June 3-6, 2019

Obesity is a complex public health problem that is best understood using systems thinking. Learn how systems science, thinking and approaches can be applied to prevent and reduce obesity rates.

This Summer Institute course will:

• Introduce systems concepts and discuss their application in obesity and food system research

• Discuss the usefulness and limitations of various systems concepts for researching specific obesity topics

• Explore the application of systems approaches to obesity policy and intervention

**Instructor:** Anne Palmer

**Class times:** 8:30am - 12:20pm
