System (PRAMS) for the state. Additionally, at the local level, she managed a community health clinic delivering care to the underserved in Prince George's County, MD. Ms. Mistry received her MPH from Johns Hopkins Bloomberg School of Public Health, Department of Health Policy and Management.
