University Statement on Equal Opportunity

The Johns Hopkins University is committed to equal opportunity for its faculty, staff, and students. To that end, the university does not discriminate on the basis of sex, gender, marital status, pregnancy, race, color, ethnicity, national origin, age, disability, religion, sexual orientation, gender identity or expression, veteran status or other legally protected characteristic. The university is committed to providing qualified individuals access to all academic and employment programs, benefits and activities on the basis of demonstrated ability, performance and merit without regard to personal factors that are irrelevant to the program involved.

The university's equal opportunity policy is essential to its mission of excellence in education and research and applies to all academic programs administered by the university, its educational policies, admission policies, scholarship and loan programs and athletic programs. It applies to all employment decisions, including those affecting hiring, promotion, demotion or transfer; recruitment; advertisement of vacancies; layoff and termination; compensation and benefits; and selection for training. Consistent with its obligations under law, it also extends to the maintenance of affirmative action programs for minorities, women, persons with disabilities and veterans.

The university assigns a high priority to the implementation of its equal opportunity policy, and significant university resources are devoted to assuring compliance with all laws prohibiting discrimination in employment and educational programs. Caroline Laguerre-Brown, the university's vice provost for Institutional Equity, is responsible for assisting me and other university officers in the implementation of equal opportunity and affirmative action programs. Members of the university community are encouraged to contact [Caroline Laguerre-Brown](#) or [Allison J. Boyle](#), the Director of Equity Compliance and Education/Title IX Coordinator in the Office of Institutional Equity in the Wyman Park Building, Suite 515, Homewood campus, 410.516.8075, or the divisional offices of Human Resources regarding any questions or concerns about these matters.

Sincerely,

Ronald J. Daniels

The Equal Opportunity policy and other Johns Hopkins University policies, including policies of the Office of Institutional Equity, Office of Human Resources, and Office of Research Administration, can be accessed at <https://www.jhu.edu/university-policies/>

July 24, 2018

Welcome to the Department of Health, Behavior and Society! I hope that you will have stimulating and satisfying academic studies and public health experiences in the next few years. The faculty are eager to join you in your new stage of education and learning. We are a department of 44 faculty and 58 Masters' students and 34 doctoral students.

As you know, the Department focuses on the social, behavioral and structural conditions that influence our health and health behaviors. As a department, we are engaged in the pursuit of knowledge relevant to the social and behavioral contexts of health as well as improving public health interventions and practices. We are involved locally, nationally and internationally. From leading a campaign to reduce Baltimore's infant mortality rate (B'more for Healthy Babies), to projecting the need for Critical Services for the Opioid Epidemic (Bloomberg American Health Initiative), to working in 32 countries focused on the delivery of impactful social and behavior change communication (CCP, The Health Communication Capacity Collaborative [HC3]), the impact of our work is far reaching.

Besides excellent classes and assignments and meaningful public health experiences, there are ample opportunities to engage with other students, faculty, and public health experts around topics of special interest to you. HBS students are given the opportunity to engage in the community to effectively promote relationships that generate ideas and resources between community members and health officials. HBS students are encouraged to participate in department and School seminars to learn and participate in discussions around leading public health issues. We also hope you can have some good times with your fellow students and HBS department members.

HBS faculty and I are committed to your education. We are eager for feedback and discussion with you!

With best regards,

A handwritten signature in cursive script that reads "Margaret E. Ensminger".

Peg Ensminger, PhD

Professor and Interim Chair

UNIVERSITY COMMENCEMENT	Th May 23
RESIDENCY PROGRAM ENDS	F June 28

DEPARTMENT MISSION AND OVERVIEW

Mission

The Department of Health, Behavior and Society is dedicated to pioneering research, training and public health practice scholarship focused on the influences of social context and behavior on health—all with the aim of developing, evaluating and implementing solutions to pressing public health challenges in Baltimore, the United States and around the globe.

Research

Research in the Department of Health, Behavior and Society emphasizes theoretical, methodological and applied studies in three main research areas:

- social determinants of health, and structural- and community-level interventions to improve health
- health communication and health education
- behavioral and social aspects of genetics and genetic counseling

Of most interest are public health challenges related to the leading international and domestic causes of death, as well as diseases and injuries that disproportionately impact racial, ethnic and vulnerable communities. The Department feels a special responsibility to address public health challenges that disproportionately impact urban communities.

The public health areas we address include HIV/AIDS, sexually transmitted infections, cancer, violence, unintentional injury, cardiovascular diseases, diabetes, obesity, respiratory diseases, emerging infectious diseases, the improvement of quality of life, and alcohol, tobacco, and other drug use.

Practice

The Department of Health, Behavior and Society is rich in the number and scale of its practice-related activities—which include opportunities for both students and faculty. Check out the HBS website for more information about our current public health practice.

Faculty

The HBS faculty members are dedicated to research and training that advances scientific understanding of behaviors related to health and how to influence them and improve health outcomes. We seek to understand how behaviors and environmental context interact to affect health, including factors that operate at the individual, organizational, community, and societal levels. We work to develop, implement, evaluate, and disseminate interventions that facilitate healthy behaviors and improve health outcomes.

Many public health problems are integrally related to behavior, cultural norms, and societal factors such as inequities. Interventions to prevent and ameliorate diseases and injuries often depend on change at individual, organizational, community and societal levels. Some of the greatest public health accomplishments – e.g., tobacco control, motor vehicle safety, vaccination – have involved such multi-level interventions to successfully change personal health and safety behaviors. Social and behavioral sciences theories and methods are essential to improve understanding of the determinants of health problems, the behavior change process and effective public health interventions.

The Department is also fortunate to have a distinguished part-time faculty including leaders in behavioral and social sciences and public health. These faculty members have appointments as adjunct professors, senior associates, and associates. They teach courses, serve as preceptors, and are available to guide students seeking career counseling. We list our full-time faculty

below, and a more complete list of all HBS faculty is found at <http://www.jhsph.edu/departments/health-behavior-and-society/faculty/>

Faculty Research Interests

Sean Travis Allen, DrPH

Assistant Scientist. Dr. Allen uses quantitative methods to evaluate the effects of public health policies on injection drug use-related health disparities, including HIV incidence and overdose fatalities. He has particular interest in using geospatial and longitudinal analyses to better understand policy change as a structural level intervention for public health. Dr. Allen's current interests include rural health, substance use, and the translation of research evidence to the policy realm. During his postdoctoral training at Johns Hopkins, Dr. Allen also served as a Senior Policy Advisor at the White House Office of National Drug Control Policy.

Stella Babalola, PhD

Associate Professor. Dr. Babalola has served as Senior Research Officer at the Johns Hopkins University Center for Communication Programs (JHU/CCP), Baltimore since 1998. She has over 25 years working experience in international health, education, communication and research in Africa and the Caribbean. Prior to joining JHU/CCP, she consulted for various international agencies in the design, implementation and evaluation of behavior change programs for HIV/AIDS, family planning, child survival, women's political empowerment, early childhood education, adolescent health, and democratic participation. Her areas of research interest include: adolescent reproductive health, positive deviance, democracy and governance, and gender issues.

Hoda Bastani, MD

Instructor. As a pediatrician and preventive medicine physician, Dr. Bastani is interested in developing and evaluating programs that prevent and treat childhood obesity at a population scale. Her focus, in this regard, is on developing comprehensive multifactorial programs that address food systems, the built environment, and attitudes toward health and wellness behaviors, and particularly target underserved and marginalized populations. She has previously worked on projects in conjunction with the Alexandria Health Department in Alexandria, Va, Johns Hopkins Health Care, Johns Hopkins Community Physicians, and Sibley Memorial Hospital's Innovation Hub. She is currently Chief Resident of the Johns Hopkins General Preventive Medicine Residency Program, and is also pursuing certification in culinary medicine.

Sarah "Sam" Beckham, PhD

Assistant Scientist. Pronouns: he/him. Dr. Beckham's research focuses on implementation science and socio-structural factors that influence health, particularly among stigmatized and hard-to-reach populations in globally. He employs both quantitative and qualitative methods in his research. His research is currently focused on gender and health; LGBTQ health; the intersections of reproductive health and HIV/AIDS; long-acting injectable HIV prevention and treatment; and sanitation-related psychosocial stress among women and girls.

Sara Benjamin Neelon, PhD, JD

Associate Professor. Dr. Benjamin Neelon's research focuses on environmental and policy-based approaches to obesity prevention in families and young children. These studies include community-based interventions to promote healthy eating and increase active play in children and their families. They also include observational studies examining weight gain trajectories in early life, focusing on important factors that may contribute to obesity like sleep and stress. She also focuses on monitoring and evaluating policies that affect children's health outcomes. In addition to a number of US-based studies, she conducts research in Mexico, England, India, and Kenya.

Lee Bone, MPH

Associate Professor. Ms. Bone's research interests include community-based participatory research,

intervention, evaluation, and sustainability strategies that incorporate multi-disciplinary collaborative partners. Her research is focused on adult health in urban African-American communities as it pertains to cardiovascular disease, respiratory diseases such as COPD, and related risk factors (e.g., high blood pressure, tobacco, obesity), and diabetes, as well as cancer screening and treatment. As part of her efforts, Ms. Bone works with groups of faculty members from the Johns Hopkins University Schools of Public Health, Medicine, and Nursing as well as the Johns Hopkins Hospital. Her research partners also include relevant community-based organizations and institutions (e.g. churches, schools, and local governmental agencies). An important component of much of her research is testing the effectiveness of nurse-supervised indigenous navigators/ community health workers (CHWs) who serve as study recruiters, interviewers, and interventionists.

Janice V. Bowie, PhD, MPH

Professor. Dr. Bowie's research includes minority and women's health, community-based participatory research, cancer control, and spirituality. Dr. Bowie has established a research portfolio that includes collaborations with the faith-based community. She is also affiliated with the Centers on Health Disparities Solutions and also, Cancer Disparities. Dr. Bowie is also the designated faculty for the Certificate in Community-Based Public Health and the co-director for the SBS-MPH concentration.

Amelia Buttress, PhD

Assistant Scientist. Dr. Buttress' research draws from interdisciplinary perspectives and uses historical, qualitative, and quantitative methods to understand and address the social and structural context of health behavior, with particular emphasis on issues related to political economy, health disparities, and the mental and behavioral health of children. Dr. Buttress is currently studying how ideology informs our understanding of health, disease, and evidence in the history of public health, and she is working on several projects that involve facilitating the translation of specialist knowledge from medicine, social science, education, and philosophy to the general public. Dr. Buttress is dedicated to teaching and has a long-standing interest in pedagogy, especially creating public awareness of the history of public health and child psychiatry using new and digital media technology.

Rajeev Cherukupalli, PhD

Assistant Scientist. Dr. Cherukupalli is an economist with research interests in health and public finance. He researches the economics of tobacco taxation—its public health dimensions, the microeconomics of optimal excise taxes and the implementation of tobacco tax policies in different countries. He assists the Bloomberg Initiative to Reduce Tobacco Use in strengthening the evidence base of tobacco tax research, policy and administration globally. Dr. Cherukupalli also studies health insurance markets in the United States, including the effect of the regulatory environment on risk composition, and the impact of the tax system on health insurance purchase decisions and health outcomes.

Lawrence J. Cheskin, MD, FACP

Associate Professor. Dr. Cheskin founded and directs the Johns Hopkins Weight Management Center, a multidisciplinary clinical treatment and research program that was established in 1990. The Center offers internships to students in clinical behavior change. Dr. Cheskin's research interests lie in obesity treatment, especially focusing on dietary and behavioral modifications, individualization of treatment approaches, including alternative treatments, and prevention of childhood obesity through systems-wide approaches. He is currently working on a community obesity treatment intervention in Baltimore among underprivileged minority adults. He also studies ways to use framed mHealth (text messages) to affect behavior change. Dr. Cheskin holds joint appointments in the Department of Medicine, in the Department of International Health's Center for Human Nutrition, at Homewood, and in the School of Nursing.

Joanna Cohen, PhD

Bloomberg Professor of Disease Prevention and Director, Institute for Global Tobacco Control. Trained in epidemiology and health policy, Dr. Cohen's research interests focus on the factors that affect the adoption and implementation of public health policies and on evaluating the beneficial effects and the unintended

consequences of such policies. She has studied legislators regarding tobacco and tobacco control policy, the factors influencing quitting behavior among a longitudinal cohort of smokers, tobacco promotion at the point of sale, tobacco prices including taxes, tobacco packaging including health warning labels, options for reducing the physical availability of tobacco products, tobacco policy evaluation, tobacco industry interference in tobacco control, and e-cigarettes.

Lisa A. Cooper, MD, MPH

Professor. Dr. Cooper is a Bloomberg Distinguished Professor in the Department of Health, Behavior and Society and the James F. Fries Professor of Medicine at the Johns Hopkins School of Medicine. She is jointly appointed in the Departments of Epidemiology and Health Policy and Management at the Bloomberg School. Her research focuses on developing and implementing behavioral interventions targeting health professionals' communication skills, cultural competence and ability to address social determinants of health and on programs to enhance patients' decision-making and disease self-management skills. Dr. Cooper directs the Johns Hopkins Center to Eliminate Cardiovascular Disparities, where she and her multidisciplinary team work with a broad group of stakeholders from healthcare and the community to implement rigorous clinical trials that identify effective, patient-centered solutions to alleviate health disparities among at-risk populations. The Center also provides training to a new generation of clinical and public health scholars.

Melissa Davey-Rothwell, PhD, CHES

Associate Scientist. Dr. Davey-Rothwell's research focuses on the impact of social networks and norms on drug and sex risk behaviors among vulnerable populations including women, people who use drugs, men who have sex with men, and people living with HIV/AIDS. In addition, her work focuses on the development, evaluation, translation and dissemination of behavioral interventions into the field. She is currently the PI of a project assessing the implementation of an evidence-based program in community settings. She has worked with the CDC to package and nationally disseminate a peer education intervention for people who use drugs. She also has a study looking at norms and networks about HIV/STI among older women. She is one of the faculty members of Lighthouse Studies at Peer Point.

Margaret E. Ensminger, PhD

Professor and Associate Chair. Dr. Ensminger's interests include life span development and health; childhood and adolescence; social structure and health; substance use; aggressive and violent behavior. She has been following a cohort of children from an inner city neighborhood, first seen when they were in first grade. They have recently been assessed at age 42. Their mothers were interviewed for a third time as they are about at retirement age. She and her colleagues have been examining the early individual, family and neighborhood antecedents to both healthy and unhealthy outcomes for the cohort of former first graders and their mothers.

Maria-Elena Figueroa, PhD

Associate Scientist. Dr. Figueroa's research expertise comprises a broad range of qualitative and quantitative methodologies for program development and evaluation. Over the last 10 years her work has focused on the study of health behavior in Latin America, Africa and Asia. Her current research focuses on the understanding of ecological, household, and individual factors affecting hygiene behavior, including household water treatment. Other research interests include: development of conceptual models and indicators to assess the effect of community-based and social change communication interventions; behavior change indicators related to gender and reproductive health communication programs; and the role of household traits on health behavior and use of health care services. Dr. Figueroa also serves as Director of the Research and Evaluation Division of the Center for Communication Programs, and as the Center's Director of the Global Program on Water and Hygiene. She provides behavior change expertise to several international organizations including the WHO International Network for the Promotion of Household Water Treatment and the World Bank's Public Private Partnership for Hand Washing, among others.

Katherine Footer, MSc

Assistant Scientist. Dr. Footer's focus is on the intersection of public health, human rights, and social justice,

with a specific focus on improving the health of cis and transgender female sex workers and other marginalized populations. Her research on sex workers is focused on harm reduction, HIV prevention, and understanding the structural drivers for HIV risk. She is currently working alongside Dr. Susan Sherman to oversee the first known U.S. cohort study of sex workers, which is taking place in Baltimore City. Her international work also includes advancing protection of health facilities, patients, and health workers in situations of conflict.

Danielle German, PhD, MPH

Associate Professor. Dr. German uses qualitative and quantitative methods to understand and address the social context of health behavior, with particular emphasis on issues related to HIV transmission, drug use and mental health, and LGBT health. She has a specific interest in the interplay between social, housing, and neighborhood stability; social networks and resources; and infectious disease. Her current work includes a number of applied and interdisciplinary research studies designed to inform public health practice among drug users in rural and urban settings, sexual and gender minorities, and other marginalized populations. She is Principal Investigator of the BESURE study, the Baltimore arm of CDC's National HIV Behavioral Surveillance, which is a community health project that measures prevalence and trends in HIV, health and social issues, health-related behaviors, and access to services through on-going community-based data collection among populations with heightened risk for HIV transmission. Dr. German is also the Co-Director of MHS program in Social Factors and designated faculty for the Certificate in LGBT Public Health.

Andrea Gielen, ScD, ScM

Professor. Dr. Gielen's research interests are the application of behavior change theory, health education and health communication to injury and violence prevention. Her work focuses on clinic and community based interventions to reduce childhood injuries among low income, urban families and domestic violence among women at risk for and living with HIV/AIDS. With a joint appointment in the Department of Health Policy and Management, Dr. Gielen directs the Center for Injury Research and Policy. The Center is home to 15 core and 20 adjunct faculty whose multidisciplinary research spans work to document the incidence and impact of unintentional and violent injuries, understand the causes, identify effective policy and programmatic interventions, and promote the widespread adoption of these interventions.

Ron Z. Goetzel, PhD

Senior Scientist and Director of the Institute for Health and Productivity Studies (IHPS). The mission of the IHPS is to bridge the gap between academia, the business community, and the healthcare policy world – bringing academic resources into policy debates and day-to-day business decisions, and bringing health and productivity management issues into academia. Dr. Goetzel is responsible for leading innovative projects for healthcare purchaser, managed care, government, and pharmaceutical clients interested in conducting cutting-edge research focused on the relationship between health and well-being, medical costs, and work-related productivity. He is an internationally recognized and widely published expert in health and productivity management (HPM), return-on-investment (ROI), program evaluation, and outcomes research. Dr. Goetzel is a Task Force Member of the Guide to Community Preventive Services housed at the CDC, and President and CEO of The Health Project, which annually awards organizations the prestigious C. Everett Koop prize for demonstrable health improvement and cost savings from health promotion and disease prevention programs. He is also a member of several committees organized by the Institute of Medicine (IOM). He is located in Bethesda, MD.

Susan M. Hannum, PhD

Assistant Scientist and coordinator for the Center for Qualitative Studies in Health and Medicine. Dr. Hannum is an interdisciplinary gerontologist whose broad research agenda focuses on chronic illness among aging populations. Her primary interests surround socio-cultural aspects of cancer and cancer survivorship; she is additionally interested in chronic illness management, care implementation, patient outcomes, and issues of death and dying. Dr. Hannum is deeply committed to research that will inform and influence the future of care for those with cancer and other chronic conditions while increasing quality of life and reducing the burden of illness among aging populations.

Zoé Hendrickson, PhD

Assistant Scientist. Dr. Hendrickson's focus is on reproductive health in an increasingly mobile, globalized world. Her research investigates relationships between migration and household gender dynamics and the implications on reproductive decision-making, family planning practices, and healthcare seeking. Dr. Hendrickson is interested in how social structures are implicated in everyday experiences of health and how people seek care. She draws on social theory to think critically about public health research and how best to design thoughtful and sustainable public health programs. Dr. Hendrickson currently works on several health communication projects at the Center for Communication Programs that aim to improve the sexual and reproductive health of women and men in Nepal, the DRC, Côte d'Ivoire, Latin America and elsewhere globally.

Vanya Jones, PhD, MPH

Assistant Professor. Dr. Jones' area of research interest include injury prevention, intervention development and evaluation, and research translation. Her work has focused on low income families and older adults. Dr. Jones is currently collaborating with researchers the Division of General Pediatrics in the School of Medicine to pilot several adolescent violence prevention programs. In addition, she is a core faculty member of the Center for Injury Research and Policy where she is working on an intervention to reduce crashes among elderly drivers. She also serves as the director of a tutoring program in the Harriet Lane Clinic for children testing below their current math and reading grade levels.

Parastu Kasaie, PhD

Research Associate. Trained in the field of engineering and operation research, Dr. Kasaie's research focuses on the development and analysis of computer simulation models of infectious diseases and implications for policy making. Her research interests include modeling and simulation of social/epidemiological systems, resource allocation, HIV/AIDS, Tuberculosis, biostatistics, and public health policy making. Her current research focuses on modeling the epidemic of HIV/AIDS and other Sexually Transmitted Infections (STIs) among Men who have Sex with Men (MSM) in Baltimore City. In this work, Dr. Kasaie investigates the population-level impact of various prevention/control interventions (e.g., Pre-Exposure Prophylaxis) and aims to develop effective strategies for reducing the burden of disease in this population. She's also conducting a study on the impact of household contact tracing for prevention of drug-resistant Tuberculosis infection in India. Dr. Kasaie is a member of JHU Center for AIDS Research (CFAR) and the JHU Center for Tuberculosis Research.

Michelle Kaufman, PhD

Assistant Professor. Dr. Kaufman is a social psychologist by training. She studies how interpersonal relationships and an individual's social context contribute to health outcome disparities, as well as how behavior change interventions can influence these factors. Her work focuses primarily on how gender, sexuality, and associated social status put individuals at risk for poor health outcomes. She uses qualitative and quantitative methodologies to design, implement, and evaluate prevention interventions. Her work spans several continents, with current and past projects in the U.S., Nepal, South Africa, Tanzania, Ethiopia, Malawi, Zimbabwe, Indonesia and Israel. Her current work focuses on technology-enhanced youth mentoring as intervention. In this work, she is using a smartphone app to enhance interpersonal mentoring relationships to address substance use, sexual risk, violence, and mental distress among urban African American youth.

Ryan David Kennedy, PhD, MAES

Assistant Professor. Dr. Kennedy is a tobacco control researcher interested in the role policy plays in addressing the global tobacco epidemic. Kennedy works in low- and middle-income countries through his role with the Institute for Global Tobacco Control. Kennedy works in many regulatory domains including point-of-sale, health warning labels, and clean air laws. Domestically, Kennedy has a program of research with the FDA's Center for Tobacco Programs, funded through the Hopkins CERSI (Center for Excellence in Regulatory Science and Innovation) working to understand e-cigarette advertising of product features including flavors. Emerging tobacco products including e-cigarettes present interesting public health challenges. Kennedy uses a variety of research methods including observational studies, surveys, focus groups and key informant interviews.

Amy R. Knowlton, MPH, ScD

Professor. Dr. Knowlton's research focus is the role of formal and informal caregiving relationships and support networks in vulnerable populations' engagement and retention in HIV clinical care and treatment adherence and outcomes. Her work has used stakeholder collaborative processes to identify major gaps in the continuum of care of highly vulnerable populations and to facilitate the integration and coordination of client-friendly services to fill these gaps. Populations of focus are persons living with HIV and behavioral (drug use or mental) health problems in Baltimore and their caregivers (most supportive family or friends). More recent interests include chronic pain; advance care planning for end-of-life HIV care decision making; and improving HIV outcomes by ensuring a continuum of HIV care and support from health facilities to community and home settings in southern Africa.

Lisa Lagasse, PhD

Assistant Scientist. Dr. Lagasse's research history includes a broad range of topics, including tobacco control, food systems, risk communication, and adolescent and sexual minority health. Her particular areas of expertise are in the fields of health communication and media studies. Dr. Lagasse's current work focuses on applied and translational research using mixed methods to examine tobacco advertising, promotion, and sponsorship in low- and middle-income countries.

Susan Larson, MS

Senior Research Associate. Ms. Larson's research interests are focused on studies of patient-provider communication, specifically through application of the Roter Interaction Analysis System (RIAS).

Carl Latkin, PhD

Professor and Associate Chair. Dr. Latkin's work has focused on HIV and STI prevention among disadvantaged populations, the psychosocial well-being of people with HIV/AIDS, the role of alcohol and other substances on HIV risk behaviors, domestic and international approaches to behavior change, social and personal network analysis, neighborhood factors and health behaviors, injection drug users, mental health, social context and risk behavior, and integrating qualitative and quantitative methods. Dr. Latkin has helped design, implement, and evaluate over a dozen HIV prevention interventions for disadvantaged populations including injection drug users, MSM, and women. He is protocol chair for a network-oriented international HTPN HIV prevention intervention. He serves on an Institute of Medicine committee evaluating the President's Emergency Plan for AIDS Relief.

Krystal Lee EdD

Research Associate. Krystal Lee was born and raised in Kingston, Jamaica and attended college at Morgan State University where she earned a B.S. in Information Science and Systems. Krystal went on to earn a Master's in Public Administration (MPA) from the University of Delaware and a Doctorate in Education (Ed.D) from the University of Florida (Go Gators!) Upon completion of her doctoral program, Krystal joined the staff of her alma mater, Morgan State, in the Office of Residence Life & Housing. She then went on to serve as the Director of the Academic Enrichment Program, providing academic support for MSU students, developing leadership development programs, teaching online leadership classes and providing workshops on a variety of multicultural topics. In her spare time, Krystal enjoys reading, swimming and watching Law and Order reruns.

Andrea R. Mantsios, PhD

Assistant Scientist. Dr. Mantsios' research focuses on the role of social and structural factors contributing to HIV risk and impeding access to HIV treatment and care among marginalized groups. Dr. Mantsios has specific interest in economic strengthening and community empowerment approaches as structural interventions among female sex workers (FSW) and other women at heightened risk for HIV. She is currently working on community-based combination HIV prevention among FSW in Iringa, Tanzania, with a focus on the role of community savings groups in reducing HIV risk and improving health outcomes of HIV-infected women. She is also interested in how biomedical approaches can be rolled out for optimal uptake and effectiveness and currently works on qualitative research with clinical trial participants and providers on experiences with long-

acting injectable PrEP and ART in cities in the U.S. and Spain. Dr. Mantsios' previous work includes HIV research among injection drug users in Tijuana, Mexico, and she led jurisdictional HIV testing initiatives at the New York City Health Department.

Catherine Maulsby, PhD, MPH

Associate Scientist. Dr. Maulsby's research focuses on HIV among men who have sex with men and on undiagnosed seropositivity. She is interested in assessing how social contextual factors shape health behavior and health outcomes, in particular movement along the HIV Continuum of Care. She is the Director of Evaluation for Access to Care, a national program to link and retain PLWHA in quality HIV care and treatment. Her work on the evaluation of Access to Care includes three components: monitoring trends in participant health outcomes, a cost threshold and utility analysis, and qualitative case studies to assess barriers and facilitators to program implementation as well as interagency collaboration.

Eileen McDonald, MS

Senior Scientist. Ms. McDonald's research and practice portfolio focuses on the application and evaluation of health promotion, information technology, and policy strategies to remedy the long-standing public health challenge of unintentional injuries, a leading cause of death in the US. As core faculty with the Johns Hopkins Center for Injury Research and Policy (JHCIRP), Eileen's current projects include evaluating a smartphone app to teach youth about the dangers of opioids, promoting safe sleep and scald burn prevention among parents of newborns who attend the Harriet Lane pediatric primary care clinic, and enhancing injury prevention programming skills among local and state-level coordinators with the National Center for Fatality Review and Prevention. Eileen is the director of the Johns Hopkins Children's Safety Center and the Injury Free Coalition for Kids-Baltimore. She also serves as the Associate Director for Translation for JHCIRP. Her professional experience includes leadership roles in health education and injury prevention organizations as well as consultancies with state, national and international organizations on topics ranging from trauma, burn and injury prevention to diabetes education to the future of the health education and public health credentialing. Eileen directs the department's MSPH program and runs the seminar series for both first- and second-year students.

Meghan Moran, PhD

Assistant Professor. Dr. Moran's research centers around media, pop culture and health. The primary context for this work is tobacco control, where she currently has a project examining the persuasive effects of tobacco marketing and how they relate to population-level disparities in youth and young adult tobacco use. Dr. Moran also examines how tobacco use varies across youth subcultures (e.g. skaters, preppies, hipsters, etc.) and how these variations can inform more efficient and effective tobacco use prevention communication. Dr. Moran is interested in how entertainment media and communication-based interventions can be used to reduce health disparities and is particularly interested in disparities in cancer screening. Other areas of Dr. Moran's research include the role of media and pop culture on vaccine hesitancy and how neighborhood/local communication contribute to health outcomes among residents.

Jill Owczarzak, PhD

Assistant Professor. Dr. Owczarzak's research focuses on the development, dissemination, and implementation of evidence-based public health programs, with a focus on HIV-related services. Her work is informed by her training as an anthropologist and qualitative researcher. She is particularly interested in the role of nongovernmental organizations in implementing public health programs, and how ideas about risk and prevention shape what prevention and care services and strategies are available. She has conducted extensive mixed methods research on these issues as they relate to HIV prevention in the United States and Eastern Europe. She is currently conducting studies in Ukraine that explore place and HIV risk among people who use drugs; women's experiences accessing and receiving health services; and the role of drug use and HIV stigma on women's HIV care experiences. Dr. Owczarzak is the Co-Director of the department's MHS program.

Anne Palmer, MAIA

Senior Research Associate. Ms. Palmer is the Food Communities and Public Health program director at the

Center for a Livable Future. Her research interests include state and local food policy, food access, food environments, urban agriculture, local and regional food systems, sustainable food, and community food security. She directs the national Food Policy Networks project, which builds capacity of state and local food policy councils and other stakeholder groups. She studies food retail, changing store environments affects purchasing and the role of alternative store formats. In collaboration with seven other universities in the NE, she is a co-investigator on a 5-year, USDA funded research project using regional food systems to improve food security. She works with non-profits to evaluate their food system interventions such as farmers markets and urban farms and conducts community food assessments with Baltimore-based nonprofits and community organizations.

Lauren J. Parker, PhD

Assistant Scientist. Trained in health promotion and gerontology, Dr. Parker's research interest is in understanding how social factors influence the health of marginalized populations across the life course continuum. Broadly, her research examines the influence of interpersonal forms of acute and chronic stressors on health via behavioral and psychological processes. She has worked extensively on understanding how such factors influence the health of Black men. Currently, Dr. Parker's research considers how sociocultural and behavioral factors, along with biological process, impact health and health disparities among caregivers for dementia patients, and how long-term services and support (such as adult day services) may be used to intervene.

Enid Chung Roemer, PhD

Associate Scientist. Dr. Roemer is the Deputy Director at the Institute for Health and Productivity Studies. She has over 15 years of experience conducting empirical research in the area of workplace health promotion. Her research examines the relationship between employee health and well-being, healthcare utilization and costs, and work-related productivity. Specifically, her research focuses on organizational and psychosocial factors in the workplace that contribute to a culture of health, health beliefs, health behaviors, and motivation to change and maintain health promoting/disease preventing behaviors across all domains of health and well-being (physical, social, emotional, financial). Her expertise also includes conducting process evaluation of workplace health promotion programs and instrument validation studies.

Debra Roter, DrPH

Professor, University Distinguished Service Professor. Dr. Roter focuses on the dynamics of patient-physician communication and its consequences for both patients and physicians. She developed a method of process analysis applied to audio or video recordings of medical encounters that has been widely adopted by researchers nationally and internationally. Her studies include basic social psychology research regarding interpersonal influence, as well as health services research. Her work includes clinical investigation of patient and physician interventions to improve the quality of communication and enhance its positive effects on patient health behavior and outcomes, and educational applications in the training and evaluation of teaching strategies to enhance physicians' communication skills. Recent work has investigated the association between physician gender and ethnicity on physicians' communication style and the impact of patients' health literacy on ability to fully participate in the medical dialogue.

Susan Sherman, PhD

Professor. Dr. Susan Sherman focuses on articulating and intervening upon the health of drug users and sex workers, with a primary interest in the structural context that engenders STI and HIV risk. She has published over 100 peer-reviewed articles focused on a range of sexual and drug risk behaviors as well as interventions targeting both female sex workers and drug users. She has over 17 years of experience in developing and evaluating HIV prevention, peer-outreach behavioral and microenterprise interventions in Baltimore, Pakistan, Thailand, and India. She is the Co-Director of the Baltimore HIV Collaboratory and a part of the Executive Leadership Committee of the Johns Hopkins Center for AIDS Research. She is the PI of a study that examines the role of the police on the STI/HIV risk environment of street-based sex workers and includes the first cohort of sex workers in the US. She is also evaluating an innovative pre-booking diversion program for low level drug

offenders. She has a new study which focusing on a structural level intervention with sex workers in Baltimore, which will create a Women's Harm Reduction Center that will provide medical, mental health, legal, and social services for street- and venue-based sex workers. She serves on several Baltimore City and state advisory commissions on syringe exchange and overdose prevention initiatives, as well as the Board Secretary of the National Harm Reduction Coalition.

Katherine Clegg Smith, PhD

Professor. Dr. Smith is a sociologist with research interests around the social determinants of health behavior. She also has a general interest in identity and its relationship to health, and communication related to the cancer continuum. Much of her work involves the application of qualitative methodologies to addressing public health problems. Dr. Smith's research is organized around individual and collective understanding of health issues and experiences, often in relation to advancement of health in the face of chronic disease. She is the Director of the PhD program and the Center for Qualitative Studies in Health and Medicine.

Frances Stillman, EdD, EdM

Associate Professor. Dr. Stillman is nationally and internationally recognized for her work on smoking cessation and tobacco control. She is known for developing and evaluating innovative, state-of-the art intervention projects including Smoke-free Johns Hopkins Hospital, the Heart, Body and Soul Spiritual Smoking Cessation Program, and the Johns Hopkins Smoking Cessation Program for Inpatients. However, her major accomplishments are in the area of evaluation and the development of metrics based on a social-ecological model of change. She is a clinical psychologist with over 20 years' experience in tobacco control. She is an Associate Professor in the Department of Health, Behavior and Society at the Johns Hopkins Bloomberg School of Public Health. She also holds secondary appointments in the Departments of Epidemiology and Oncology.

Douglas Storey, PhD

Assistant Professor, Director of the Center for Evaluation Research, and Director for Communication Science & Research in the Center for Communication Programs. Dr. Storey's research and teaching focus on the design, implementation and evaluation of health and environmental communication programs at the national level, mostly in international settings. Current projects in the Middle East, Sub-Saharan Africa and Asia address reproductive health, family planning, maternal and child health, integrated family health, malaria, and the role of narrative communication in behavior and social change programs. He has lived and worked in more than 30 countries and has provided consultancy on communication and evaluation to NCI, CDC, UNICEF, WHO, The Gates Foundation and the World Bank. He is ex-officio Chair of the Health Communication Division of the International Communication Association.

Stephen Tamplin, MSE

Associate Scientist. Mr. Tamplin has broad-based public health and environment experience in the United States and in Asia and the Pacific covering a range of technical disciplines, including tobacco control, air and water pollution control, chemical safety and hazardous waste management, and health promotion.

Roland J. Thorpe, Jr., PhD, MS

Associate Professor. Dr. Thorpe is Director of the Program for Research on Men's Health, and the Deputy Director, in the Hopkins Center for Health Disparities Solutions. Dr. Thorpe is also a Visiting Research Fellow at Duke University's Center on Biobehavioral Research on Health Disparities. His research focuses on understanding the etiology of racial and socioeconomic disparities in health and functional status among middle-to old age community-dwelling adults, with a focus on men's health disparities. He serves as principal investigator of the National Black Men's Health Pilot Study, the Black Men's Health Study, and Disparities in Prostate Cancer Treatment Modality and Quality of Life: Baseline Study. In addition, he is a co-investigator on the Exploring Health Disparities in Integrated Communities Study. He teaches courses on research design and methods in social and behavioral sciences, advanced methods in health services research, and seminar in health disparities.

Karin E. Tobin, PhD

Associate Professor. Dr. Tobin's research interests include examination of social and contextual factors associated with substance abuse and HIV risk, particularly with marginalized populations. Dr. Tobin's signature public health practice activity is the development, implementation and rigorous scientific evaluation of theoretically-based behavioral interventions in domestic and international settings. These interventions have focused on a number of different public health issues including HIV and STI primary and secondary prevention, intervention on opiate overdose, and mental health (depression).

Elliott E. Tolbert, PhD

Research Associate. Dr. Tolbert has been trained in qualitative and quantitative methods and his current research aims to improve the quality of life of people with a cancer history. In addition to clinical research, he has a continued interest in examining and addressing the health and well-being of adolescents, young adults and disadvantaged populations, with a focus on health-risk behaviors. Dr. Tolbert is particularly interested in incorporating technology into intervention techniques.

Carol Underwood, PhD

Assistant Professor. Dr. Underwood has worked and conducted research in the area of international development and health communication for over 20 years, 18 of which have been with the Center for Communication Programs. Dr. Underwood is the lead researcher for Arab Women Speak Out and African Transformation programs; the former is underway in Arab countries and the latter in Tanzania, Uganda and Zambia. Both programs help community members question existing gender norms, explore how those norms influence health practices, and find sustainable, culturally appropriate ways to alter or reinforce gender norms to enhance health competence in their homes and communities. Dr. Underwood also leads the research component of CCP programs in Malawi and Jordan, where she works with her counterparts to develop theory-informed and evidence-based programs. She has worked extensively in the Arab world, Western and Central Asia, and sub-Saharan Africa. A key aspect has been to translate theory and research findings into workable programmatic recommendations.

Ronald Valdiserri, MD, MPH

Senior Research Associate and Distinguished Scholar. Dr. Valdiserri has nearly three decades of public-sector policy and program experience in the fields of HIV/AIDS, sexually transmitted infections and viral hepatitis. He has held public health leadership positions at the U.S. Centers for Disease Control and Prevention, the U.S. Department of Veterans Affairs and the Office of the Assistant Secretary for Health, U.S. Department of Health and Human Services. He has written and lectured extensively on the policy aspects of HIV prevention--including the vital role of community-led efforts, access to curative treatment for hepatitis C infection and sexual health for gay and other men who have sex with men.

Brian Weir, PhD, MHS, MPH

Assistant Scientist. Dr. Weir focuses on HIV prevention among people who inject drugs and other at-risk populations. His current HIV-related research includes needs assessment among Baltimore needle and syringe exchange clients and other people who inject drugs in Baltimore, effectiveness of pre-exposure prophylaxis among male sex workers in Thailand, and economic issues in HIV/AIDS prevention and treatment in Tanzania. An additional area of interest is using emergency medical services (EMS) data to describe the epidemiology of drug overdose, violent trauma, asthma, and other acute and chronic health conditions in Baltimore. He is a lead consultant with the Biostatistics, Epidemiology and Data Management Core at the Center for Child and Community Health. Previously, Dr. Weir conducted public health research on a variety of health issues within local and state health departments.

Cui Yang, PhD

Assistant Professor. Dr. Yang's research draws from multi-disciplinary perspectives to understand and intervene social and structural factors associated with different health outcomes, with particular emphasis on issues related to substance use, HIV, and mental health in both domestic and international settings. Her current

research activities have centered around three areas: 1) to uses qualitative and quantitative methods and examine social and structural factors associated with alcohol and HIV; 2) to utilize communication technology and develop culturally appropriate and novel risk reduction interventions; and 3) to utilize advanced statistical techniques to evaluate public health interventions. Dr. Yang is principal investigator of NIH-funded research of alcohol use among African American men who have sex with men in Baltimore.

ACADEMIC POLICIES AND RESOURCES

This handbook, in combination with the School’s Guidebook, document the policies and procedures that govern your time of study at Johns Hopkins. For your convenience, you will listed the policies and procedures that are most relevant to HBS students. Students are encouraged to familiarize themselves with the complete listing of School policies noted in the Guidebook (https://www.jhsph.edu/offices-and-services/student-affairs/resources/jhsph-guidebook/2018_2019%20Guidebook.pdf).

Note: Additional information on School policies, procedures and resources for students can be found at: <http://www.jhsph.edu/current-students/> and at https://my.jhsph.edu/Resources/PoliciesProcedures/ppm/PolicyProcedureMemoranda/Academic_Programs_01_GeneralPolicies_7-7-17.pdf

Academic and Research Ethics Requirements

Academic Ethics

All students are required to complete the Academic and Research Ethics course (550.860) during their first term. This requirement is independent of the RCR training requirement (described below) and covers topics associated with maintaining academic integrity, including plagiarism, proper citations, and cheating. A complete copy of the Academic Ethics Code may be found in the **School’s Policies and Procedures**

<https://my.jhsph.edu/Resources/PoliciesProcedures/ppm/Pages/default.aspx>

Degree program	Online* Academic and Research Ethics course 550.860.82	In-Person Responsible Conduct of Research (RCR) course 550.600.01 or 306.665.01 <i>Required before prelims</i>
Masters	Required	**Only if on training grant
Non Degree Students	Required	Not required

*** All new students are automatically enrolled in 550.860.82 in their first term of enrollment at JHSPH.**

**** For Masters and Post Docs: This applies only to the following programs: D43, D71, F05, F30, F31, F32, F33, F34, F37, F38, K01, K02, K05, K07, K08, K12, K18, K22, K23, K24, K25, K26, K30, K99/R00, KL1, KL2, R36, T15, T32, T34, T35, T36, T37, T90/R90, TL1, TU2, and U2R.**

Research Ethics.

Responsible Conduct of Research (RCR) connotes a broad range of career development topics that goes beyond the more narrowly focused “research ethics” and includes issues such as conflict of interest, authorship responsibilities, research misconduct, animal use and care, and human subject’s research.

Policy. RCR training requirements for JHSPH students are based on two circumstances: their degree program and their source of funding, which may overlap.

1. All PhD students are required to take one of two courses in Responsible Conduct of Research, detailed below one time, PRIOR TO THEIR PRELIMINARY EXAMINATION, during

their doctoral studies.

2. All students, regardless of degree program, who receive funding from one of the federal grant mechanisms outlined in the NIH notice below must take one of the two courses listed below to satisfy the 8 in-person hours of training in specific topic areas specified by NIH (see NOT-OD-10-019): D43, D71, F05, F30, F31, F32, F33, F34, F37, F38, K01, K02, K05, K07, K08, K12, K18, K22, K23, K24, K25, K26, K30, K99/R00, KL1, KL2, R36, T15, T32, T34, T35, T36, T37, T90/R90, TL1, TU2, and U2R. This policy also applies to any other NIH-funded programs supporting research training, career development, or research education that require instruction in responsible conduct of research as stated in the relevant funding opportunity announcements. It does not include other award types that do not have an RCR training requirement, such as R01s or R21s.

Procedure. Completion of one of the following courses as recorded on the student's transcript serves as documentation of completion of the requirement.

- 550.600 Responsible Conduct of Research
- 306.665 Research Ethics and Integrity (**HBS students take 306.665**)

Any student or postdoctoral fellow unsure of whether their source of funding requires in-person RCR training should contact the project officer for the award.

Advising

All students are assigned a faculty advisor at the time of admission to the program. Advisor assignments are based, in part, on compatibility of the student and faculty research or practice interests. Advisors play an important role in the student's academic life. The advisor is expected to keep abreast of school and departmental degree requirements so that he or she can counsel students on courses and the proper progression towards the degree. Students should consult with their advisors prior to registering for courses each term. In addition, any special requests or petitions that a student submits to any of the administrative offices of the School will require the endorsement of the student's advisor as well as that of the department chair.

Each student is required to meet with his or her advisor at least once per academic term to discuss academic progress, to plan for fulfillment of degree requirements, and to review and modify course selection plans for the next term. These meetings are formally scheduled before each major registration period. **HBS students are responsible for scheduling these meetings with their advisors. See Milestones tables below.** The Academic Administrator works closely with the faculty advisors and also provides guidance to students with the School and departmental academic policies and procedures.

- Students are expected to engage in pre-planning for these meetings.
- Both advisors and students should be aware of and understand curriculum policies and procedures.
- Students and advisors should identify future professional career goals and interests.
- The advisor and student should review the student's tentative curriculum and course schedule, and alternatives should be identified.
- Any major issues or questions about academic programs and non-academic problems should be identified and discussed.
- The academic administrator, the student, and the advisor should be aware of the administrative

policies and procedures affecting payment of tuition and fees, academic eligibility for scholarships, loans, and federal work study eligibility. The academic administrator, working with the student and advisor, can help clarify and identify funding opportunities as well as provide guidance regarding academic policies and procedures.

Business Cards

Students can purchase Johns Hopkins Bloomberg School of Public Health business cards through the Career Services Office. Students will be notified by email about this service, and information will be included on the Career Services web page at <http://www.jhsph.edu/offices-and-services/career-services/for-students/>.

Career and Job Counseling

Career planning and job search assistance is available to students and graduates through the Career Services Offices. Activities are planned throughout the year to assist students in sharpening career goals and job search skills. These activities include: individual counseling, career information forums, and group workshops on resume writing, interviewing techniques, professional networking, and other job search skills and strategies.

Further information on the services available can be found at <http://www.jhsph.edu/offices-and-services/career-services/for-students/>

Certificate Programs

The Department of Health, Behavior and Society offers four certificate programs, which are courses of study in specific areas of public health: the Health Communication Certificate, the Health Education Certificate, the Community-Based Public Health (CBPH) Certificate, the Global Tobacco Control Certificate, and LGBTQ Public Health Certificate. Information about these and other certificates offered by the School: <https://www.jhsph.edu/academics/certificate-programs/>

Disability Services

For the Johns Hopkins University Policy on Accommodation for Disabled Persons, please see the Bloomberg School of Public Health Student Handbook. The School's disability services coordinator, Betty Addison, can be reached at 410-955-3034, baddiso3@jhu.edu. Additional information can be found at <http://www.jhsph.edu/offices-and-services/student-affairs/disability-support-services/>

E-mail Signature Lines

If a student in the Department of Health, Behavior and Society chooses to indicate an affiliation with the University in an e-mail signature line, the line must contain information on the student's candidacy status. Sample e-mail signature line wording is below. It is recommended that students use this wording.

John Student
MHS Candidate
Department of Health, Behavior and Society Johns Hopkins University
Bloomberg School of Public Health

Emergency Alerts

As an employee or student of Johns Hopkins University, you are required to enroll in the Johns Hopkins Emergency Alert System (EAS). When an event, e.g., chemical or radiological cloud, shooter, earthquake, tornado warning, bomb threat or other activity, occurs and requires that people rapidly relocate to a safe place, EAS will send a text message and email to those enrolled in the service.

How to Enroll

1. Go to my.jhu.edu
2. Log in with your JHED ID and password
3. Hover over the My Profile icon on the left and click Emergency Alerts
4. Enter your cell phone number, indicate your service provider, and click the box next to "Receive Emergency Alerts."
5. At the bottom of the screen, select the appropriate campus for location specific alerts.

Expense Reimbursement

Funds have been allocated to reimburse HBS students for expenses related to their academic programs (not to include tuition and fees). The policy and reimbursement form are sent by email to all students and are available from the HBS Academic Office, Room 263.

Department of Health, Behavior and Society doctoral, MHS, and MSPH students have been allocated a fund of \$600 per student for the 2018-2019 academic year to reimburse students for expenses related to their academic programs (not to include tuition and fees, headphones or headsets). Expenses may include items such as books, computer equipment and software, conference registrations, travel to a conference, and APHA and other professional organization memberships. All reimbursement requests must be submitted by **June 1, 2019**. Reimbursements may not be made for expenses dated prior to your matriculation date or after you have been certified as complete (MHS and MSPH students) or completed all degree requirements (doctoral students). All receipts need to be submitted within 90 days of purchase. Any receipt submitted to Shenay Johnson after 90 days is not eligible for reimbursement.

To be reimbursed, students should complete an expense reimbursement form (available in Rm. 263 or by emailing shejohns@jhu.edu) and include original receipts showing method of payment. Receipts must show that payment was made, not only the total amount of purchase. Note that reimbursement cannot be made for the sales tax portion of the purchase amount.

Please ask Shenay Johnson if you have any questions about allowable expenses, acceptable receipts, or any other questions about reimbursement policies.

Please submit completed expense reimbursement form to Shenay Johnson, Academic Program Administrator, Rm. 263 Hampton House, shejohns@jhu.edu, 410-502-4415

Faculty Advisor Roles and Responsibilities

A variety of advising tasks are performed throughout the entire course of an academic year. The faculty academic advisor is expected to carry out the following responsibilities:

- Understand a student's general educational goals and needs upon entry to the school. Initially, this takes place just prior to the student's first course registration period. Frequent follow-up

encounters are required as the student's professional identity and skills develop.

- Evaluate the student's prior educational background and overall work experience bearing in mind the minimum residence requirements for the degree and resolve promptly the potential need to extend the full-time residence beyond the minimum or otherwise modify any major component of the student's
- Clarify the progressive and sequential nature of the student's curriculum using appropriate school and department policy and procedures statements, the catalog, and the JHSPH course system.
- Identify the various key educational resources available in the school and throughout the greater University.
- Aid in course selection appropriate to the student's goals and capabilities and consistent with required and elective course selection guidelines and policies.
- Work with the department chairman in the selection of preliminary oral and thesis readers committees.
- Work with the advisee in selecting, developing, and executing a thesis, essay or field project, and in identifying financial and other resources needed to satisfactorily conduct the same.
- Maintain appropriate awareness of the level of compatibility between the student advisee and self in terms of subject interests and personality.
- Bring to the attention of the student other faculty members having either professional or research interests relevant to the student's program focus.
- Facilitate the advisee's change of department, advisor, and program if deemed appropriate and of benefit to the student.
- Maintain appropriate awareness of school regulations regarding registration, financial aid, the grading system, pass/fail options and contents of the catalog, prospectus, course lists, academic program Policy and Procedures Manuals (PPMs), Student Handbook, relevant departmental guidelines, policies, and procedures.
- Help the student to choose the appropriate registration status in light of various extenuating personal and academic requirements. For students in unusual circumstances, the advisor must be knowledgeable about the procedures for requesting exceptions to school policy and for obtaining a leave of absence, when appropriate.
- Be readily accessible to advisees for the purpose of approving and signing course registration forms, assisting with resolution of course conflicts, and approving and signing all course change forms and pass/fail agreement forms.
- Actively monitor the student's overall academic program and be sensitive to any signs of academic difficulty. Work with department chair, academic program director, the director of Records and Registration, the associate deans, and various other administrative officers of the school as appropriate when special needs or academic difficulties are identified.
Provide strategic guidance in an attempt to assure that the advisee continues to remain in good standing for the duration of the program. In cases where an advisee is not making satisfactory academic progress, the advisor works with the student in devising a plan for stabilizing and rectifying the situation. In cases where a remedy cannot be found, the advisor deals honestly with the student in recommending withdrawal from the course of study or other more appropriate action.
- Be sensitive to personal problems of a cultural, medical, legal, housing, visa, language, or financial

nature.

- Be particularly aware of the fact that the school has a sizeable number of international students who come from a wide variety of educational settings and, because of their prior experience, have needs as professionals, students and individuals that may vary greatly from domestic students. Therefore, these students may require exceptional degrees of sensitivity, understanding and support. The JHMI Office of International Services <http://ois.johnshopkins.edu/> and other administrative units provide guidance and support to faculty advisors in their dealings with foreign students. In many cases, one or more of these administrative units can more directly address students' need. For example, the Johns Hopkins International Society http://ois.jhu.edu/News_and_Events/The_International_Society/, an informal social group composed of JHMI physicians, students, nurses and employees from a variety of cultural backgrounds, provides programs for cultural, social, and educational exchange.
- Evaluate and provide information and recommendations about student advisees for purposes of honors and awards. Materials to support this process include academic records maintained in the Records and Registration Office, periodic official honors and awards announcements (email and posted notices), and evaluation sheets on advisees for use by the Committee on Honors and Awards.
- Provide information and advice about career opportunities and job seeking strategies via avenues known to departmental program faculty. Refer students to the Student Career Services Office for more specific career and job search counseling, guidance, and services.

Become familiar with the career development and job search counseling services and resources made available through the Career Services Office http://www.jhsph.edu/student_affairs/career/

Funding

MHS Program

MHS partial scholarships may be awarded at the time of admission. All MHS students in good academic standing who have completed all required coursework after the first year are certified for the Master's Tuition Scholarship (MTS) which provides 75% tuition support during the field placement portion of the program. Once the MTS has been awarded, the student must maintain full-time registration for the entire period of the award. Students are eligible to receive up to four terms of MTS. Upon completion of the field placement and the required written final paper, the MTS will be concluded. Students are not permitted to enroll in courses using the MTS once they have been certified as complete.

Other sources of funding

Students are encouraged to work through the Financial Aid Office to learn about other available ways to fund graduate study.

Grading System, Pass/Fail Option, and Auditing Courses

Two grading systems are used by all instructors in submitting grades. One is the traditional letter grading system and the other is the pass/fail option. A student must receive a grade of "A," "B," or "C" in any course required by the school, department and/or program. Required courses in which grades of "D" have been received MUST be repeated after consultation with the student's advisor and program. If a course is repeated, both grades will be shown on the student's academic record and the quality points for both will be included in the student's grade point average. Grades of "D" in elective courses are not appropriate for graduate students in the Department of Health, Behavior and Society.

Field Placement and Special Studies and Research are graded strictly Pass/Fail.

The School permits students to take didactic courses on a pass/fail basis by completing a pass/fail form at the time of registration. The forms are available in the registrar's office. However, HBS degree students may not exercise the pass/fail option for any course required in their program. These courses must be taken for a grade, unless they are only offered on a pass/fail basis.

Courses taken for pass/fail are not taken into consideration when doing grade point calculations. Pass/fails will not be retroactively changed to a letter grade. Instructors will assign a grade of "F" for students who register for a course pass/fail and do the equivalent of "D" or "F" work.

The designation "incomplete" (I) will be assigned by an instructor and entered on a student's transcript when the requirements for a course have not been completed on time. An incomplete must be made up and replaced by a final grade within 120 days after the conclusion of the course, or before graduation, whichever occurs first. In the event an Incomplete is not made up within the above stated time period, a final grade of I/F will be assigned. When a final grade is assigned to replace an incomplete, the final grade will be shown, but the letter I on the transcript will remain as well.

Note: Audited courses count toward tuition calculation and the 22 credit per term limit but do not count toward full-time enrollment. **Units associated with audited, undergraduate, or informal courses, or courses taken to satisfy entrance conditions, are not credited in the School programs. Please contact the Academic Office if you have any questions regarding auditing courses. MHS and MSPH students should particularly note that audited courses do not count toward the 64 credits needed prior to being eligible for the Master's Tuition Scholarship.**

Health, Behavior and Society Communications

Health, Behavior and Society also maintains email groups for HBS students and others interested in receiving information from the Department. All new students are automatically added to the email group. Items that may be distributed via email include but are not limited to: announcements about Department of Health, Behavior and Society seminars, student-related meetings and activities, social events, and student funding and job opportunities. Students also receive announcements from the HBS student organization.

Health, Behavior and Society Student Work Room

Doctoral and master's students have access to the new HBS student workroom, located in the Wolfe St Building, Room W3023. Access to the room is card reader only, so please contact the Academic Administrator with your full name and badge number to be added to the access list. HBSSO handles the workspace ground rules for this new space including use for group meetings and other purposes, so please contact the HBSSO leaders for further details.

Identification Badges

Identification badges are required for entrance in all Johns Hopkins Medical Institutions (JHMI) facilities. Security officers at the doors of the School of Public Health as well as the Hospital, School of Medicine and all other JHMI facilities, will ask for proper identification. Students should receive their photo identification badge at Orientation.

Information Technology

Information Technology serves as the central computing resource for the Bloomberg School of Public Health. Its mission is to provide hardware, software, and services resources to support the instructional and research needs of the students and faculty. More information about Information Technology is available at <http://www.jhsph.edu/offices-and-services/information-technology/>

International Student, Faculty and Staff Services

The Office of International Student, Faculty and Staff Services maintains a website with current information for international students: <http://ois.jhu.edu/>

Johns Hopkins Enterprise Directory (JHED)

JHED is the University's web directory. All faculty, staff, and students are included in the directory; however, individuals have the ability to determine which data elements may be accessible on both Intranet (local Hopkins access) and Internet (world-wide) levels. Members of the Hopkins community are granted secure access to the directory via their Login IDs (LID) and passwords. Questions regarding access to JHED should be directed to JHED Support at 410-516-HELP.

Leave of Absence

A leave of absence refers to and is limited to students who, while in good academic standing, are forced to withdraw temporarily from graduate work due to reasons beyond their control, such as illness, military service, financial exigency, or pressing personal reasons justifying an interruption of the degree program. The period is regarded as an approved break in study. This does not mean, however, that a student working on a thesis who has completed all other degree requirements is entitled to a leave of absence.

Students planning to request a leave of absence must file a petition which is signed by the departmental chairman, the student's advisor, appropriate staff members in the area of Student Services and the registrar. An active file fee of \$50 per term is assessed for each term within the leave of absence period. Prior to resuming the degree program, students on leave of absence must notify the department chairman and the registrar. Upon return from leave of absence status, students must register for a minimum of two successive terms before completion of their degree programs. **Important:** *The failure of a student to register without obtaining an approved leave of absence or nonresident status will be considered withdrawn from the degree program and the School. The student must be formally readmitted by the program and department before resuming a program of study.*

Library Services

To meet the needs of the Bloomberg School of Public Health, the Welch Library strives to focus on the diverse areas unique to public health such as basic and applied research, social policy, mental health, management and evaluation of the delivery of health services, biostatistics, epidemiology, environmental health sciences, and the impact on the behavior and health of the community at the individual and societal levels. WelchWeb (www.welch.jhmi.edu), the library's Web site, serves as a point of entry to the complete array of programs and services offered by the library. The primarily electronic collection includes more than 7100 electronic journals, 11,425 electronic books, 421 databases, and 2274 videos available to users anytime, anywhere. Among the many available resources are PubMed, EMBASE,

SCOPUS, Web of Science, CINAHL, PsycINFO, Global Health, LEXIS NEXIS, FirstSearch, Proquest, etc.

Donna Hesson is the librarian for the Department of Health, Behavior and Society. She is here to provide assistance in finding information, helping with literature searches, and offering instruction on how to use the library resources Hopkins has to offer. She is available any time via email (dhesson@jhmi.edu) or you may stop by the 9th floor of Hampton House where she has office hours. Her hours in Hampton House are as follows:

9th Floor, Hampton House

Monday 10am-1pm

Tuesday 10am-3pm

Wednesdays 9:30am-3pm ** (Main SPH building 2nd floor landing near The Daily Grind)

Thursday 10am-12noon

Friday 10am-3pm

Mail Bins

HBS provides mail bins for students on the second floor of Hampton House.

Non-Degree Students and Continuing Education

All students who are not officially registered in one of the degree programs in the Bloomberg School of Public Health are classified as special students. This may be because they have not yet attained degree status or are not seeking a Bloomberg School of Public Health degree and are taking selected courses for their own professional development. Tuition charges are applied to such students according to the number of units for which they are registered. Special students must adhere to established registration and course change deadlines and are obliged to follow all the general academic and administrative policies which apply to degree candidates at the School.

Special Student Regular

Special students may be registered for full-time or part-time course work for which they will receive academic credit although they are not enrolled in a degree program. Such students need to submit complete applications and fees to the Admissions Office and gain acceptance in advance from the chairman of the department to which they are applying. If admitted to a degree program, the special student's residence time and accumulated credits may be applied toward the degree, contingent upon approval of the appropriate department or the MPH Program Office.

However, the total number of accumulated credits for application may not exceed one-half of the credits required for the degree. These credits may be applied to any degree program and may be no older than three years at the time of matriculation. Any credits earned during the term of matriculation will also count toward the degree program.

Special Student Limited

This category includes persons who are permitted to enroll for selected courses of special interest, and whose attendance is limited to those courses for which the individual instructor has given explicit consent to enter. No more than 16 credit units of course work may be accumulated by a special student limited. Coursework successfully completed as a special student limited may be applied to degree programs but does not ensure admission to any program. These credits may be no older than three years at the time of

matriculation. The application fee is paid upon making application to a degree program or to special student regular status. A student who has been terminated, dismissed, or withdrawn may not reenroll in the School as a special student limited. Such students must be formally readmitted to a program or department before registering for a course.

Parental Leave Policy for Graduate Students and Postdoctoral Fellows

Policy

Graduate students and postdoctoral fellows at the Johns Hopkins Bloomberg School of Public Health may request parental leave following the adoption or birth of a child. Parental leave applies to either parent. If both parents are graduate students and/or postdoctoral fellows in the School, both may request simultaneous parental leave.

This policy covers wages to graduate students and postdoctoral fellows who at the time of request for the leave, are receiving stipend support from a training grant, departmental funds, Sommer Scholarship or other School scholarship. The policy also applies to wages for work that is directly related to their dissertation/thesis; postdoctoral fellows receiving either stipends or wages for work that is directly related to their research training are also covered by this policy. Wages for other types of employment or federal work-study are not covered under this policy. Students and fellows who receive such wages may take unsupported leave.

Provisions

Parental leave shall include sixty calendar days of stipend/salary support* and health insurance coverage. Stipend and health insurance support during parental leave will not be granted to those individuals who do not have such support provided to them at the time of the request for leave. Graduate students and postdoctoral fellows who receive loans must comply with his/her loan payback requirements.

Any leave requested longer than one term or sixty calendar days must be approved by the graduate students or postdoctoral fellow's department, but shall be considered unsupported leave.** Insurance premiums during unsupported leave will be the responsibility of the graduate student or postdoctoral fellow. However, the department, at its discretion, may continue to support the student or fellow, including providing for insurance premiums, if other funds are available.

The leave begins on the day the graduate student or postdoctoral fellow is no longer fully engaged in their professional and academic activities and, to the extent possible, should be requested in advance of a birth or adoption. Retroactive requests will be considered on a case-by-case basis.

Procedures

1. A graduate student or postdoctoral fellow should notify the department at the earliest date possible of the intent to utilize the parental leave policy. The department is responsible for updating the payroll and tuition payment systems.
2. If the leave begins mid-term, the graduate student or postdoctoral fellow shall receive the grade of "Incomplete" for all courses and academic credits taken during the then current term; the graduate student or postdoctoral fellow will then be on leave of absence for the following term and is expected to officially change her/his registration status to "Leave of Absence." The graduate student or postdoctoral fellow is responsible for making arrangements with each instructor to resolve a grade of incomplete; an incomplete grade, if unresolved, will become "F" after 120 days unless an extension of this time has been approved by the instructor and the registrar notified.

3. Any leave of absence exceeding 60 days shall be considered personal leave. In any event, only 60 calendar days of stipend/wages will be provided, whether the leave crosses two terms or covers only one term.

* This policy is based on the NIH Grants Policy Statement “Subpart B: Terms and Conditions for Specific Types of Grants, Grantees and Activities” pertaining to the parental leave policy for National Research Service Awards (NRSA) awardees.

** Students and Postdoctoral Fellows supported on NIH Training Grants must adhere to the NIH Policy on Unpaid leave, which states, “Individuals requiring extended periods of time away from their research training experience, that is, more than 15 calendar days of sick leave or more than 60 calendar days of parental leave, must seek approval for an unpaid leave of absence. Approval for a leave of absence must be requested in advance from the NIH awarding office. Fellows must provide a letter of support from the sponsor, countersigned by an AOO, and must advise the NIH awarding office of the dates of the leave of absence. Upon approval of the request, the NIH awarding office will issue a revised NRFA extending the ending date of the current budget period by the appropriate number of days or months of unpaid leave time. Recipients are precluded from spending award funds during the leave of absence.”

Security Services

The Security Department operates 24 hours a day, 7 days a week. For security emergencies or service information at the JHMI East Baltimore campus, you may call the **Security Communications Center at 410-955- 5585**. If you need an escort anywhere on the JHMI campus, call the Security Communications center at 410-955- 5585 or ask any security or protective services officer for assistance. You can also call ahead on your car phone and request that an escort meet you at a designated location. Escorts are available 24 hours a day. **Students are strongly encouraged to utilize the escort service, particularly after dark.**

Student Assistance and Well-Being

The Office of Student Life is available to assist students by providing support and assist in navigating resources pertaining to personal and academic challenges. If you would like to schedule a one-on-one appointment with a staff member in the Office of Student life, you can [contact the Office of Student Life directly. http://www.jhsph.edu/offices-and-services/office-of-student-life/contact-student-life/index.html](http://www.jhsph.edu/offices-and-services/office-of-student-life/contact-student-life/index.html) Students can also contact the [Johns Hopkins Student Assistance Program](#) which provides resources to assist students across the Johns Hopkins community with any pressures and difficulties they may face during their academic careers. The Johns Hopkins Student Assistance Program (JHSAP) is a life management resource that can help you identify and manage challenging issues in healthy ways. Getting help is free, convenient, and confidential. Services include:

- Short-term counseling
- Crisis response
- Healthy relationship support
- School-life coaching and adjustment
- Educational workshops
- Dean, faculty, and staff consultations

For more information or to schedule an appointment, visit www.jhsap.org, call 443-287-7000, or email jhsap@jhu.edu.

Students in need of physical well-being assistance should contact [University Health Services](#).

Student Employment

Prior to accepting any employment at Johns Hopkins University, students must contact the Department's Student Payroll Coordinator, Alisha Wells, awells18@jhu.edu. Students must have a valid I-9 on file before any work can begin. The effective date of the I-9 must not be prior to the date the I-9 has been completed by the department. International students will also need to complete a Foreign National Information Sheet to be submitted to the JHU Tax Office.

http://finance.jhu.edu/depts/tax/about_tax.html

Students are required to submit timesheets for hours worked; signed (copies not accepted) timesheets must be submitted weekly in order to process payments. Students are paid twice per month. Once hired, a personnel number will be assigned. When the new personnel number is assigned, an e-mail will be sent to the student and the supervisor along with a copy of the timesheet and instructions for timesheet submissions. Accurate timekeeping is important; please read the form carefully before completing. Students should also take care not to complete duplicate timesheets. If timesheets are submitted for a week previously processed, an e-mail will be sent to the student and the student's supervisor requesting clarification.

Students should contact Ms. Wells (office hours: Monday – Friday, 8:00 a.m. – 4:30 p.m.) promptly if they have any questions concerning payroll procedures.

Students working as Research Assistants for HBS Faculty will be able to utilize space while active as an RA in the HBS RA Workspace, Hampton House Room B47. Space is assigned by Kathleen Clemens, kathleenclemens@jhu.edu, 284 HH.

Student Groups

The Health, Behavior and Society Student Organization (**HBSSO**) is the student-run group of elected and interested PhD and master's students. HBSSO has two main functions: academic and social. In the academic realm, it is an official communication vehicle between students, staff and faculty to discuss curriculum, student life, advising, research, and other student issues. HBSSO also coordinates picnics, end-of-the-year celebrations, community service activities, and other social events throughout the year. HBSSO has a Student Assembly representative who serves as our official link to what is happening at a school-wide level.

The **Student Assembly** <http://www.jhsph.edu/assembly/> is the annually elected student governing body of the School of Public Health. It serves as a focus for student concerns and activities at the School and represents student views and interests to the administration and faculty. Students have developed an increasingly important voice in School affairs by their participation in School committees.

Summer Institute

The course and registration information for the 2019 Summer Institute will be available on the School and Department websites in February 2019.

Teaching Assistant Policy

Any student who wishes to serve as a Teaching Assistant (TA) in any Health, Behavior and Society course must first complete the self-paced, online “Teaching Assistantships I: Essential Elements” course. Teaching Assistants link: <https://sites.google.com/site/ctlteachingtoolkit/teaching-assistants> . Direct link to register: <https://courseplus.jhsph.edu/core/index.cfm/go/enr:start/cid/296/> Students planning to take online courses should first take the free, non-credit mini-course “Introduction to Online Learning (IOL).” Students are now required to take IOL before beginning their first term.

See <https://courseplus.jhu.edu/core/index.cfm/go/course.home/cid/90/>

Registration for “Teaching Assistantships II: Interactive Methods” is highly recommended for students who wish to develop their knowledge and skills as Teaching Assistants. Students who complete both courses will receive a certificate of completion.

Transfers

When a matriculated student wants to change degree programs or move from one academic department to another prior to completion of a degree, it is considered a “Transfer.” “Transfers” do not involve the School’s Admissions Office. Transfers are distinct from the situation where a student completes one degree and wants to pursue another; such a student must formally apply to the School, as this is not considered a transfer.

IMPORTANT: In the case of transfers, where students do not complete one degree before pursuing another, students should also make sure that there are no additional departmental procedures that must be followed before completing the following procedures:

1. Student prepares a written request to his/her home department asking for the transfer to the new department. If the transfer also includes a change of degree, this information should be explicit in the student’s request.
2. The student’s home department will forward the request on to the new department for endorsement. Both the current and new departments must endorse the request in writing.
3. A copy of the departmental endorsements must be submitted to the Office of Records and Registration by the department that is accepting the student in transfer. The endorsement letters must identify both an effective term for the transfer and an advisor.
4. The transfer will be reported to the School’s Committee on Academic Standards as part of the Office of Records and Registration’s Report.
5. If the student is transferring from one degree program to another within the same department, a letter from the student requesting the transfer, along with the department’s approval, is necessary. This letter must also be sent to the Office of Records and Registration and reported to the School’s Committee on Academic Standards.

Travel Abroad Notice

Graduate students at the Johns Hopkins Bloomberg School of Public Health may have an opportunity to supplement their education or conduct research in another country. These opportunities often enrich the academic curriculum, contribute to dissertation research, and allow students to apply the knowledge they

obtain in the classroom to the world's communities. While the School encourages participation in these kinds of experiences, international tensions can be high. Therefore, students should seek information on conditions abroad before traveling.

The International Travel Resources portal site (<https://my.jhsph.edu/sites/itr>) is designed to provide tools and information to JHSPH students who travel internationally in order to allow them to make informed personal decisions; to protect reasonably themselves from foreseeable harm; to increase their own level of health, safety, and security awareness; and to prepare for emergencies abroad. The site offers a wealth of useful links, travel resources, and insurance information in addition to State Department and Center for Disease Control travel advisories.

If students are traveling to a less developed part of the world, they should be certain to contact their health care provider or the Johns Hopkins International Travel clinic to learn about recommended immunizations and other matters to guard health. Located on the East Baltimore campus, the International Travel Clinic can be reached by telephone at 410-955-8931. Further information about recommended immunizations and prophylaxis is available at the CDC Website, <http://wwwn.cdc.gov/travel/content/Vaccinations.aspx>

International students must contact the Office of International Services (OIS) well in advance of any travel to avoid compliance issues with their visa status.

Students who travel must complete a Graduate Student Study Release and International Travel Checklist and leave the forms with their Academic Administrator. Copies of the forms can be accessed at <https://my.jhsph.edu/sites/itr/default.aspx>. Students are also strongly encouraged to register their travel on the International Travel Registry at this link.

The Global Field Experience Fund supports hands-on public health research and practice related travel costs. All full-time students in good standing are eligible to apply. Details and application available at http://www.jhsph.edu/resources/current_students/globalexperience.html.

Weather Emergencies

A weather emergency is defined as an actual or imminent change in the atmosphere (e.g., snow, a hurricane or a tornado) that is serious enough to disrupt the routine academic, research, service and administrative functions to the university. In the event of a weather emergency, the president of the university or his designee in consultation with the vice president for human resources will decide whether and when to curtail operations and/or invoke the "required attendance policy".

MHS IN SOCIAL FACTORS IN HEALTH

Program Director(s): Dr. Danielle German, Dr. Jill Owczarzak

HBS Academic Administrator: Shenay Johnson, 263 Hampton House, 410-502-4415

General Program Information

The Master of Health Science (MHS) in Social Factors in Health is an advanced research degree for students with undergraduate exposure to social and behavioral sciences and/or public health, who are interested in further training in the theory and methods in this area. The degree is intended to prepare students either for further doctoral training in public health, or to work in a public health research, policy, or practice position. The focus of the MHS in Social Factors program in the Department of Health, Behavior and Society is on integrating and applying a broad range of knowledge and analytical skills in social aspects of public health, with an emphasis on contemporary health problems.

Graduates of the program will be prepared to embark on doctoral training in public health or pursue careers in research, policy, and practice positions in local, state, national, and international agencies, organizations, and institutions.

The curriculum provides broad foundational training in public health, as well as specific training to build substantive knowledge and analytic skills as social scientists in public health, with the ability to understand problems and to design and implement solutions. The program focuses on understanding and influencing the societal structures and behaviors that create risk for disease and illness, as well as social factors that are protective and health enhancing. Rigorous training in applied research methods is also a key element of the curriculum.

Program Requirements

The program consists of one and one-half to two years of full-time study, combining classroom-based coursework, seminars and independent study. Students must also complete a mentored research experience, which includes the development of a research plan. Students must also write a master's research paper presenting original research (in most cases based on the mentored research experience). The research experience, planned with the guidance of the student's academic advisor, may begin after successful completion of 64 credits, typically at the end of the first year, and must include the equivalent of 600 hours of activity in a paid or unpaid position.

After the completion of 64 credits, students in good academic standing are eligible for a Master's Tuition Scholarship (MTS) from the School. The MTS provides 75 percent tuition support during year two of the program.

Academic Progress. The Department expects students to maintain satisfactory academic progress for the duration of the degree program. In the Department, satisfactory academic progress is defined as follows:

Maintaining a minimum cumulative grade point average of 2.75. Failure to maintain satisfactory academic progress as defined by any of the criteria above may be grounds for dismissal from the program.

Course/Credit Load. The program strongly encourages students to register for not more than 18 credits in any one academic term. While the School allows students to register for up to 22 credits, program faculty believe that the additional course burden prohibits students from dedicating the appropriate time needed to each class. Any decision to register for more than 18 credits should be carefully considered and discussed with the student's advisor prior to registration.

Course of Study

Students will complete a minimum of 96 total units of credit hours, in six to eight full-time terms, graduating at the end of the second year. Students must attend the MHS in Social Factors Seminar for all of the terms in which they are registered, including a minimum of two terms in their second year program. It is also expected that MHS students will attend HBS seminar series events.

In the first year, the four full-time terms of study will consist of academic coursework in classroom and seminar settings. A total of 64 academic units must be completed prior to beginning the research practicum, typically within the first four terms of study. HBS students typically register for 16 credits or more each term in the first year to complete the required total of 64 credits and to be eligible for the master's tuition scholarship in the second year (though enrollment may vary slightly from term to term, the 64 credit hour requirement cannot be changed). Audited courses may not be applied toward the full-time enrollment requirement or toward the required 64 credits. All required courses must be taken for a letter grade, unless the course is only offered for Pass/Fail. It is anticipated that students will complete a significant portion of their research practicum activities during the summer between first and second year.

In the second year, HBS students register for 16 credits each term for a course of study that will include remaining courses, as well as thesis research hours with their advisor (or another JHU faculty member) as they work to complete their mentored research experience and compose their research paper. Students may be eligible to complete all requirements for graduation by the end of second term or the beginning of the third term of their second year, depending on the timing of their research experience and final approval of their paper.

Students who have not completed both the mentored research experience and the final paper by the May graduation deadline will be required to register for two credits in the summer term.

Course Waivers and Substitutions. Waiving or substituting a course that the faculty have determined essential to the program is a serious consideration. Students should discuss this thoroughly with their advisor well in advance of the start of the term in which the required course is offered. Course waivers are rare and are appropriate only when the student has completed the course or one very similar to it in prior graduate level training. Course substitutions may be appropriate if the student can provide a rationale for why an alternate course is preferred to the required one. (NB: The alternate course must cover much of the same content as the required course.) If the student and the advisor agree that a waiver or substitution is warranted, a memo from the student (co-signed by the advisor) to the program directors, requesting the waiver should be submitted to the HBS Academic Office no later than the first day of the term of the course in question.

All requests for course substitutions must be submitted in writing to the program directors and student's advisor prior to course enrollment and should include the following information: Proposed competency area for substitution; Proposed course name, number, number of credits, and description; Rationale for substitution, including demonstrated match between course objectives and relevant training competency. Substitutions for coursework in Section 1 and 2a will only be considered with evidence of prior equivalent coursework.

I. Required Courses

1. Methodologic and Research Training

1a. Epidemiology

Students must take a minimum of five credit hours in epidemiology, starting with Epidemiological Inference in Public Health. This class should be taken in Term 1 of Year 1.

Course #	Credits	Course Title	Term Offered	Term/Year Planned	Term/Year Complete
340.721	5	Epidemiological Inference in Public Health	1		

1b. Biostatistics

MHS SBF students must take all 4 of the following courses

Course #.	Credits	Course Title	Term Offered	Term/Year Planned	Term/Year Complete
140.621*	4	Statistical Methods in Public Health I	1		
140.622*	4	Statistical Methods in Public Health II	2		
140.623*	4	Statistical Methods in Public Health III	3		
140.624*	4	Statistical Methods in Public Health IV	4		

*The more advanced Biostatistics series 140.651 – 654 may be substituted.

1c. Social Science Research Methods

Students must take:

Course #	Credits	Course Title	Term Offered	Term/Year Planned	Term/Year Complete
410.615	3	Research Design in the Social and Behavioral Sciences	2		
410.631	3	Intro. to Community-based Participatory Research: Principles and Methods	2		
410.881 410.882 410.883 410.884	6	MHS in Social Factors Seminar – (1 unit per term, 6 terms total). Courses 410.881, 410.882, 410.883, 410.884 are taken in 1 st , 2 nd , 3 rd and 4 th terms of first year, respectively.	1, 2, 3, 4, 5, 6		
410.881 410.882 410.883 410.884	6	MHS in Social Factors Seminar – (1 unit per term, 6 terms total). Courses 410.881, 410.882, 410.883, 410.884 are taken in 1 st , 2 nd , 3 rd and 4 th terms of first year, respectively.			

In addition, students must take at least 2 additional research methods courses (3 or more credits each). Possible courses are:

Course #	Credits	Course Title	Term Offered	Term/Year Planned	Term/Year Complete
410.710	3	Concepts in Qualitative Research for Social and Behavioral Sciences	2		
410.712	3	Theory and Practice in Qualitative Data Analysis and Interpretation for the Social and Behavioral Sciences	3		
410.686	4	Advanced Quantitative Methods in the Social and Behavioral Sciences: A practical Introduction.	4		
330.657	4	Statistics for Psychosocial Research: Measurement	1		
140.658	4	Statistics for Psychosocial Research: Structural Models (prereq. 330.657 or consent of instructor)	2		
410.690	4	Ethnographic Fieldwork	1		
224.690/1	3 & 3	Qualitative Research Theory and Methods & Qualitative Data Analysis	3 & 4		
309.616	2 & 2	Introduction to methods for health services research and evaluation	3 & 4		
410.733	4	Communication Network Analysis in Public Health Programs	1		

Also strongly recommended:

Course #	Credits	Course Title	Term Offered	Term/Year Planned	Term/Year Complete
410.638/9	3	Scientific Writing in Health Sciences: Developing a Manuscript for Publication I & II	3 & 4		

1d. Public Health Core Competencies

Students must take*:

Course #	Credits	Course Title	Term Offered	Term/Year Planned	Term/Year Complete
550.865	2	Public Health Perspectives on Research	2		

Required of all PhD/ScD students, ScM students, and MHS students enrolled in academic/advanced study programs. Students may obtain waivers if they have 1. completed an MPH, professional MHS, or MSPH degree at a domestic institution within the last ten years, 2. enrolled in an MSPH program or in the DrPH program, or 3. taken and passed with a B or better graduate-level courses in the five CEPH core areas that are biostatistics, epidemiology, social and behavioral sciences, environmental health sciences, and health systems administration. Requests for waivers should be addressed to Maryann Smith (mksmith@jhsph.edu) Lecture times: Not applicable (online); LiveTalk sessions: Wednesdays at 12:00 noon or 5:30 PM online.

Social Science Theory as Applied to Public Health

2a. Fundamentals of Social Theory in Public Health

Students must take:

Course #	Credits	Course Title	Term Offered	Term/Year Planned	Term/Year Complete
410.612	3	Sociological Perspectives on Health	1		
410.600	4	Fundamentals of Health, Behavior and Society	1		
410.611	3	Under Pressure: Health, Wealth & Poverty	3		
550.605	3	History of Public Health	3		

In addition, students must take at least 1 of the following policy courses:

Course #	Credits	Course Title	Term Offered	Term/Year Planned	Term/Year Complete
300.600	4	Introduction to Health Policy	1 & 2		
300.650	3	Crisis and Response in Public Health Policy and Practice	3		
318.636	3	Urban Policy	1		
318.623	3	Social Policy for Vulnerable Populations in the U.S.	2		

2b. Social Science Applications in Public Health

Students must take at least 12 credit hours from the following list. Alternate courses may be substituted with permission from the program directors.

Course #	Credits	Course Title	Term Offered	Term/Year Planned	Term/Year Complete
224.689	4	Health Behavior Change: Individual, Household & Community Levels	2		
300.652	4	The Politics of Health Policy	4		
306.650	3	Public Health and the Law	3		
380.600	4	Principles of Population Change	2		
380.604	4	Life Course Perspectives on Health	1 & 2		
380.611	4	Fundamentals of Program Evaluation	3		
410.613	3	Psychosocial Factors in Health and Illness	3		
410.630	3	Implementation and Sustainability of Community-Based Health Programs	4		
410.721/2	2 & 2	Translating Research into Public Health Programs I and II	3 & 4		

340.666	3	Foundations of Social Epidemiology *Offered every other year	4		
410.620	3	Program Planning for Health Behavior Change	1 & 4		
306.660	3	Legal and Public Health Issues in the Regulation of Intimacy	4		
410.668	3	Policy Interventions for Health Behavior Change	2		
318.636	3	Urban Policy	1		
308.610	3	Political Economy of Social Inequalities and its Consequences for Health and Quality of Life	2 & 4		
410.679	3	Global Communication and Social Change	2		

III. Public Health Priority Populations, Issues, and Solutions

MHS in Social Factors students must take at least 12 credit hours from the following list. Alternate courses may be substituted with permission from the program directors

Course #	Credits	Course Title	Term Offered	Term/Year Planned	Term/Year Complete
