jhsph.careers@jhu.edu
Welcome to the 34th Annual Public Health Career Fair, sponsored by the Career Services Office at the Johns Hopkins Bloomberg School of Public Health.

This handbook has been prepared to assist you in learning about the diverse number of organizations represented at the 2018 Public Health Career Fair. Keep this handbook as a reference guide to utilize throughout the year.

We recommend that you:

› Read each profile to receive a brief overview of an organization’s background, products and services

› Keep your mind open to a variety of opportunities

› Introduce yourself to representatives, shake hands, and thank the representatives for coming to the Career Fair

› Obtain a business card from agency representatives you may want to contact at a later date

› If the division of an organization at the Public Health Career Fair is not the area in which you are interested, talk with the representative and ask for a contact name or referral

› Give each recruiter a copy of your resume and/or business card

› Be enthusiastic and GOOD LUCK!

Remember to stop by the Career Services Office throughout the year for assistance with job search strategies and career planning. You may also visit us online at www.jhsph.edu/careers.
Acumen, LLC

**Mollie Karlson**, Recruiting Coordinator  
**Xiao Xiao**, Data and Policy Analyst (Alumna)  
**Aileen Xu**, Data and Policy Analyst  
**Mandy Zhou**, Data and Policy Analyst  
500 Airport Boulevard, Suite 365  
Burlingame, CA 94010  
www.acumenllc.com

Acumen, LLC provides government agencies with high-quality, impartial research and analytical tools to inform decision-making. The activities that we perform reflect the general principle that providers, policy makers, and public citizens should have the best available evidence upon which to base their choices. Acumen’s research focuses on the areas of health and social policy. In particular, Acumen has developed an expertise in topics such as: comparative effectiveness research, value-based purchasing, drug safety, drug pricing, expenditure forecasting, and outcomes measurement for various health and welfare programs.

American Institutes for Research (AIR) is one of the world’s largest behavioral and social science research and evaluation organizations. Our overriding goal is to use the best science available to bring the most effective ideas and approaches to enhancing everyday life. For us, making the world a better place is not wishful thinking. It is the goal that drives us. Founded in 1946 as a not-for-profit organization, we conduct our work with strict independence, objectivity and non-partisanship. The intellectual diversity of our 1,600 employees enables us to bring together experts from many fields in the search for innovative answers to any challenge.

**Citizenship Requirements:** Interview regardless of status
The Association of Maternal & Child Health Programs is a national resource, partner and advocate for state public health leaders and others working to improve the health of women, children, youth and families, including those with special health care needs. AMCHP’s members come from the highest levels of state government and include directors of maternal and child health programs, directors of programs for children with special health care needs, and other public health leaders who work with and support state maternal and child health programs. Our members directly serve all women and children nationwide, and strive to improve the health of all women, infants, children and adolescents, including those with special health care needs, by administering critical public health education and screening services, and coordinating preventive, primary and specialty care. Our membership also includes academic, advocacy and community based family health professionals, as well as families themselves. AMCHP builds successful programs by disseminating best practices; advocating on our member’s behalf in Washington; providing technical assistance; convening leaders to share experiences and ideas; and advising states about involving partners to reach our common goal of healthy children, healthy families, and healthy communities.

Citizenship Requirements: US Citizens, Permanent Residents

IMAGINE
WITH US...

A society where healthy children and healthy families are living in healthy communities.

Together, it is possible.
Whether you’ve just started your career or you have 25 years of experience, we’re your professional organization. We’re here for you.

Associations of University Centers on Disabilities (AUCD)
Daphnee Guillaume, Public Health Program Manager
1100 Wayne Avenue
Silver Spring, MD 20910
www.aucd.org

The Association of University Centers on Disabilities (AUCD) is a membership organization that supports and promotes a national network of university-based interdisciplinary programs. Network members consist of: 67 University Centers for Excellence in Developmental Disabilities (UCEDD), funded by the Administration on Intellectual Developmental Disabilities (AIDD); 52 Leadership Education in Neurodevelopmental Disabilities (LEND) Programs funded by the Maternal and Child Health Bureau (MCHB); and 14 Developmental Disability Research Centers (IDDRC), most of which are funded by the National Institute for Child Health and Development (NICHD). These programs serve and are located in every U.S. state and territory and are all part of universities or medical centers. They serve as a bridge between the university and the community, bringing together the resources of both to achieve meaningful change. The AUCD Public Health Practice team works to create health promotion and public health efforts that include people who have disabilities. They focus on areas of greatest health disparity. They aim to build capacity of the network in public health and encourage public health partners to include people who have disabilities.

The National Center for Health Statistics (NCHS) is looking for Epidemiologists, Health Scientists, Statisticians, Social Scientists and Computer Scientists. NCHS is located in Hyattsville, MD, within one hour drive from Baltimore.

The mission of NCHS is to compile accurate, relevant, and timely statistical information to guide actions and policies that improve the health of the American people.

The work may include survey design and sampling, analysis of statistical data from complex surveys, small-area estimation, life-table analysis, combining information from multiple data sources, quality control, statistical disclosure limitation and confidentiality, handling missing data, questionnaire design, and statistical computing. These positions typically require knowledge and experience in statistical software packages such as Stata, SAS, SPSS, or R.

For further information about NCHS and opportunities for employment, visit us at http://www.cdc.gov/nchs/about/employ.htm or contact the NCHS Recruitment (CDC) email box or at 301-458-4880.

**Citizenship Requirements:** US Citizens, Permanent Residents
The Center for Medical Technology Policy (CMTP) is an independent, nonprofit organization working to strengthen the quality, relevance, and efficiency of clinical research. We do this by bringing together stakeholders from throughout healthcare—public and private payers, regulators, researchers, clinicians, and patients. Together we ask: What are the most important research questions to address? And what are the best methods to answer those questions? CMTP offers internships for college and graduate students, and fellowships for working professionals. CMTP is interested in working with students and researchers in medicine, health services research, public policy, epidemiology, and other related fields.

Citizenship Requirements: Interview regardless of status
The Center for Promotion of Child Development through Primary Care, Inc. in Baltimore, Maryland is seeking applications for an implementation and quality improvement specialist position to begin soon. The Center is a nonprofit, but the position will involve working with our subsidiary, Total Child Health, which is a for-profit company that has been the recipient of a number of SBIR awards from NIH. Both organizations are dedicated to helping primary care pediatricians identify, assess and treat health and developmental, behavioral and socio-emotional difficulties in children through the use of an interactive, web-based program called CHADIS (Child Health and Development Interactive System - www.CHADIS.com). CHADIS is being used in primary care in nearly every state. The Center helps medical specialty boards re-certify doctors (MOC-4) based on a unique combination of patient generated data and prompted clinical decisions. The person in this position will oversee related quality improvement sessions with doctors and related data collection.

Dexis Consulting Group

Yavuz Inanli, International Recruitment Manager
Idra Pavin, International Recruiter
1412 I Street NW
Washington, DC 20005
www.dexisonline.com

Dexis Consulting Group strengthens management systems for the U.S. Government and across developing economies. Since our founding in 2001, Dexis has provided monitoring and evaluation, program management, institutional support, project implementation, and training solutions to address some of the world’s greatest challenges. Dexis team members help shape cutting-edge global affairs and development programs at a rapidly growing firm that has expanded 700% in the past five years. Our staff and consultants enjoy opportunities to tackle challenging assignments, lead projects, work abroad, develop new skills, and collaborate closely with our clients. Our employees are the root of our past successes and the foundation for our future, with that in mind we have made culture a corporate priority. We empower our employees, try new approaches, do what is right rather than what is simply easy, and make decisions that prioritize long-term benefits over short-term gains. We don’t just invest in our staff—we believe in them. And we give them the tools they need to succeed.

Citizenship Requirements: Interview regardless of status
Discern Health

Guy D’Andrea founded Discern in 2004, just as value-based purchasing was entering mainstream health care policy. Discern’s earliest projects focused on implementation of physician and hospital pay-for-performance programs. At that same time, future Discern partners Tom Valuck and Linda Shelton were working at CMS and NCQA, respectively, helping to build those organizations’ value-based purchasing programs. Discern grew in the subsequent years to engage in a variety of projects about health care quality measurement and innovative payment. Linda joined Discern as partner in 2010, and Tom joined in 2013 after working as a senior vice president at the National Quality Forum. Now, Discern has over 20 staff members with a broad array of experience and academic credentials, and our offices in downtown Baltimore are expanding to accommodate the growth of our firm. Discern believes quality-based payment and delivery models will create a high-value health system. Discern is committed to working with each client to help define and implement innovative strategies that will keep pace with health system transformation.

Citizenship Requirements: US Citizens
EpidStat Institute, Inc.

Jon Fryzek, Principal Epidemiologist
Robert Nordyke, Principal Economist
9601 Medical Center Drive
Rockville, MD 20850
www.epidstat.com

EpidStat Institute, Inc. provides scientific expertise related to health issues, pharmaceuticals, medical devices, and environmental chemicals. Our target clientele includes companies and groups needing expert assistance, evaluation of complex health issues, and assistance with the conduct and interpretation of epidemiological studies. Our sister company, EconStat Consulting (www.econstat.com), designs and generates the evidence needed to demonstrate the value of new life sciences products by combining rigorous research with commercial relevance and Market Access experience. At EconStat Consulting, we are the leaders in the new science of market access. Our group combines deep experience across HEOR, payer, clinical, and commercial domains.

Citizenship Requirements: US Citizens

---

EpidStat Institute is seeking professionals with degrees in epidemiology, health economics, public health, public policy or related disciplines to join our growing company.

Epidemiologist

Seeking Master’s or PhD level graduate in occupational or environmental public health to manage and conduct research. Candidates with litigation-related project management experience are encouraged to apply. Duties will include data abstraction; preparation of data to conduct meta-analysis; data analysis with the assistance of a statistician; review and summary of materials; and literature searches and reviews.

This person may be involved with manuscript writing. Good written and verbal communication, ability to work independently, attention to detail, accuracy, and responsibility are important attributes. Experience with Microsoft Word, PowerPoint, and Excel required.

EpidStat Institute is an Ann Arbor-based consulting company with an office in Rockville, Maryland that conducts independent research and litigation support for clients in the nutrition, pharmaceutical, and chemical industries. We have a staff of 20+ public health professionals trained in epidemiology, biostatistics, toxicology, exposure science, medicine, and health communications/health behavior.

www.EpidStat.com

---

Health Economist

Seeking Master’s or PhD level graduate in health economics, epidemiology, public health, or public policy, with demonstrated experience with outcomes research and economic models. This person will conduct various health economic and outcomes research studies to assess the value of novel life sciences products and provide support for scientific and financial project management, client interactions, and collaborative team work on multiple projects. Projects will include literature reviews, economic models (e.g., cost-effectiveness, budget impact), database analyses, and other consulting services.

The successful candidate will have high technical competency in addition to strong communication and problem-solving skills. This position is a good fit for someone that thrives in a fast-paced, growing environment.

EconStat Consulting, a sister company to EpidStat Institute, is a health economics and market access company that designs and generates the evidence that demonstrates the value of new life sciences products. By combining rigorous research with commercial relevance, we lead the science of market access with deep experience in HEOR, clinical, and payer domains.

Food & Drug Administration (FDA)

Amber M. Petronio, Management Analyst
10903 New Hampshire Avenue
Silver Spring, MD 20903
www.fda.gov

The Food and Drug Administration (FDA) is responsible for protecting the public health by assuring that foods (except for meat from livestock, poultry and some egg products which are regulated by the U.S. Department of Agriculture) are safe, wholesome, sanitary and properly labeled; ensuring that human and veterinary drugs, and vaccines and other biological products and medical devices intended for human use are safe and effective. FDA is also responsible for protecting the public from electronic product radiation, assuring cosmetics and dietary supplements are safe and properly labeled, regulating tobacco products, advancing the public health by helping to speed product innovations. FDA’s responsibilities extend to the 50 United States, the District of Columbia, Puerto Rico, Guam, the Virgin Islands, American Samoa, and other U.S. territories and possessions.

Citizenship Requirements: Interview regardless of status

Food and Drug Administration: Center for Tobacco Products

Laura Chavez, Program Analyst
Laura Hurtado Valle, Program Analyst
10903 New Hampshire Avenue
Silver Spring, MD 20993
www.fda.gov/TobaccoProducts

The FDA Center for Tobacco Products (CTP) is responsible for carrying out the Family Smoking Prevention and Tobacco Control Act, which Congress passed in 2009. This law—commonly called the Tobacco Control Act—gives us broad authority to regulate the manufacturing, distribution and marketing of tobacco products. Our goal is to reduce the harm from all regulated tobacco products across the entire population, including:

- reducing the number of people who start to use tobacco products
- encouraging more people to stop using these products
- reducing the adverse health impact for those who continue to use these products.

FDA’s unique position as a regulatory agency allows for a framework of decision-making based on – and within the limits of – both the science and the law. CTP uses a comprehensive approach as the best way to end the negative health effects of tobacco use. This includes defining policy, issuing regulations, conducting research, educating Americans on regulated tobacco products and making decisions on whether new products and claims can be marketed—including reviewing and evaluating applications and claims before the products are allowed on the market. This cohesive, comprehensive approach can help us reach our goals of preventing people from starting to use tobacco products, encouraging tobacco users to quit and reducing the harm caused by tobacco use. As we work to protect the public’s health, we will use the full power of the law to protect consumers from the dangers of tobacco use.

Citizenship Requirements: US Citizens
The Global Health Fellows Program (GHFP) II is the US Agency for International Development (USAID) Global Health (GH) bureau’s premier Fellowship program that identifies and supports diverse, technically excellent professionals at all levels to achieve the Agency’s health priorities. Through GHFP-II, USAID/GH is contributing meaningfully to identifying and training a global health workforce that mirrors the American public and brings a wide range of skills to the global health field. GHFP-II has created jobs and career opportunities in global health for Americans and is engaging academia to strengthen non-technical competencies that are essential for a successful global health career.

Focusing on rigorous, high-end science and creative problem solving, our engagements are led by teams with top credentials and unparalleled client focus.

**Citizenship Requirements:** Interview regardless of status
HELP was formed in 1999 as a collective effort to respond to what was, at the time, the worst natural disaster in decades. Hurricane Mitch devastated most of Central America but Honduras was hardest hit. Our core team founded HELP International in 1999, as H.E.L.P. Honduras. The initial 46 volunteers raised funds and spent four months conducting humanitarian aid projects and working with FINCA Honduras (a recognized leader in microfinance) to recapitalize and expand local microcredit programs. These initial projects affected the lives of an estimated 4,000 people, providing relief and longer-term support to many who were left homeless and jobless by Hurricane Mitch. From this one team in Honduras, HELP International has grown to work around the world. HELP has grown into a registered 501(c)3 nonprofit organization specializing in four core competencies: (1) public health, (2) education (3) entrepreneurship/business and (4) infrastructure development projects. HELP International develops, executes, and monitors grass-root projects in areas related to public health, health campaigns and outreaches, medical camps, teacher training, literacy, after-school tutoring, orphanage support, at-risk youth programs, gender empowerment, agriculture, business education, income-generating activities, elementary education, and more.

ICF works with U.S. federal agencies and health organizations to support programs that strive to prevent disease and improve health outcomes. ICF’s services in the public health field range from support for basic and clinical research to the diffusion of evidence-based knowledge and practices to health providers and health consumers. We work with researchers, clinicians, policy makers, media outlets, and national and community-based organizations to help keep America healthy. ICF leverages its domain expertise in public health across the spectrum of implementation services to maximize the impact of our client’s programs. The intersection of our health and environment expertise creates strong bioinformatics and scientific computing capabilities. Our health informatics and health communication services derive knowledge and experience from the collaboration of our information technology and strategic marketing experts. We further extend our reach by combining our depth in emergency management to excel in emergency medical preparedness. Our years of service to defense and veterans agencies overlap with our breadth of services in health as evidenced by our medical simulation work.

20 | Johns Hopkins Bloomberg School of Public Health
Ipsos
Zachary Lewis, Vice President
Omar Pedraza, Senior Research Manager
2020 K Street NW
Washington, DC 20006

Ipsos is the third largest global social sciences and market research firm. One of its chief areas of focus is health services research, particularly in the areas of patient experience and patient-reported outcomes. We have a team of psychometricians, statisticians, psychologists, and public health researchers focused on developing instruments that capture patient experiences and health outcomes with accuracy, reliability, and validity. In addition, we use this empirical research to guide data-driven advisory services, helping clients optimize health services programs to improve the health of their stakeholders. Our clientele includes government agencies like the Defense Health Agency, the Veterans Health Administration, and the Centers for Medicare and Medicaid Services, as well as commercial insurers and healthcare providers in the private industry.

Citizenship Requirements: US Citizens, Permanent Residents

An Equal Opportunity/Affirmative Action Employee
The overarching goal of the Cancer Prevention Fellowship Program (CPFP) is to provide a strong foundation for scientists and clinicians to train in the field of cancer prevention and control. As part of the program, we offer training toward an MPH degree at an accredited university during the first year, followed by mentored research with investigators at the NCI. Outstanding opportunities for cutting-edge research in the basic, quantitative, social and behavioral sciences, and in clinical cancer prevention have been the hallmarks of the CPFP since its inception in 1987. Furthermore, a partnership between the NCI and FDA provides opportunities for prevention research in drugs, biologics, and medical devices. Other educational opportunities are provided throughout the fellowship to complement the research training, including the NCI Summer Curriculum in Cancer Prevention; the Molecular Prevention Laboratory; the NCI Cancer Prevention and Control Colloquia Series; and the weekly Fellows’ Research Meeting.

**Citizenship Requirements:** US Citizens, Permanent Residents

The RAND Corporation is a research organization that develops solutions to public policy challenges to help make communities throughout the world safer and more secure, healthier and more prosperous. RAND’s research and analysis address issues that impact people everywhere, including security, health, education, sustainability, growth, and development. Headquartered in Santa Monica, California, RAND has close to 1,800 people from approximately 50 countries working in offices in North America, Europe, and Australia, with annual revenues of more than $308 million. RAND is nonprofit, nonpartisan, and committed to the public interest. Our research is sponsored by government agencies, charitable trusts, and community nonprofits. In addition, we rely on philanthropic support to pursue visionary ideas; address critical problems that are under-researched; shape emerging policy debates; and devise innovative approaches for solving acute, complex, or provocative policy challenges. RAND values objectivity and integrity in both its research processes and internal interactions. We emphasize a collegial environment that respects the contributions and dignity of all staff.

The exclusively online Master of Science and Graduate Certificate in Regulatory Science programs each provide students with the knowledge and skills necessary to contribute to drug and biologics regulation and pharmaceutical product lifecycles. Both programs cover all major areas of drug product and biologics regulatory science, including: • Chemistry, Manufacturing, and Controls (CMC) • Clinical Research • Pharmacovigilance • Phase IV Research (e.g., Pharmacoeconomics) • Drug and Biologics Discovery. The strength of the MS program is its science-driven understanding of drug and biologic product development and regulation. The program covers regulatory affairs in a global manner, including the application of regulatory principles worldwide.

Citizenship Requirements: Interview regardless of status

Five Courses • Part-Time • Two Years

An Online Master of Regulatory Science Program

Interested in gaining the skills and knowledge needed to contribute to drug and biologics regulation and pharmaceutical/biotechnology product lifecycles?

This non-thesis, part-time program for professionals with Bachelor’s degrees requires 30 credits of coursework and is taught online. The program covers all major areas of drug and biological product regulatory science, including:

• Chemistry, Manufacturing, and Controls (CMC)
• Clinical Research
• Pharmacovigilance
• Phase IV Research (e.g., Pharmacoeconomics)
• Drug and Biologics Discovery

Graduates will be prepared for:

• Positions in pharmaceutical companies, as well as device and biotechnology companies
• Positions in health care with knowledge of chemistry/manufacturing/controls (CMC), clinical research, pharmacovigilance, or Phase IV research
• Positions in government agencies such as the FDA, the NIH, DOD, BARDA, and the CDC
• Admission into PhD programs

For more information on the program, visit www.pharmacy.umaryland.edu/regulatoryscience

For more information on the Maryland/FDA collaboration, visit www.cersi.umaryland.edu
The Office of National Drug Control Policy (ONDCP) is a component of the Executive Office of the President responsible for setting and monitoring Federal Government policies regarding efforts to reduce the demand for illicit drugs, prevent the initiation of substance use by young people, combat drug production and trafficking, and reduce drug-related crime, violence, and disease. Each year, the comprehensive response to the drug problem is articulated in the National Drug Control Strategy, which is developed for the President by ONDCP. In addition to its leadership role in developing and coordinating drug control policies, ONDCP also functions as a central organizing body, managing the anti-drug efforts and certifying the drug control budgets of other government agencies.

The ONDCP Unpaid Student Internship Program is structured to challenge and reward a select number of students from across the country. The goal of the program is to allow students to gain an outstanding educational and work experience within various components of ONDCP. The program is intended to provide the students with knowledge, tools, skills, and real-life work experiences which they can readily apply to future challenges and professional pursuits.

Participating students have the opportunity to work in various program areas within ONDCP. The duties often entail assisting in the oversight of program policy, conferences, briefings, and meetings. Students also assist with drafting letters, memorandums, and action documents; assisting with planning travel and conference/convention events; as well as performing research, database development, and other challenging assignments. Students must possess good writing and organizational skills, as well as the ability to accept and accomplish multiple tasks simultaneously.

Students interested in an internship with ONDCP are required to submit a résumé, cover letter, ONDCP application (https://www.whitehouse.gov/sites/whitehouse.gov/files/ondcp/policy-and-research/ONDCPUnpaidStudentInternshipProgramPolicyGuidance.pdf), at least three references, responses to required questions, and a copy of your most recent school transcript.

Session Dates:

Spring Session: Between approximately January 11 - May 5

Summer Session: Between approximately May 1 - August 30

Fall Session: Between approximately September 4 - December 22

To be eligible, applicant must meet the following requirements:

• 18 years of age, or older, at the time of submitting the application;

• currently enrolled in school and

• U.S. citizen.

Please send your completed application to Brooke Kaplan, Human Capital Specialist, at bkaplan@ondcp.eop.gov.

Thank You!

The Career Services Office would like to thank all of our students for attending the 34th Annual Public Health Career Fair. We wish you success in your career search!

We would also like to extend a special THANK YOU to our participating employers in the Public Health Career Fair. We appreciate your continued support to the Johns Hopkins Bloomberg School of Public Health.

Sincerely,
The Career Services Team
