Welcome!

Welcome to the 35th Annual Public Health Career Fair, sponsored by the Career Services Office at the Johns Hopkins Bloomberg School of Public Health.

This handbook has been prepared to assist you in learning about the diverse number of organizations represented at the 2019 Public Health Career Fair. Keep this handbook as a reference guide to utilize throughout the year.

We recommend that you:

› Read each profile to receive a brief overview of an organization’s background, products and services

› Keep your mind open to a variety of opportunities

› Introduce yourself to representatives, shake hands, and thank the representatives for coming to the Career Fair

› Obtain a business card from agency representatives you may want to contact at a later date

› If the division of an organization at the Public Health Career Fair is not the area in which you are interested, talk with the representative and ask for a contact name or referral

› Give each recruiter a copy of your resume and/or business card

› Be enthusiastic and GOOD LUCK!

Remember to stop by the Career Services Office throughout the year for assistance with job search strategies and career planning. You may also visit us online at www.jhsph.edu/careers.
Abt Associates

**Kelley Freeman**, Recruiter
**Samantha Hicks**, Recruiter
6130 Executive Boulevard, Rockville, MD 20852
www.abtassociates.com

Abt Associates is a mission-driven, global leader in research, evaluation and implementing programs in the fields of health, social and environmental policy and international development. Known for its rigorous approach to solving complex challenges, Abt Associates is regularly ranked as one of the top 20 global research firms and one of the top 40 international development innovators. The impact of our work in more than 60 countries is significant and wide ranging. Our global staff of 2,700 conducts innovative studies and implements remarkable projects from carrying out malaria prevention activities in 17 African countries as part of the President's Malaria Initiative and playing a key role in Mexico’s climate change mitigation actions, to identifying potential barriers to flu vaccination among U.S. health workers and pregnant women and examining whether career pathways programs can improve employability in high poverty regions.

Analysis Group, Inc

**Cristi Cavanaugh**, Analyst (Alumna)

**Taiji Wang**, Analyst

111 Huntington Avenue, 14th Floor, Boston, MA 02199

[www.analysisgroup.com](http://www.analysisgroup.com)

Founded in 1981, Analysis Group is one of the largest economics consulting firms, with more than 900 professionals across 14 offices. Analysis Group’s health care experts apply analytical expertise to health economics and outcomes research, clinical research, market access and commercial strategy, health care policy engagements, as well as drug-safety related engagements in epidemiology. Analysis Group’s internal experts, together with its network of affiliated experts from academia, industry and government, provide our clients with exceptional breadth and depth of expertise and end-to-end consulting services globally. Analysis Group draws upon deep expertise in health economics, outcomes research, market access, data science, biostatistics and epidemiology to provide innovative, data-driven strategies for clients in the life sciences industry across all phases of product development and commercialization. Our work helps clients define markets, demonstrate value and inform business decisions throughout product lifecycles. We have a broad range of expertise and collaborate with leading academics in health economics, biostatistics, econometrics, statistics, epidemiology, and psychometrics to offer cutting-edge analyses and analytical tools to address business challenges that require rigorous, evidence-based research. Our client work spans many activities within health economics, comparative effectiveness, and evidence-based medicine, including burden-of-illness studies, assessments of medical treatment patterns, drug safety studies, policy analysis and survey design across a variety of therapeutic areas. We work closely with our clients to provide sophisticated statistical analysis and modeling with various data sources, including administrative claims data, epidemiological surveys, and clinical trial data sets. We also work in collaboration with academics from top universities to develop rigorous analyses as well as new research methods.

**Recruiting for the following positions:** Summer Associate-Healthcare, Associate-Healthcare
The Association of Maternal & Child Health Programs (AMCHP) is a national resource, partner and advocate for state public health leaders and others working to improve the health of women, children, youth and families, including those with special health care needs. AMCHP’s members come from the highest levels of state government and include directors of maternal and child health programs, directors of programs for children with special health care needs and other public health leaders who work with and support state maternal and child health programs. Our members directly serve all women and children nationwide, and strive to improve the health of all women, infants, children and adolescents, including those with special health care needs, by administering critical public health education and screening services, and coordinating preventive, primary and specialty care. Our membership also includes academic, advocacy and community-based family health professionals, as well as families themselves. AMCHP builds successful programs by disseminating best practices; advocating on our member’s behalf in Washington; providing technical assistance; convening leaders to share experiences and ideas; and advising states about involving partners to reach our common goal of healthy children, healthy families and healthy communities.

Recruiting for the following positions: Program Manager, Women’s Health; Program Manager, Infant Health; Communications Coordinator

A society where healthy children and healthy families are living in healthy communities.

Together, it is possible.
Whether you’ve just started your career or you have 25 years of experience, we’re your professional organization. We’re here for you.

**Arjun Vignesh**, Associate (Alumnus)  
450 7th Avenue, Manhattan, New York City, NY 10123  
www.blueprintrg.com

BluePrint Research Group is a global marketing research consultancy founded in 2008. We partner with global pharma decision makers to shape and inform go-to market strategy for the industry’s emerging innovative products, impacting and improving global health and wellness. Our blend of manufacturing and commercial side experience, as well as diversity of academic backgrounds, offers a unique perspective and allows us to develop customized deliverables to meet the needs of a diverse array of internal stakeholders. Our clients describe the work we do at BluePrint as profoundly strategic, providing highly actionable insights and recommendations and bringing singular clarity to complex situations. We take pride in our talented consulting teams across our four offices in Princeton, New York, San Francisco, and London. Over the past 10 years, we have built our firm to 80+ employees, partnering with 40+ biopharmaceutical clients per year. In 2018, we are celebrated 10 years of double-digit revenue growth each year since inception, driven by the quality of our product and engagement. At BluePrint, innovation has always been a core value within our organization. Through our innovation lab and companywide initiatives, we are continuing to expand our suite of products and services that enable us to deepen and broaden our impact with clients in informing commercial strategy, while also diversifying the learning and experience of our employees. Finally, we are committed to finding top talent to join our growing team. BluePrint team members find a culture that is reflective of a meritocracy, which shapes and customizes professional opportunities for each individual, and rewards and recognition are directly consistent with contribution.

**Recruiting for the following positions:** Associates/Senior Associates

**Recruiting for the following positions:** Data Analyst II; Business Analyst II
Based in Baltimore, Maryland, The Center for Medical Technology Policy (CMTP) is an independent, non-profit 501(c) (3) organization working to strengthen the quality, relevance and efficiency of clinical research. Founded by Sean Tunis, MD, MSc, former Chief Medical Officer for CMS, and led by Donna Messner, PhD, CMTP staff are leaders in comparative effectiveness research (CER) and patient center outcomes research (PCOR). CMTP focuses on CER standards, research infrastructure and policy and envisions a health care system where patients, clinicians and those who pay for health care have the high quality, evidence-based information they need to make the best possible decisions. Together we ask: What are the most important research questions to address, and what are the best methods to answer those questions?
Centers for Disease Control and Prevention (CDC)

Artensie Flowers, Senior Public Health Advisor  
Sarah Head, Epidemic Intelligence Service (EIS) Officer  
Monique Duwell, Epidemic Intelligence Service (EIS) Officer  
1600 Clifton Rd NE, Atlanta, GA 30329  
www.cdc.gov

Centers for Disease Control and Prevention (CDC) works 24/7 to protect America from health, safety and security threats, both foreign and in the U.S. Whether diseases start at home or abroad, are chronic or acute, curable or preventable, human error or deliberate attack, CDC fights disease and supports communities and citizens to do the same. CDC increases the health security of our nation. As the nation’s health protection agency, CDC saves lives and protects people from health threats. To accomplish our mission, CDC conducts critical science and provides health information that protects our nation against expensive and dangerous health threats, and responds when these arise.

Recruiting for the following positions: Public Health Analyst; Grants Management Specialist

Centers for Disease Control and Prevention (CDC) - National Center for Health Statistics

Yataka Aoki, Service Fellow  
Marquetta Bibbs, Program Specialist  
3311 Toledo Road, Hyattsville, MD 20782  
www.cdc.gov/nchs

The National Center for Health Statistics (NCHS) is looking for Epidemiologists, Health Scientists, Statisticians, Social Scientists and Computer Scientists. NCHS is located in Hyattsville, MD, within one hour drive from Baltimore. The mission of NCHS is to compile accurate, relevant, and timely statistical information to guide actions and policies that improve the health of the American people. The work may include survey design and sampling, analysis of statistical data from complex surveys, small-area estimation, life-table analysis, combining information from multiple data sources, quality control, statistical disclosure limitation and confidentiality, handling missing data, questionnaire design and statistical computing. These positions typically require knowledge and experience in statistical software packages such as Stata, SAS, SPSS or R. CDC/NCHS is an equal opportunity employer. Qualified applicants will receive consideration without regard to race, creed, color, age, sex, national origin, physical or mental disability, or sexual orientation.
Centers for Medicare and Medicaid Services
Valentina Alarcon, Management Analyst
Keri Apostle, Lead Social Science Research Analyst
Christiena Mosley, Management Analyst - Strategic Recruitment
Teresa Moton, Health Insurance Specialist
Jennifer Stolbach, Deputy Director of State Marketplace & Insurance Programs
7500 Security Boulevard, Baltimore, MD 21244
www.cms.gov/CareersatCMS

The Centers for Medicare and Medicaid Services (CMS), a federal agency within the Department of Health and Human Services, runs the Medicare and Medicaid programs - two national health care programs that benefit over 100 million Americans. Join the team that helps ensure health care security for millions of Americans!

CMS works in partnership with the entire health care community to improve quality and efficiency in an evolving health care system and provides leadership in the broader health care marketplace. Our effectiveness depends on the capabilities of a dedicated, professional staff that is committed to supporting these objectives.

Recruiting for the following positions: Health Insurance Specialist; Social Science Research Analyst; Management/Program Analyst

Clinton Health Access Initiative – NOT ATTENDING.
See note below.
Sydney Leroy, Manager, Talent Acquisition and Outreach
383 Dorchester Ave., Suite 400, Boston, MA 02127
www.clintonhealthaccess.org

The Clinton Health Access Initiative, Inc. (CHAI) was founded in 2002 with a transformational goal: help save the lives of millions of people living with HIV/AIDS in the developing world by dramatically scaling up antiretroviral treatment. CHAI’s focus is transformational work that creates a fundamental change in the way actors approach and realize goals. To do this, the degree of impact of a CHAI program must be dramatic, the scale must be at the national or global level, the breadth must change the way others approach the problem and the sustainability must allow for CHAI’s eventual exit without erosion of impact. Today, CHAI operates in 36 countries across the developing world and more than 70 countries are able to access CHAI-negotiated price reductions, vaccines, medical devices and diagnostics. CHAI’s main program areas include Health Financing, Malaria, Health Workforce Planning, Vaccines, Family Planning, Cancer, TB, Hepatitis C, Laboratory Services, Applied Analytics and Essential Medicines.

Recruiting for the following positions: Country Manager, Haiti; Senior Associate, Vaccines; Associate, HIV Access Program

NOTE: The representative for CHAI could not attend the fair. CHAI will be holding an employer information session on Thursday, March 7 in W4030 from 12:15 – 1:15 pm. Log in to Handshake to RSVP.
crankfrog
Alissa Lash, Vice President
Kelsey Siwek, Consultant
1875 K Street NW, Washington DC 20006
crankfrog.com

crankfrog has been helping healthcare clients execute strategic business and technology initiatives since 2011. We are a Washington, DC-based boutique management consulting firm with deep expertise streamlining operations and optimizing opportunities. We help our clients build towards a consumer-friendly and highly functional healthcare system by navigating new delivery models that are changing the way payers and providers work, simplifying administrative activities to do more with less, and using technology as a means to enable innovation.

Recruiting for the following positions: Senior Consultant

Dexis Consulting Group
Yavuz Inanli, International Recruitment Manager
Alexis Romero, International Recruiter
1412 Eye Street NW, Washington, DC 20005
www.dexisonline.com

Since 2001, Dexis has provided innovative management solutions for a secure and prosperous world. In the last three years alone, Dexis has worked in 90 countries supporting critical missions of agencies in the global development and security assistance space. With triple digit growth in recent years, Dexis was ranked in the top 10 consulting firms by funding at the US Agency for International Development in FY16 and FY17. Dexis was also among the highest rated employers on Glassdoor, where many of its 250-plus employees cited a people-centered leadership and culture as the main drivers to its success. Dexis headquarters are located in downtown Washington, D.C.

Dex is on a mission to help solve today’s most pressing global political, social, and economic challenges and create a world where all people are safe and prosperous. To promote stability, resilience, and prosperity we target five sectors: security sector assistance, conflict mitigation and stabilization, governance, agriculture and economic growth, and global health.

Evidera
Julia McCormack, Director
Jennifer Russum, Global Recruiter
Weicheng Ye, Research Associate
7101 Wisconsin Avenue Suite 1400, Bethesda, MD 20814
www.evidera.com

Evidera is a business unit within Pharmaceutical Product Development, LLC, (PPD) a leading global contract research organization (CRO), and is the preeminent provider of evidence-based solutions to demonstrate the real-world effectiveness, safety, and value of biopharmaceutical and biotechnology products from early development through loss of exclusivity. We provide integrated scientific expertise and global operational capabilities to help you generate the evidence needed to optimize the market access and commercial potential of your products. Evidera was acquired by PPD in 2016 and originally created in 2013 as an independent company under the ownership of Symphony Technology Group following the acquisition of long-standing health economics, outcomes research, market access, epidemiology, and data analytics practices from United BioSource Corporation (UBC). Evidera has over 30 years of leadership and experience and its legacy brands include MEDTAP, Caro Research, Abt Bio-Pharmaceutical Solutions, MetaWorks, Total Healthcare Group and Archimedes.

Recruiting for the following positions: Research Associate; Data Analyst; Statistician; Medical Writers; Consultants
The FDA Center for Tobacco Products (CTP) is responsible for carrying out the Family Smoking Prevention and Tobacco Control Act, which Congress passed in 2009. This law—commonly called the Tobacco Control Act—gives us broad authority to regulate the manufacturing, distribution and marketing of tobacco products. Our goal is to reduce the harm from all regulated tobacco products across the entire population, including: reducing the number of people who start to use tobacco products, encouraging more people to stop using these products and reducing the adverse health impact for those who continue to use these products.

FDA’s unique position as a regulatory agency allows for a framework of decision-making based on – and within the limits of – both the science and the law. CTP uses a comprehensive approach as the best way to end the negative health effects of tobacco use. This includes defining policy, issuing regulations, conducting research, educating Americans on regulated tobacco products and making decisions on whether new products and claims can be marketed—including reviewing and evaluating applications and claims before the products are allowed on the market. This cohesive, comprehensive approach can help us reach our goals of preventing people from starting to use tobacco products, encouraging tobacco users to quit and reducing the harm caused by tobacco use. As we work to protect the public’s health, we will use the full power of the law to protect consumers from the dangers of tobacco use.

www.healthcore.com

HealthCore, based in Wilmington, Del., is the clinical outcomes research subsidiary of Anthem, Inc. HealthCore has a team of highly experienced researchers including epidemiologists, biostatisticians, physicians, pharmacists, health economists and other scientists who study the “real world” safety and effectiveness of drugs, medical devices and care management interventions. HealthCore offers insight on how to best use this data and communicates these findings to health care decision-makers to support evidence-based medicine, product development decisions, safety monitoring, coverage decisions, process improvement and overall cost-effective health care.

IntraHealth International
Ashima Khanna, Proposal Recruiter, Alumna
Julie Smallwood, Senior Proposal Recruiter
6340 Quadrangle Dr #200, Chapel Hill, NC 27517
www.intrahealth.org

At IntraHealth, we’re a global team of creative, committed humanitarians on a mission. We believe everyone everywhere should have the health care they need to thrive. That’s why we work every day to improve the performance of health workers around the world and strengthen the systems in which they work. We’ve worked in over 100 countries since 1979. And we’re partnering with new ones every year. Our programs build lasting relationships and strong capabilities wherever we work.

Ipsos
Zachary Lewis, Vice President
Omar Pedraza, Senior Research Manager
1271 Avenue of the Americas, 15th Floor, New York, NY 10020
www.ipsos.com/en-us

Ipsos is the third largest global social sciences and market research firm. One of its chief areas of focus is health services research, particularly in the areas of patient experience and patient-reported outcomes. We have a team of psychometricians, statisticians, psychologists and public health researchers focused on developing instruments that capture patient experiences and health outcomes with accuracy, reliability and validity.

In addition, we use this empirical research to guide data-driven advisory services, helping clients optimize health services programs to improve the health of their stakeholders. Our clientele includes government agencies like the Defense Health Agency, the Veterans Health Administration, and the Centers for Medicare and Medicaid Services, as well as insurers and healthcare providers in the private industry.

Ipsos Public Affairs

Ipsos Public Affairs is looking for health care graduates and professionals to join our expanding analytics and advisory team, with offices in Chicago and DC. The individuals will play a role in pushing our expertise in patient experience and expanding our presence in health quality and outcomes research.

We are looking for candidates for the following positions:

- Research Analyst
- Senior Research Analyst
- Research Scientist
- Quality Improvement Researcher

Please contact Zachary Lewis for more information on opportunities with Ipsos Public Affairs

Jai Medical Systems Managed Care Organization, Inc. was founded in 1997 and serves a diverse population of children and adults throughout the State of Maryland. Since our founding, Jai Medical Systems’ mission has been to provide high quality healthcare benefits and services to the people of Maryland. We continue this tradition of quality and excellence by working with our members to help identify their healthcare needs, while remaining an active and positive presence within our communities. Throughout our history of service, Jai Medical Systems has been consistently ranked by the State of Maryland as one of the highest rated Managed Care Organizations for quality. Jai Medical Systems’ commitment to our members and high quality healthcare is demonstrated by our performance in health insurance quality measures, such as HEDIS®. In fact, our HEDIS® scores for key healthcare quality indicators such as Well Child Checks, Cervical Cancer Screenings, and Diabetes Care are among some of the highest HEDIS® scores in the nation. Currently, Jai Medical Systems is one of the highest rated Medicaid Health Plan in the United States for 2018-2019, according to the National Committee for Quality Assurance. In addition, our plan has an Accreditation status of Excellent from the National Committee for Quality Assurance.
Jhpiego
Barbara Norton-Gill, Director, Talent Acquisition & Compensation
Jean Sack, Public Health Informationist (Alumna)
1615 Thames Street, Baltimore, MD 21231
www.jhpiego.org

Jhpiego is an international, non-profit health organization affiliated with The Johns Hopkins University. For 40 years and in over 155 countries, Jhpiego has worked to prevent the needless deaths of women and their families. Jhpiego works with health experts, governments and community leaders to provide high-quality health care for their people. Jhpiego develops strategies to help countries care for themselves by training competent health care workers, strengthening health systems and improving delivery of care. Jhpiego designs innovative, effective and low-cost health care solutions to ensure a level of care for women and their families. These practical, evidence-based interventions are breaking down barriers to high-quality health care for the world’s most vulnerable populations.

3130 Fairview Park Drive, Falls Church, VA 22042
www.lewin.com

The Lewin Group (Lewin) is a health care consulting firm. We support our clients with policy research and data analysis on Medicare, Medicaid and CHIP, health care financing, strategic workforce planning, health program evaluation, comparative effectiveness research and other important areas of the public health policy arena. We evaluate health reform options using data-driven financial modeling. Lewin is a human services consulting firm. We provide technical assistance and support to develop and improve children and family programs like Head Start, Assets for Independence, and the delivery and financing for many important human services policy programs nationwide. Lewin has nearly 50 years of experience in Medicare, Medicaid, health care reform, policy research, evidence-based medicine and human services programs.

**Recruiting for the following positions:** Research Consultant; Sr. Research Analyst
Maryland Department of Health
Sandi English, Deputy Chief, Recruitment and Selection
Wendi Lott, HR Officer
201 W Preston Street, Baltimore, MD 21201
www.health.maryland.gov

Maryland’s health care delivery system consists of public and private hospitals, nursing homes, outpatient clinics, home health care services, hospices, providers and health educators, among others. As a public health department, our goal is to improve the health status of every Maryland resident and to ensure access to quality health care. We are responsible for helping each person live a life free from the threat of communicable diseases, tainted foods, and dangerous products. To assist in our mission, we regulate health care providers, facilities, and organizations and manage direct services to patients, where appropriate. The Maryland Department of Health (MDH) has four major divisions - Public Health Services, Behavioral Health, Developmental Disabilities and Health Care Financing. In addition, the department has 20 boards that license and regulate health care professionals; and various commissions that issue grants, and research and make recommendations on issues that affect Maryland’s health care delivery system. We depend on a staff of more than 6,500 and a budget of more than $12 billion to provide needed services to Maryland communities. Our Public Health Services Division oversees vital public services to Maryland residents including infectious disease and environmental health concerns, family health services and emergency preparedness and response activities. The Behavioral Health Division promotes recovery, resiliency, health, and wellness for individuals who have emotional, substance use, addictive and/or psychiatric disorders. The Developmental Disabilities Administration provides a coordinated service delivery system to ensure appropriate services for individuals with developmental and intellectual disabilities. The Health Care Financing Division implements the Medicaid program, which features the department’s HealthChoice and Children’s Health Programs along with other initiatives, including those that help people with the cost of prescription medications.

**Recruiting for the following positions:** Epidemiologist; Public Health Laboratory Scientist; Health Policy Analyst; Community Health Nurse; Registered Nurse; Coordinator Special Programs; Community Health Educator; Psychiatrist; Physician; Social Worker; Environmental Health Specialist/Sanitarian
The MITRE Corporation

An Equal Opportunity/Affirmative Action Employee
National Environmental Health Association (NEHA) currently serves 5,000 members to advance the environmental health and protection professional for the purpose of providing a healthful environment for all. Professionals who earn a Registered Environmental Health Specialist/Registered Sanitarian credential from NEHA are recognized as having achieved an established standard of excellence. These environmental health professionals master a body of knowledge (which is verified by examination), and acquire sufficient experience to satisfactorily perform work responsibilities in the environmental health field. In addition to maintaining high standards of practice and testing for its credentialing programs, NEHA provides training and resources for continuing education through online courses and an online bookstore; holds an annual conference; fosters networking and career growth; and publishes the widely-respected peer-reviewed Journal of Environmental Health. NEHA is governed by a 14-member board of directors and benefits from various committees and technical advisors who serve as subject matter experts. NEHA employs approximately 30 paid professionals dedicated to providing quality programs to the NEHA Membership. NEHA’s Origin: The National Environmental Health Association (NEHA) had its origins in the state of California where it was incorporated in 1937. The original impetus behind the creation of a national professional society for environmental health practitioners was the desire by professionals of that day to establish a standard of excellence for this developing profession. This standard, which has come to be known as the Registered Environmental Health Specialist or Registered Sanitarian credential, signifies that an environmental health professional has mastered a body of knowledge (which is verified through the passing of an examination), and has acquired sufficient experience, to satisfactorily perform work responsibilities in the environmental health field.

ENVIRONMENTAL HEALTH
It’s a tough job.
That’s why you love it.

NEHA is the voice of environmental health. Currently serving 5,500 members, NEHA empowers and educates public health professionals, providing them the tools and resources they need to create a healthful environment for all.

Join NEHA today for a chance to engage in environmental health career coaching, internship and leadership opportunities, and peer-to-peer engagement.

National Institute of Allergy and Infectious Diseases
Frances Garcia, Workforce Management Specialist
5601 Fishers Lane, Rockville, MD 2085
www.niaid.nih.gov

The National Institute of Allergy and Infectious Diseases (NIAID) conducts and supports basic and applied research to better understand, treat and ultimately prevent infectious, immunologic and allergic diseases. For more than 60 years, NIAID research has led to new therapies, vaccines, diagnostic tests and other technologies that have improved the health of millions of people in the United States and around the world. NIAID is one of the 27 Institutes and Centers of the National Institutes of Health (NIH).

National Institutes of Health - Cancer Prevention Fellowship Program
Aili Evert, Fellowship Program Analyst
9000 Rockville Pike, Bethesda, MD 20814
www.jobs.nih.gov

The Cancer Prevention Fellowship Program (CPFP) at the National Cancer Institute/NIH is a multidisciplinary postdoctoral program. Cutting-edge research opportunities for Cancer Prevention Fellows reflect the broad origins and applications of many biomedical sciences relevant to public health and clinical medicine. The prestigious program offers opportunities for basic science laboratory studies, epidemiologic studies, intervention trials, health services research and studies of the biological and social aspects of health behavior. Program components of the Fellowship include scientific symposia, Fellow-presented research meetings, monthly Fellow-hosted colloquia, grants, leadership and presentation skills workshops, field experiences and world class joint trainings with the FDA. Fellows have the opportunity to select their own preceptors and develop and lead research activities based on their own interests. CPFP alumni across the country are taking the lead at cancer centers, universities, government agencies, research firms and policy organizations, and in clinical practice. Among the CPFP’s many benefits are competitive stipends, relocation expenses, health insurance, training & travel allowances, the opportunity to earn a CPFP-sponsored MPH, etc.

Mac Chatham, Senior Recruitment & Talent Management Officer
Thea Kayne, Global Recruitment Director
1111 19th Street, NW Suite 700 Washington, DC 20036
www.r4d.org

Results for Development (R4D) is a leading non-profit global development partner. We collaborate with change agents around the world — government officials, civil society leaders and social innovators — to create strong systems that support healthy, educated people. We help our partners move from knowing their goal to knowing how to reach it. We combine global expertise in health, education and nutrition with analytic rigor, practical support for decision-making and implementation and access to peer problem-solving networks. Together with our partners, we build self-sustaining systems that serve everyone and deliver lasting results. Then we share what we learn so others can achieve results for development, too. We have a unique and vibrant culture at R4D and we want to keep it that way. Diversity, equity and inclusion are at the heart of our work environment and help advance our mission. Diversity—of ideas, identities, perspectives and backgrounds—is vital to who we are and what we do. We seek people who embrace these values and will help reinforce them. Our work culture is collaborative, creative and entrepreneurial. We operate based on trust and respect and actively avoid silo thinking, turf politics and negativity.

Total Child Health Inc.

**Kerry Bet**, Research Coordinator  
**Lydia Stewart**, Research Associate (Alumnus)
6017 Altamont Place, Baltimore, MD 21210  
www.chadis.com

The mission of Total Child Health, Inc. (TCH) is to provide products and services that improve the mental and physical health of children. In particular, the company focuses on the development and distribution of a web-based platform called CHADIS (Child Health and Development Interactive System). While TCH focuses on providing technology-based tools and services to clinicians, the Center has provided much of the research-based findings that constitute the backbone to the technology developed by TCH. TCH has been a recipient of twelve of NIH and CDC Small Business Research Innovation awards. Together with the Center, CHADIS has received more than $12 million in federal and Foundation grants for research and development of the current system. The true driver for the company’s success and the need for further development of its products and services are the desires of all parents to seek the very best for their children.

For over 40 years, the Center for Vaccine Development and Global Health (CVD) at the University of Maryland School of Medicine in Baltimore, MD has worked domestically and internationally to develop, test and deploy vaccines to aid the world’s underserved populations. Our research, surveillance and vaccine development focus on four key areas: Enteric Diseases, Malaria, Influenza and Respiratory Diseases and Emerging Pathogens. Our faculty and staff are experts in the field of global health and vaccinology and are dedicated to improving global health by conducting innovative, world-leading research in Baltimore and around the world. Our key mission is to harness the power of vaccines to prevent disease and save lives in the most vulnerable populations. The CVD is an academic enterprise engaged in the full range of infectious disease intervention from basic laboratory research through vaccine development, pre-clinical and clinical evaluation, large-scale pre-licensure field studies, and post-licensure assessments. Since 1974, our faculty have worked nationally and internationally to prevent diseases and save lives. The CVD’s work has expanded beyond vaccine development to the broader goal of improving global health by conducting innovative, leading research and developing new and improved ways to diagnose, prevent, treat, control, and eradicate diseases of global impact. Currently, these diseases include malaria, typhoid, Shigella and vaccine-preventable infectious diseases such as measles. Members of our faculty have been involved in critical vaccine development for emerging pathogens such as Zika and Ebola. In addition, our work focuses on the ever-growing challenge of anti-microbial resistance. Our researchers are uncovering ways to address the immune response to drug-resistant infections.

UMB is Maryland’s only public health, law and human services university. Six professional schools and a Graduate School train the majority of the state’s physicians, graduate nurses, dentists, lawyers, social workers, and pharmacists. Under the leadership of President Jay A. Perman, MD, the University is a leading partner in the redevelopment of Baltimore’s Westside. The University of Maryland BioPark, which opened in October 2005, promotes collaborative research opportunities and bioscience innovation. Sponsored research totaled $500.9 million in Fiscal Year 2014. With 6,276 students and 7,375 faculty members and staff, the University is an economic engine that returns more than $15 in economic activity for every $1 of state general funds appropriation. The University community gives more than 2 million hours a year in service to the public.

U.S. NAVY
Chief Hospital Corpsman Mabinty Chapman
Lieutenant Rommel Rabulan
700 Robbins Street, Philadelphia, PA 19111

Navy Medicine operates hospitals and other health care facilities as well as laboratories for biomedical research, and trains and manages the Navy’s many staff corps related to medicine. Navy Medicine has 63,000 medical personnel and more than a million eligible beneficiaries.

Recruiting for the following positions: Health Care Administration; Environmental Health

Two Courses • Part-Time • One Year
An Online Graduate Certificate in Regulatory Science Program

Interested in gaining the skills and knowledge needed to contribute to drug and biologics regulation?

This part-time program for professionals with Bachelor’s degrees requires 12 credits of coursework and is taught online. The program covers all major areas of drug and biological product regulatory science, including:
- Chemistry, Manufacturing, and Controls (CMC)
- Clinical Research
- Pharmacovigilance
- Phase IV Research (e.g., Pharmacoepidemiology)
- Drug and Biologics Discovery

Graduates will be prepared for:
- Positions in pharmaceutical companies, as well as device and biotechnology companies
- Positions in health care with knowledge of chemistry/manufacturing/controls (CMC), clinical research, pharmacovigilance, or Phase IV research
- Positions in government agencies such as the FDA, the NIH, DOD, BARDA, and the CDC
- Admission into Master’s programs

No GRE Required.
