

PROMOTIONS

CONGRATULATIONS!

DANIELA DRUMMOND-BARBOSA, PhD

Professor

Department of Biochemistry and Molecular Biology

Dr. Drummond-Barbosa was promoted from Associate Professor to *Professor* in the Department of Biochemistry and Molecular Biology at the July meeting of the School's Advisory Board.

Dr. Drummond-Barbosa is a geneticist, stem cell biologist and reproductive biologist who studies, using the powerful *Drosophila* model system, the regulation of germ stem cells by whole-body physiological pathways and mechanisms.

She has made several major contributions to this field of research and is widely regarded as a pioneer and leader in germ stem cell biology
