Welcome!

Welcome to the 32nd Annual Public Health Career Fair, sponsored by the Career Services Office at the Johns Hopkins Bloomberg School of Public Health.

This handbook has been prepared to assist you in learning about the diverse number of organizations represented at the 2016 Public Health Career Fair. Keep this handbook as a reference guide to utilize throughout the year.

We recommend that you:

› Read each profile to receive a brief overview of an organization’s background, products and services

› Keep your mind open to a variety of opportunities

› Introduce yourself to representatives, shake hands, and thank the representatives for coming to the Career Fair

› Obtain a business card from agency representatives you may want to contact at a later date

› If the division of an organization at the Public Health Career Fair is not the area in which you are interested, talk with the representative and ask for a contact name or referral

› Give each recruiter a copy of your resume, and/or business card

› Be enthusiastic and GOOD LUCK!

Remember to stop by the Career Services Office throughout the year for assistance with job search strategies and career plans. You may also visit us online at www.jhsph.edu/careers.
Abt Associates, Inc.
Kelley Freeman, Recruiter Coordinator
Emilie Grant, Recruiter
4550 Montgomery Avenue, Suite 800 North
Bethesda, MD 20814
www.abtassociates.com

Abt Associates is a mission-driven, global leader in research and program implementation in the fields of health, social and environmental policy and international development. Known for its rigorous approach to solving complex challenges, Abt Associates was ranked as one of the top 20 global research firms in 2012 and also named one of the top 40 international development innovators. The company has multiple offices in the U.S. and program offices in nearly 40 countries.

Citizenship requirements: U.S. Citizens

Without passion and purpose, a job is just work.

For over 50 years, Abt Associates has helped drive significant improvements in federal programs addressing priority public health issues including HIV/AIDS and other infectious diseases, nutrition and obesity, chronic diseases, and women’s and children’s health.

It’s more than a job. It’s our passion.

Patricia Bright, Lead Epidemiologist
Alex Secora, Epidemiologist (JHSPH Alumna)
10903 New Hampshire Ave. WO22
Silver Spring, MD 20993
www.fda.gov/Drugs/default.htm

CDER evaluates the safety profiles of drugs available to American consumers using a variety of tools and disciplines throughout the life cycle of the drugs. We maintain a system of postmarketing surveillance and risk assessment programs to identify adverse events that did not appear during the drug development process. We learn about adverse events through required reporting by companies and through voluntary reports submitted to FDA’s MedWatch program, which together total more than 900,000 reports per year. Staff in the Office of Surveillance and Epidemiology use this information to identify drug safety concerns and recommend actions to improve product safety and protect the public health.

THE INTERNATIONAL RESCUE COMMITTEE

The International Rescue Committee is among the world’s leading humanitarian relief and development organizations. The IRC has been at the forefront of efforts to assist people uprooted by war, persecution, or conflict for the last 80 years.

We recognize that the 50 million people forcibly displaced, the most since World War II, require more than “aid as usual.” The complex needs of people affected by crises require creative rethinking in global humanitarian response.

That is why the IRC is determined to deliver evidence-based interventions that bring real change to people’s lives. We are going to the most challenging places, conducting cutting-edge research and forging vital relationships with local governments. Today, our 11,000 employees and 13,000 incentive workers work in 170 field offices in 40 crisis-torn countries. From health care to education to protection for women and girls, the IRC is there. And unlike any other humanitarian organization, it is also here, in 26 U.S. cities, helping refugees adjust to life in America. **Come join us.**

**IMPACT IN 2015**

- 21 million people gained access to primary and reproductive health care
- 2.6 million people received access to clean drinking water or sanitation
- 440,000 children vaccinated against measles

The International Rescue Committee (IRC) helps people whose lives and livelihoods are shattered by conflict and disaster to survive, recover, and gain control of their future. The IRC, based in New York City, works in over 40 countries and 25 U.S. cities to restore safety, dignity and hope. The Health Unit in particular consists of nearly 50 public health professionals who work across 30 countries to provide technical support and conduct research in the areas of Primary, Child, Environmental, Mental and Reproductive Health. We also provide specialized support in information and drug management. Health represents the largest component of the IRC’s global portfolio and reaches more than 21 million people in 2015.

For 40 years and in more than 150 countries, Jhpiego has worked to prevent the needless deaths of women and their families. Jhpiego works with health experts, governments and community leaders to provide high-quality health care for their people. Jhpiego develops strategies to help countries care for themselves by training competent health care workers, strengthening health systems and improving delivery of care. Jhpiego develops innovative, effective and low-cost health care solutions to ensure a level of care for women and their families. These practical, evidence-based interventions are breaking down barriers to high-quality health care for the world’s most vulnerable populations.

**Jhpiego’s focus on technical areas includes:**

- Maternal and Child Health
- Family Planning and Reproductive Health
- Cervical Cancer Prevention and Treatment
- Infectious Diseases:
  - HIV/AIDS/Sexually Transmitted Infections
  - Malaria and Tuberculosis
- Health Innovations and Gender
- Non-Communicable Diseases

To strengthen the delivery of health care services, we focus our expertise on:

- Human capacity development
- Service delivery policy, standards and guidelines
- Education, training and curriculum development
- Performance and quality improvement

Johns Hopkins Surgery Center for Outcomes Research (JSCOR)
Neeraja Nagarajan, Post-Doctoral Research Fellow (JHSPH Alumna)
600 N. Wolfe Street, Blalock 618
Baltimore, MD 21287
www.jscor.org

JSCOR is a Department of Surgery research endeavor to advance the collaborative study of processes of surgical care and surgical outcomes through a multidisciplinary approach. The mission of JSCOR is as follows: to enable Johns Hopkins faculty, staff and trainees to perform state-of-the-art surgical outcomes and comparative effectiveness research.

JSCOR provides access to research support including biostatistical/epidemiological services and data management help across the eleven divisions in the Department of Surgery. Our goal is to help Department of Surgery faculty have a secure, successful and sustainable clinical research experience.

In addition, the JSCOR Surgical Faculty-Student Mentoring Program aims to facilitate collaborative relationships between faculty mentors and student mentees with the overall goal of a mutually beneficial educational experience in clinical research. The program pairs an individual Bloomberg School of Public Health student with a Johns Hopkins School of Medicine faculty surgeon mentor to create a surgeon-student research team. The program’s goal is to guide and assist the team with the design, conduct and analysis of health services research problems using surgical databases.

Annalisa Gnoleba, Public Health Analyst
Ann Maxson, Program Assistant
9609 Medical Center Drive
MSC 9712
Rockville, MD 20850
www.cpfp.nci.nih.gov/

The National Cancer Institute (NCI) Cancer Prevention Fellowship Program (CPFP) is looking for future leaders in the fields of cancer prevention and control. As part of the program, fellows receive:

- The opportunity to obtain an M.P.H. degree at an accredited university.
- Mentored research with investigators at the NCI with opportunities existing across the spectrum of cancer prevention research.
- Competitive stipends, paid health insurance, reimbursement for moving expenses, and a travel allowance to attend scholarly meetings or training.

Candidates must have a doctoral degree or be enrolled in an accredited doctoral degree program, fulfill all degree requirements prior to starting the fellowship, and have no more than 5 years relevant postdoctoral experience.

Citizenship requirements: US Citizens, Permanent Residents

Cancer Prevention Fellowship Program

Application period
May 1 - August 25
Fellowships start the following June

The National Cancer Institute (NCI) Cancer Prevention Fellowship Program (CPFP) is looking for future leaders in the fields of cancer prevention and control.

As part of the program, fellows receive:

- The opportunity to obtain an M.P.H. degree at an accredited university.
- Mentored research with investigators at the NCI. Research opportunities exist across the spectrum of cancer prevention research, including: epidemiology, biostatistics, clinical services, laboratory, nutritional, and social and behavioral sciences, and engineering.
- Competitive stipends, paid health insurance, reimbursement for moving expenses, and a travel allowance to attend scholarly meetings or training.

Candidates must have a doctoral degree (M.D., Ph.D., J.D., or equivalent) or be enrolled in an accredited doctoral degree program and fulfill all degree requirements prior to starting the fellowship. Candidates must have no more than 5 years relevant postdoctoral experience and must be a citizen or permanent resident of the United States.

National Human Genome Research Institute (NHGRI)  
**Vence Bonham**, Senior Advisor to the Director  
**Michael Hahn**, Scientific Program Analyst  
31 Center Drive  
Bethesda, MD 20892  
www.genome.gov/  

National Institutes of Health, National Human Genome Research Institute,  
Office of the Director and Health Disparities Unit of the Social and  
Behavioral Research Branch  

The National Human Genome Research Institute Office of the Director  
oversees general operations, administrative and communications for the  
National Human Genome Research Institute (NHGRI). This office provides  
overall leadership, sets policies, develops scientific, fiscal and management  
strategies and coordinates genomic research for the National Institutes of  
Health (NIH) with other federal, private and international programs.  

NHGRI’s Division of Intramural Research plans and conducts a broad  
program of laboratory and clinical research to translate genomic and  
genetic research into a greater understanding of human genetic disease,  
and to develop better methods for the detection, prevention and treatment  
of heritable and genetic disorders.  

The Social and Behavioral Research Branch Health Disparities Unit conducts  
research to evaluate the use of genomic knowledge and technologies to  
decrease health disparities and enable access to these technologies among  
underserved populations. For example, our work considers how genomic  
discoveries intersect with racial, ethnic and social identities. This research  
considers health disparities both within the clinical setting, with a focus on  
patient-provider interactions, and community settings.  

Additionally, we evaluate health promotion interventions that include  
genomic information with under-resourced, stigmatized and marginalized  
groups.

NIH/NCI Division of Cancer Epidemiology & Genetics

Katie Kortokrax, M.Ed., Communications Consultant, DCCPS
9609 Medical Center Drive
Bethesda, MD 20892
www.dceg.cancer.gov

The Division of Cancer Epidemiology and Genetics (DCEG) conducts broad-based, high quality, high impact research to uncover the causes of cancer & means of prevention. DCEG maintains an international perspective, giving priority to emergent issues identified through epidemiologic, clinical, & laboratory observations, as well as to public health concerns. DCEG develops research resources & partnerships in molecular epidemiology across the global research community. DCEG holds as its top priority the training & development of the next generation of scientists in cancer epidemiology & related fields.

The Division of Cancer Control and Population Sciences (DCCPS) aims to reduce the risk, incidence, and deaths from cancer as well as enhance the quality of life for cancer survivors. The Division conducts and supports an integrated program of the highest quality genetic, epidemiologic, behavioral, social, and surveillance cancer research. The Epidemiology and Genomics Research Program (EGRP) funds research in human populations to understand determinants of cancer occurrence and outcomes. The program fosters interdisciplinary collaborations and the development and use of resources and technologies to advance cancer research and its translation to serve as the basis for clinical and public health interventions.

NORC at the University of Chicago

Luci Rocha, Senior Research Analyst
Patti Truant Anderson, Research Scientist (JHSPH Alumna)
4350 East West Highway
Bethesda, MD 20814
www.norc.org

NORC at the University of Chicago is an independent research institution that delivers reliable data and rigorous analysis to guide critical programmatic, business, and policy decisions.

Since 1941, NORC has conducted groundbreaking studies, created and applied innovative methods and tools and advanced principles of scientific integrity and collaboration. Today, government, corporate and nonprofit clients around the world partner with NORC to transform increasingly complex information into useful knowledge.

NORC conducts research in five main areas: Economics, Markets, and the Workforce; Education, Training and Learning; Global Development; Health and Well-Being; and Society, Media and Public Affairs. NORC has three health-focused departments: Health Care, Public Health and Health Science.

We provide comprehensive and integrated services that span the research cycle, and offer solutions that anticipate and address critical needs in research and data science. We approach all work with deep technical expertise, a spirit of collaboration, and a commitment to scientific integrity.
