Welcome!

Welcome to the 33rd Annual Public Health Career Fair, sponsored by the Career Services Office at the Johns Hopkins Bloomberg School of Public Health. This handbook has been prepared to assist you in learning about the diverse number of organizations represented at the 2017 Public Health Career Fair. Keep this handbook as a reference guide to utilize throughout the year.

We recommend that you:

- Read each profile to receive a brief overview of an organization’s background, products and services
- Keep your mind open to a variety of opportunities
- Introduce yourself to representatives, shake hands, and thank the representatives for coming to the Career Fair
- Obtain a business card from agency representatives you may want to contact at a later date
- If the division of an organization at the Public Health Career Fair is not the area in which you are interested, talk with the representative and ask for a contact name or referral
- Give each recruiter a copy of your resume, and/or business card
- Be enthusiastic and GOOD LUCK!

Remember to stop by the Career Services Office throughout the year for assistance with job search strategies and career plans. You may also visit us online at www.jhsph.edu/careers.
AAAS Science & Technology Policy Fellowships
Salaeha Shariff, Director of Outreach
Barry Williams, Marketing Operations Manager
1200 New York Avenue, NW
Washington, DC 20005
go.stpf-aaas.org/JHSPH

Apply your knowledge & skills to federal policy via the AAAS Science & Technology Policy Fellowships (STPF). A year-long professional development opportunity for doctoral level health professionals to serve in the federal government in Washington, D.C. STPF fosters a career-enhancing network of science leaders who understand policymaking & contribute to society.

Collaborate and brainstorm with high ranking policy leaders. And do it in the company of 200+ talented global scientists and engineers. Learn why so many alumni fellows say the fellowships accelerated their career path!

Citizenship requirements: US Citizens, Permanent Residents

Where science and policy change the world. AND YOU.

With assignments in federal agencies, on Capitol Hill and in the judicial branch, you are on the front line of important societal issues.

AAAS Science & Technology Policy Fellowships offer the premier opportunity for outstanding scientists and engineers to learn first-hand about policymaking while contributing their knowledge and analytical skills to address some of today’s most pressing societal challenges. Enhance your career while engaging with policy administrators and thought leaders.

Fellows serve yearlong assignments in the federal government and represent a broad range of backgrounds, disciplines and career stages. Join a growing corps of over 3,200 strong, policy-savvy leaders working across academia, government, nonprofits and industry to serve the nation and citizens around the world.

Apply and make a difference! To learn more visit stpf-aaas.org/jhsph

ENHANCING POLICY, TRANSFORMING CAREERS
Abt Associates
Ali Halabi, Recruiter
4550 Montgomery Avenue, Suite 800 North
Bethesda, MD 20814
www.abtassociates.com

Abt Associates is a mission-driven, global leader in research and program implementation in the fields of health, social and environmental policy, and international development. Known for its rigorous approach to solving complex challenges, Abt Associates was ranked as one of the top 20 global research firms in 2012 and also named one of the top 40 international development innovators. The company has multiple offices in the U.S. and program offices in nearly 40 countries.

Citizenship requirements: US Citizens, Permanent Residents

Without passion and purpose, a job is just work.

For over 50 years, Abt Associates has helped drive significant improvements in federal programs addressing priority public health issues including HIV/AIDS and other infectious diseases, nutrition and obesity, chronic diseases, and women’s and children’s health.

It’s more than a job. It’s our passion.
Acumen, LLC

Rachel Edmonds
500 Airport Blvd. Suite 365
Burlingame, CA 94010
www.acumenllc.com

Acumen, LLC was established by scholars from Stanford University in 1996. In conjunction with its affiliated nonprofit firm, the SPHERE Institute, Acumen offers practitioners a powerful policy analysis capability, providing specific, impartial advice and context for policy debates. We are committed to the improvement of public policy through information management, and we have worked with several agencies to develop resources to build their internal databases and self-evaluation capacity. To supplement internal sources of information, our team has created and utilized all forms of administrative and survey data to produce outcomes relevant for both service providers and funding organizations. Our team of professionals includes economists, analysts and programmers who are skilled in the use of large-scale administrative data sources to formulate concrete solutions to complicated problems. By basing our research and forecasts on sound empirical foundations, we provide our public and private sector clients a data-driven view of their business. Acumen members have experience conveying information and research findings to broad audiences of policymakers, program operators and other stakeholders. With these interrelated goals and expertise, Acumen, LLC serves the interests of the public, government, business and the research community. Our mission is to improve the information available to policy makers who design health, welfare, education and labor programs at all levels of government. We are an organization that attracts, develops, excites and retains exceptional people.

Founded in 2003, Boston Strategic Partners, Inc. is a thriving healthcare consulting firm with a team of experienced professionals comprised of PhDs, MDs, and MBAs. We are fluent in the language of science, the language of patient care, and the language of business. Our clients range from Fortune 500 companies to mid-sized organizations to start-ups, venture capital and private equity firms, to government agencies. We serve all life science sectors including pharmaceuticals, biotech, medical devices, clinical diagnostics and bioinformatics in five practice areas: Business & Clinical Strategy, Health Economics & Outcomes Research, Medical & Technical Communications, Regulatory Strategy and Financial Advisory.

Citizenship requirements: Interviews regardless of status
The overarching goal of the Cancer Prevention Fellowship Program (CPFP) is to provide a strong foundation for scientists and clinicians to train in the field of cancer prevention and control. As part of the program, we offer training toward an MPH degree at an accredited university during the first year, followed by mentored research with investigators at the National Cancer Institute (NCI) or Food and Drug Administration (FDA). Outstanding opportunities for cutting-edge research in the basic, quantitative, social and behavioral sciences and in clinical cancer prevention, have been the hallmarks of the CPFP since its inception in 1987. Furthermore, a partnership between the NCI and FDA provides opportunities for prevention research in drugs, biologics and medical devices. Other educational opportunities are provided throughout the fellowship to complement the research training, including the NCI Summer Curriculum in Cancer Prevention; the Molecular Prevention Laboratory; the NCI Cancer Prevention and Control Colloquia Series; and the weekly Fellows’ Research Meeting. Additional leadership and professional development training opportunities are available at the NIH and elsewhere.

The Center for Promotion of Child Development through Primary Care is a non-profit company dedicated to helping primary care pediatricians identify, assess and treat health and developmental, behavioral and socio-emotional difficulties in children through the use of an online clinical process support system called CHADIS (Child Health and Development Interactive System – www.CHADIS.com). The family stress project involves the use of the CHADIS system by doctors through a cluster randomized assignment by practice with a preventive outcome aimed at reduction of child maltreatment and improved behavioral outcomes after three years in children enrolling as infants. The focus is on check-up visits using pre-visit data collection – focusing on assessments related to the social determinants of health, moment of care prompting of doctors and post-visit engagement with the system and tracking to referrals if needed. The RA’s role would be managing this large multisite study and the associated personnel.

**Citizenship requirements:** US Citizens

---

**Center for Promotion of Child Development Through Primary Care**

The Center’s goals are to develop a mechanism for using the pediatric check-up visit as a window into the social, emotional and behavioral health of the child and his/her family. The Center has developed CHADIS (Child Health and Development Interactive System – see www.chadis.com) that is a web-based clinical process support system aimed at promoting evidence-based shared decision-making. CHADIS continues development through a series NIH grants and is now being used by over 1.3 million enrolled parents with their child health providers throughout the country.
Discern Health

**Nancy Coon,** Operationa Manager

“Sometimes in life there is that moment when it’s possible to make a change for the better. This is one of those moments.” -Elizabeth Glaser. The Elizabeth Glaser Pediatric AIDS Foundation is a global leader in the fight against pediatric HIV and AIDS, working in 15 countries and at over 5,500 sites around the world to prevent the transmission of HIV to children, and to help those already infected. Today, because of the highly successful work of the Foundation and its partners, pediatric AIDS has been virtually eliminated in the United States. With a growing global staff of over 1,000—nine of 10 who work in the field—the Foundation’s global mission is to implement HIV prevention, care and treatment programs; further advance innovative research; and to execute strategic and targeted global advocacy activities to bring dramatic change to the lives of millions of women, children and families worldwide.

Citizenship requirements: US Citizens, Permanent Residents
The Center for Biologics Evaluation and Research (CBER) is the Center within FDA that regulates biological products for human use under applicable federal laws, including the Public Health Service Act and the Federal Food, Drug and Cosmetic Act. CBER protects and advances the public's health by ensuring that biological products are safe and effective and available to those who need them. CBER also provides the public with information to promote the safe and appropriate use of biological products.

Citizenship requirements: US Citizens

The Center for Biologics Evaluation and Research (CBER) is the Center within FDA that regulates biological products for human use under applicable federal laws, including the Public Health Service Act and the Federal Food, Drug and Cosmetic Act. CBER has unique opportunities for individuals with backgrounds in science or administration to fill positions involved in the regulation and research of blood, vaccines and therapeutics. If you are seeking a challenging career opportunity please submit your resume to CBER.Employment@fda.hhs.gov.

www.fda.gov/cbercareers

The Department of Health and Human Services is an equal opportunity employer with a smoke free environment.
The FDA Center for Tobacco Products (CTP) is responsible for carrying out the Family Smoking Prevention and Tobacco Control Act, which Congress passed in 2009. This law—commonly called the Tobacco Control Act—gives us broad authority to regulate the manufacturing, distribution and marketing of tobacco products. Our goal is to reduce the harm from all regulated tobacco products across the entire population, including:

- reducing the number of people who start to use tobacco products
- encouraging more people to stop using these products
- reducing the adverse health impact for those who continue to use these products.

FDA’s unique position as a regulatory agency allows for a framework of decision-making based on—and within the limits of—both the science and the law. CTP uses a comprehensive approach as the best way to end the negative health effects of tobacco use. This includes defining policy, issuing regulations, conducting research, educating Americans on regulated tobacco products and making decisions on whether new products and claims can be marketed—including reviewing and evaluating applications and claims before the products are allowed on the market. This cohesive, comprehensive approach can help us reach our goals of preventing people from starting to use tobacco products, encouraging tobacco users to quit and reducing the harm caused by tobacco use. As we work to protect the public’s health, we will use the full power of the law to protect consumers from the dangers of tobacco use.

Harlem Children’s Zone
Whitney Saulsberry, Training Manager
1916 Park Avenue, Suite 614
New York, NY 10037
www.hcz.org

Harlem Children’s Zone, Inc (HCZ) is a multi-site, multi-program community organization that provides a unique and comprehensive interlocking network of education, social and health services, and recreation to more than 21,000 children and adults in Central Harlem. Its goal is to create a “tipping point” in the neighborhood so that children are surrounded by an enriching environment of college-oriented peers and supportive adults. HCZ is nationally and internationally recognized for its early and progressive intervention programs, and has been called “one of the most ambitious social-policy experiments of our time” by The New York Times. Our three-pronged approach consists of Prevention, which serves the general youth population and their families; Treatment, which provides intensive support for at-risk youth and their parents and caregivers; and Medical Management, which connects high-risk youth and their families to professional health care providers.

HealthCare Access Maryland

Kristin Hill, HR Generalist
Kimberly Prescott, Director of Human Resources
201 East Baltimore Street, Suite 1200
Baltimore, MD 21202
www.healthcareaccessmaryland.org

HealthCare Access Maryland is a nonprofit agency that connects residents to public health care coverage and helps them navigate services effectively. We work with individuals, hospitals, policymakers and social services organizations to strengthen Maryland’s health care delivery system and make Maryland healthier. Each year, our 200+ employees connect more than 125,000 uninsured and underinsured clients to health insurance, health care and vital community resources. Our programs and services are designed to bridge gaps in services to pregnant and postpartum women, immigrants, people experiencing homelessness, youth in foster care, people with substance use disorders, individuals recently released from jail and others. In 2013, HCAM began serving as the Connector Entity for Central Maryland, partnering with the state of Maryland and local organizations to enroll individuals in health insurance under the Affordable Care Act. HCAM recently developed the HealthLink care coordination model, which offers provider institutions a cost-effective way to show results under the state’s All-Payer system by reducing expensive readmissions and unnecessary emergency department visits. HCAM was established in 1997 as Baltimore HealthCare Access. Starting with 40 employees and two core programs, HCAM now manages more than 16 programs throughout the state and more than 20 funding sources. We adopted our current name in 2011 to reflect our statewide focus. Apply today, and see for yourself what sets us apart. We offer challenging, rewarding work with numerous opportunities for professional development and growth.

The Institute for Global Health (IGH), University of Maryland, Baltimore

Leslie Jamka, Lead Communications Specialist
685 W. Baltimore Street
Baltimore, MD 21201
www.medschool.umaryland.edu/IGH

The Institute for Global Health (IGH), established in 2015 at the University of Maryland School of Medicine, is dedicated to improving global health by conducting innovative, cutting edge research in Baltimore and around the world. The IGH includes the Center for Vaccine Development (CVD), founded in 1974, and the Division of Malaria Research (DMR). The goal of the IGH is to develop new and improved ways of diagnosing, preventing, treating, controlling and eradicating diseases of global impact. Currently, these diseases include malaria, Ebola, Zika and vaccine-preventable infectious diseases such as measles. The CVD is a world renowned entity for the global development, testing and implementation of vaccines. We work domestically and internationally to aid the world’s underserved populations. The CVD is an academic enterprise engaged in the full range of vaccinology from basic laboratory research through vaccine development, pre-clinical and clinical evaluation, large-scale pre-licensure field studies and post-licensure assessments. The DMR supports global malaria eradication efforts by developing and deploying innovative tools for improved malaria treatment, prevention and surveillance. In our molecular parasitology and immunology laboratories in Baltimore, and at field research sites across Africa and Asia, we lead clinical trials of malaria drugs and vaccines and investigate antimalarial drug resistance, molecular and genomic epidemiology, immuno-epidemiology, pathogenesis, malaria in pregnancy and interactions between malaria and co-infections including HIV and schistosomiasis.

Jhpiego, an affiliate of Johns Hopkins University
1615 Thames Street
Baltimore, MD 21231
www.jhpiego.org

Jhpiego is an international, nonprofit health organization affiliated with the Johns Hopkins University. For more than 42 years and in over 155 countries, Jhpiego has worked to prevent the needless deaths of women and their families. Jhpiego works with health experts, governments, and community leaders to ensure high-quality health care for their people. Jhpiego develops strategies to help countries care for themselves by training competent health care workers, strengthening health systems and improving delivery of care. Jhpiego designs innovative, effective and low-cost health care solutions to ensure a level of care for women and their families. These practical, evidence-based interventions are breaking down barriers to high-quality health care for the world’s most vulnerable populations. JHU is an Affirmative Action/Equal Opportunity Employer

Citizenship requirements: US Citizens, Permanent Residents

Work to Make a Difference - Work for Jhpiego

For 40 years and in more than 150 countries, Jhpiego has worked to prevent the needless deaths of women and their families. Through the use of innovative approaches, Jhpiego puts research into practice, develops creative solutions to improve health care services, and strengthens the capacity of countries to save the lives of women and families today – while building sustainable health systems for the future.

Jhpiego’s focus on technical areas includes:

- Maternal, Newborn and Child Health
- Family Planning and Reproductive Health
- Cervical Cancer Prevention and Treatment
- Infection Prevention and Control
- HIV/AIDS and Infectious Diseases
- Malaria Prevention and Treatment
- Health Innovations and Gender
- Digital Health (ICT4D)
- Non-Communicable Diseases
- Urban Health and Communities

To strengthen the delivery of health care services, we focus our expertise on:

- Human capacity development
- Service delivery policy, standards and guidelines
- Education, training and curriculum development
- Performance and quality improvement

For information about our current positions and for application instructions, please visit us online at:

Truth Initiative
Susan Gamboa, Senior Human Resources Coordinator
Kristen Rossbach, Senior Human Resources Coordinator
900 G Street NW, 4th Floor
Washington, DC 20001
truthinitiative.org

Truth Initiative is dedicated to achieving a culture where all youth and young adults reject tobacco. We speak, seek and spread the truth about tobacco through education, tobacco control research and policy studies, and community activism and engagement. Youth and young adults have the power to reject tobacco. Truth® is our national tobacco prevention counter-marketing campaign that speaks to youth and young adults on their terms, through the channels they understand and trust. Truth delivers the facts about the health effects and social consequences of tobacco and the marketing tactics of the tobacco industry so that youth and young adults can make informed decisions and influence others to do the same. Effective tobacco control policies and practices must be grounded in evidence. Our Schroeder Institute for Tobacco Research and Policy Studies, together with our Evaluation Science and Research team, uses rigorous science to identify the most effective means to minimize the harms of tobacco use, measure the effectiveness of interventions and identify best practices for tobacco control. We share findings with decision-makers at all levels so the programs and policies they build will prevent youth and young adults from using tobacco and help current tobacco users quit. To achieve a generation free of tobacco, we empower individuals, coalitions and organizations to take action in their communities. We inspire and train future leaders to help us counter tobacco’s influence, especially within communities of color and low-income populations. These community partners and emerging leaders help us give everyone in the U.S. the chance for a tobacco-free life.

Email Christian Gossett for more information at gossettc@uic.edu.
The Healthcare Analysis team at U.S. News & World Report is looking for a quantitative analyst to help us tackle complex research questions using big data and cutting-edge statistical methods. This analyst will join the team responsible for the widely cited U.S. News Best Hospitals rankings and will help develop other high-profile comparisons of healthcare providers. The results of your work will have significant public visibility and may inform life-altering healthcare decisions made by millions of people each year. Your primary responsibility will be to collaborate with a team of scientists, editors, analysts, product managers and medical advisors to develop rigorous ways of measuring the performance of hospitals, physicians and other healthcare providers. On a day-to-day basis, you’ll write code to manage datasets that contain millions of healthcare claims records, and you’ll build statistical models that measure and compare the quality of healthcare service providers. You’ll have the opportunity to interact with leading clinical experts and quality researchers, and to submit work to academic journals and conferences. Requirements:

- 1-3 years of experience in biostatistics, health services research, epidemiology, health economics, health policy, or a similar field
- Bachelor’s degree (or equivalent experience) in a quantitative area of study; Master’s degree or higher preferred
- High level of proficiency in statistical software such as STATA, SAS, or R (STATA is preferred)
- Attention to detail, along with strong communication, organizational and time management skills
- Experience analyzing Medicare claims or other healthcare administrative data sets is a plus

Candidates must provide a resume and cover letter to be considered.
