How to Apply for Fellowships & Internships

Connecting students to global careers!

Paul Hutchinson
Asst. Director, Career Services
phutchin@jhsph.edu
2017 E. Monument St.
410-955-3034
Key Characteristics

Fellowships
- Paid
- Equal to entry-level positions
- Can be 1-2 yrs.
- Exposure to different areas
- On-the-job interviewing
- Mentorship

Internships
- Unpaid
- Working on an as needed basis
- Can range from 3-12 mo.
- May be limited one area
- On-the-job interviewing
- Administrative tasks
How Do Students Benefit from Fellowships & Internships?

You can...

- **turn theory into practice**
  - Apply your classroom knowledge to the “real-world”

- **develop your career**
  - Explore your field of interest to see what you like & what you don’t like

- **gain valuable experience to help you get full-time job**
Tips for Applying to Fellowships

➢ Start early
➢ Draft your personal statement
➢ Consult the experts
➢ Always keep a look out
Every fellowship has its own application form. However, fellowship selection committees generally ask for:

- a transcript and extracurricular record
- two or more letters of recommendation
- a personal statement

For more competitive fellowships/scholarships, you may also be asked for a project proposal or plan of study or an interview.

*Tip: Since many fellowships require letters of recommendation from faculty and others, be considerate to give them time to write up a strong support letter!*
Applications

- The application is the first element that most organizations review when candidates apply.
- Therefore, you should give careful consideration to the application and always complete it properly & thoroughly.
- Consider the deadline date and send the application well in advance - WHY???
  - When organizations review applications as they arrive, your application will get more consideration earlier in the process instead of closer to the deadline when everyone else is sending their application.
Follow the Instructions

- Most applications have explicit instructions to follow and, while these might seem futile to you, these are crucial to the organization.

- Organizations are expecting to receive applications in a certain way, with proper information listed in the way they want it.

- Some organizations throw away applications that are not in accordance with their application instructions.
Personal Statement

- A personal statement is central to many applications. For some, it may be all that you submit.
- The statement is a way for the organization to review your interests and to determine your motivation for applying.
- The personal statement is also the organization’s first look at your writing skills, and should be written with excellent grammar, clarity, and spelling.
- The first draft is the hardest, so start now.
Generally, personal statements include:

1. Reasons for applying
2. Qualifications
3. Areas of Interest
4. What you bring to the fellowship
5. Long-term & short-term career goals
How to get started

- Write down two or three experiences you feel have shaped who you are
- Write down two or three significant problems you have faced and how you solved them
- Then look for patterns:
  - what values keep popping up?
  - what interests?
  - what strengths and skills?
Selection Committees

Fellowship selection committees are looking for students who...

- spend their time purposefully, creatively, and energetically, not students who do things "just to build a resume".

- Your list of activities should show that you are more than "just a bookworm," and that you have varied interests

- Positions of leadership in one or more groups or a clear commitment to a single cause or activity will add weight to your application

- Honors and awards, publications, and research offer clear evidence of your intellectual energy and talent, and will make your application stand out.
What are fellowship committees looking for?

Since a selection committee may read hundreds of application essays back-to-back in a short period of time, you want to be sure your statement..

- Makes sense—logically & grammatically
- Grabs their attention
- Provides substantive and relevant information
- Explain how the fellowship will help you in the future
How do I find an internship?

- Information on program email list-servs
- Suggestions from your faculty advisor or other faculty
- Your own contacts – develop your own idea!
- Conduct informational interviews
- Solicit your services for FREE!!!!
Important things to remember

Resume should highlight how academic training (plus relevant experience) is preparing you for this type of work

**EDUCATION**

**Master of Science in Public Health**, GPA: 3.97/4.0
Johns Hopkins Bloomberg School of Public Health (JHSPH), Baltimore, MD
**Concentration (Track):** Global Disease Epidemiology and Control
**Relevant Coursework (to be completed by May 2012):** 3 terms of Epidemiologic Methods, 4 terms of Biostatistics, Introduction to International Health, Infectious Disease Epidemiology, Global Disease Control Programs and Policies,

**Certificate in Vaccine Science and Policy**
Johns Hopkins Bloomberg School of Public Health, Baltimore, MD

**Bachelor of Arts in Biology**, GPA: 3.7/4.0
Widmore College, Widmore, IL
**Honors:** Phi Beta Kappa, Widmore Scholar (4-year merit scholarship)

Expected May 2013
Expected May 2012
May 2010
Networking – How it can help

• Calling or meeting people from the organization can increase your chances of being accepted to the fellowship/internship program

  *Remember most people want to hire someone with whom they are familiar*

• Sometimes, networking is not WHAT you know, but...

  **WHO you know**

• Having a strong reference is an excellent way to increase the opportunity of being accepted to a fellowship/internship program

• For example, if your advisor is well known, a call from him/her to the organization may work wonders
How to prepare for networking...

• By knowing yourself
• Questions to think about?
  • What is my career trajectory?
  • Where do I see myself headed?
  • Where did I come from?
Internship Resources

Where to find internships???
• Job websites
  • Don’t wait for an internship to be posted, approach prospective employers directly
  • Identify potential employers using directories and databases, word of mouth, and inquire about possibilities for an internship

How to fund an internship???
• The funding sources for internships can vary from organization to organization
  • Some are scholarships & grants
  • Amounts can range from monthly to yearly stipends; hourly rates; per semester; or none at all

• Where can you look for $$$ for an unpaid internship?
  • JHSPH Student Funding Resources
    • http://www.jhsph.edu/SFR/faq.html
  • Federal Government
    • http://www.students.gov/STUGOVWebApp/Public/

FELLOWSHIPS: BECOME A GHFP FELLOW

GHFP fellows work in a variety of global health technical areas ranging from maternal and child health to nutrition to HIV/AIDS. Each fellow has a specific scope of work and placement site within USAID or one of its partners. GHFP fellows work full-time for two years with the possibility of extending their fellowships for an additional two years. During their placements, fellows gain valuable experience and expertise in global health development. Placements are made both in Washington, DC and in developing countries. Through these placements, fellows perform a wide range of duties in support of USAID health teams and their partners around the world, such as:

- Providing technical guidance, writing content and making recommendations to USAID on project design in preparation for procurement activities
- Planning and conducting evaluations of project activities
- Participating in strategic planning and in technical review of work plans and proposals
- Traveling to the field to provide on-the-ground technical assistance
- Providing technical guidance to implementing partners in developing project activities, evaluation and monitoring plans and work plans
- Organizing and facilitating project, activity and technical meetings and teams
- Attending meetings to discuss USAID’s health program’s goals, policies, and implementation activities
- Monitoring key elements of project activities
- Preparing project documentation including evaluations, major reports, and contributing to audits
- Identifying technical assistance needs and developing plans for providing consultation and assistance
- Monitoring, analyzing and reporting on trends and developments in the global health field
- Providing management support and advice to USAID and project staff
- Participating as a member of technical working groups and cross-Agency technical committees and groups

Fellows enjoy working relationships with global health professionals involved in state-of-the-art technical work with USAID, governmental, non-governmental and faith-based organizations.

Efforts to increase and sustain diversity are woven throughout the GHFP with a multi-layered approach to address the key issues of representation, retention and promotion of individuals from
INTERNSHIPS: INTERNSHIPS IN WASHINGTON, DC AND KAMPALA, UGANDA FOR SUMMER 2011

Introduction
The Global Health Fellows Program will have a number of exciting internships in summer 2011. These positions will be located in USAID’s Global Health Bureau in Washington, DC and with NGOs in Uganda.

For these positions, GHFP is interested in individuals from a broad range of disciplines, including:

- Public health
- Social work
- Education
- International relations/development
- Commodity security and logistics
- Medicine
- Nursing/midwifery
- Public policy
- Pharmacy
- Business administration
- Law

Where Interns Will Work

USAID/Washington
The positions offer the opportunity to gain practical experience by working closely with global health professionals on vital projects that impact lives in the developing world. Positions are in one of the Global Health Bureau offices:

- Office of the Assistant Administrator
- Office of Health, Infectious Diseases and Nutrition
- Office of HIV/AIDS
- Office of Population and Reproductive Health

What is USAID?
An independent federal government agency, USAID receives overall foreign policy guidance from the US Secretary of State. The Agency supports long-term and equitable economic growth and advances US foreign policy objectives by supporting economic growth, agriculture and trade; global
Deadline: 1st week of Dec.
Info. Session: Nov. 9, 2011

International Development Fellows Program (IDFP)

The International Development Fellows Program Application for the 2011-2012 cycle is now closed. Please review the information available on this website and return in September 2011 to access the 2012-2013 application.

Catholic Relief Services’ International Development Fellows Program (IDFP) gives people who are interested in a career in international relief and development an opportunity to increase their overseas experience and gain exposure to our programs. Each year, CRS places approximately 25 Fellows with our country programs overseas. Assignments are for one year, typically starting at the end of July.

Specific job responsibilities vary greatly from one country to another depending on the country program’s focus (Agriculture, Health, Peacebuilding, Education, Microfinance, social assistance or a combination of these). The goal of the IDFP is to place Fellows in positions where they can draw on their previous education and work experience, while broadening their skills. Many of our fellowships lead to regular positions with Catholic Relief Services.

How to Apply
All interested candidates must apply on-line. CRS will conduct phone interviews with qualified candidates. Please note we will also be testing language ability based on your stated level in your application in a phone language assessment. CRS will visit universities this year primarily to provide information about the program and to answer questions. For a schedule of universities we will be visiting this year, please click on the link below.

For a schedule of universities we will visit this year, please see schedule of university visits.

International Development Fellows Program Video

For frequently asked questions about the International Development Fellows Program, please see Frequently Asked Questions (FAQ) page.

Important Dates in the 2011-2012 IDFP Application Cycle:
September 2010
Internships

Objective

Internships offer a small group of outstanding graduate-level students the opportunity to acquire direct exposure to UNDP’s work. They are designed to complement development-oriented studies with practical experience in various aspects of multilateral technical cooperation, but also complements other international studies, including law.

Description

Internships can take place in a UNDP country office/ regional center or at the organization’s Headquarters in New York. Assignments vary greatly in terms of content. Every attempt is made to match the interests of the intern with the needs of the organization.

Internship assignments vary in length according to the availability and academic requirements of the intern, as well as the needs of UNDP. Assignments are available on a part-time and full-time basis throughout the year.

Qualifications

Interns are selected on a competitive basis. The following minimum qualifications are required:

- Enrollment in a graduate-level degree programme in a development related field such as economics, public or business administration, or environmental studies.
- Only those students who will return to their studies upon completion of their internship assignments are eligible.
- Demonstrated interest in the field of development.
- Language skills: written and spoken proficiency in at least one, and preferably two of the three working languages used by UNDP: English, French and Spanish. Fluency in Arabic, Portuguese, Russian or Eastern European language is an asset.
- An interest in global mobility; adaptability to varied physical and other environments; a desire to work with and gain the confidence and respect of people with different language, national and cultural backgrounds.
- Respect for the principles of the United Nations Charter and the UNDP Statement of Purpose.

Financial Issues

UNDP does not pay for internships. The costs associated with the latter must be borne by the nominating institution, related institution or government, which may provide the required financial assistance to its students; or by the student, who will have to obtain financing for subsistence and make his or her own arrangements for travel, accommodation etc.

Further Career Opportunities

The purpose of internships is not to lead to further employment with UNDP but, as mentioned, to complement an intern’s studies. However, a number of interns, having completed their studies and met the necessary requirements, have gone on to further assignments with the UNDP or elsewhere in the United Nations system.

Who to contact
Welcome to the Fellowships Office of Policy and Global Affairs

The Fellowships Office (FO) of the National Academies administers predoctoral, postdoctoral, and senior fellowship awards on behalf of government and private foundation sponsors. These fellowship awards play an important role in the career development of doctoral and postdoctoral researchers and scholars for the academic, federal, industrial, and international workforce. Current opportunities are as follows:

Research Associateship Programs (RAP)
The NRC Resident Research Associateship Programs were established in 1954. The goal of this program is to provide advanced training for highly qualified graduate postdoctoral and visiting scientists, while enhancing the research conducted in federal laboratories and affiliated institutions. A wide variety of research opportunities are available at top research laboratories across the U.S. and in select foreign locations. These awards are open to U.S. citizens, permanent residents, and with some limitations, foreign nationals in all fields of science and engineering.

Ford Foundation Fellowship Program
Through its Fellowship Program, the Ford Foundation seeks to increase the diversity of the nation’s college and university faculties. Administered by the National Research Council (NRC) since 1979, these programs provide fellowship support at the predoctoral, dissertation and postdoctoral levels. Eligibility is limited to U.S. citizens who can demonstrate superior academic achievement, are committed to a career in teaching and research at the college or university level, show promise of future achievement as scholars and teachers, and are well prepared to use diversity as a resource for enriching the education of all students.

Jefferson Science Fellowship
Recognizing that knowledge of state-of-the-art science, technology, and engineering (ST) is essential to the formulation and implementation of U.S. government policy, the Secretary of State began the Jefferson Science Fellows (JSF) program at the U.S. Department of State, in 2003. Tenured academic scientists and engineers from U.S. institutions of higher learning are eligible. Fellows spend one year at the U.S. Department of State in Washington, D.C. Following the fellowship year, the Jefferson Science Fellow returns to his/her academic career but remains available to the U.S. government as an experienced consultant for short-term projects.

Vietnam Education Foundation
The Vietnam Education Foundation (VEF) was established by the U.S. Congress through the Vietnam Education Foundation Act of 2000. The VEF provides fellowship support to Vietnamese nationals who wish to pursue graduate studies in STEM fields at U.S. institutions of higher learning. The VEF also supports postdoctoral opportunities for Vietnamese nationals for short...
Fellowships

The Population Council’s fellowship programs have helped advance the careers of social and biomedical scientists, public health researchers, and program managers throughout the world. The work of Council fellows has fostered research and informed the creation of population, health, and development policies and programs.

We thank the Fred H. Bixby Foundation for a generous grant that enables the Council to offer fellowships to young professionals, primarily from developing countries, to prepare them for leadership in the population, health, and development fields. (The application deadline for this year’s Fred H. Bixby Fellowship Program is 15 January 2012.)

Other fellowships include: in India, fellowships to develop leadership skills of individuals working in reproductive health and sexual rights, especially in areas related to young people and to maternal mortality and morbidity; in Pakistan, small-scale grants for research projects in reproductive health that have direct practical relevance to the needs of Pakistan; in Sudan, small grants for individual capacity-building; and in Vietnam, a postdoctoral fellowship program to facilitate research on reproductive health, health service systems, and poverty. A list of Council fellows is available as an addendum to the Population Council’s annual report.
Deadline:
Nov. 16, 2011

About Us
The Christine Mirzayan Science & Technology Policy Graduate Fellowship Program within the Policy and Global Affairs Division of the National Academies is designed to engage its Fellows in the analytical process that informs U.S. science and technology policy. Fellows develop basic skills essential to working or participating in science policy at the federal, state, or local levels.

Graduate and professional school students and those who have completed graduate studies (degree awarded) within the last five years may apply. Areas of study may include any social/behavioral science, medical/health discipline, physical or biological science, any field of engineering, law/business/public administration, or any relevant interdisciplinary fields.

Learn more about our program.

FALL 2011 FELLOWS’ BIOS:

Meet our Fall 2011 Fellows!

Bulletins
- There will be no summer session in 2012
- The stipend/grant will be $8,240 for the Fellowship session
- There will be two 12-week sessions in 2012: Winter/Spring and Fall

Board

Health Policy Educational Programs and Fellowships

Unique among Institute of Medicine (IOM) components, the Health Policy Educational Programs and Fellowships (HPEPF) office serves as the program office for national health policy fellowships—the Robert Wood Johnson Foundation (RWJF) Health Policy Fellows program, the IOM/American Nurses Foundation (ANF) American Academy of Nursing (AAN) Distinguished Nurse Scholar in Residence program, and the Norman F. Gant/American Board of Obstetrics and Gynecology (ABOG) Fellowship.

The RWJF Health Policy Fellows program provides an opportunity for outstanding mid-career health professionals to gain an understanding of the health policy process, to contribute to the formulation of new policies and programs, and to develop in their careers as leaders in academic health centers and in health policy.

The IOM/AAN AAN Distinguished Nurse Scholar in Residence program is designed to assist outstanding nurse leaders to play a more prominent role in health policy development at the national level. The program seeks individuals who have the capacity and skills to bring issues of special interest in nursing to greater public understanding and policy attention.

The Norman F. Gant/ABOG Fellowship is named in honor of Norman F. Gant, M.D., a member of the IOM and the executive director of ABOG. The fellowship is designed to provide an exceptional learning and career development opportunity to obstetricians and gynecologists early in their careers.

Welcome to ASPH Fellowships!

In an effort to train future public health workforce, we are proud to provide students and graduates of ASPH member schools with fellowship practice experiences globally, nationally, and locally.

This website contains information specifically on ASPH Fellowship Programs (for recent graduates, or soon-to-be graduates of ASPH member schools). If you are a current student, please visit the ASPH Internships webpage for information on ASPH internship opportunities.

To view the general ASPH Graduate Training Programs page, click here.

We Want to Hear Your Stories!

- Do you want to be featured in ASPH Featured Fellows & Alumni?
- Do you know an outstanding current or former ASPH Fellow who should be profiled here?

Email TrainingPrograms@asph.org and tell us your story or nominate them! Be sure to tell us why they would be a good candidate to feature on our website.

Current Fellowship Openings

We are currently not accepting applications. Please check back for upcoming announcements. To view all fellowship programs, click here.

(cklein@jhsph.edu)
White House Fellows

Founded in 1994, the White House Fellows program is one of America’s most prestigious programs for leadership and public service. White House Fellowships offer exceptional young men and women first-hand experience working at the highest levels of the federal government.

Selected individuals typically spend a year working as a full-time, paid Fellow to senior White House Staff, Cabinet Secretaries and other top-ranking government officials. Fellows also participate in an education program consisting of roundtable discussions with renowned leaders from the private and public sectors, and trips to study U.S. policy in action both domestically and internationally. Fellowships are awarded on a strictly non-partisan basis.
CDC Steven M. Teutsch Prevention Effectiveness Fellowship

Decision Sciences and Public Health

The Prevention Effectiveness Fellowship (PEF) is a 2-year, highly-selective research fellowship for recent doctoral graduates with a background in:

- Economics
- Policy analysis
- Operations research
- Decision sciences
- Other quantitative areas

The PEF allows applicants to apply their academic training in quantitative methods to the science of health protection, health promotion, and disease prevention. Fellows have the opportunity to work with leading researchers on issues of critical importance.

The PEF is an ideal opportunity for emerging researchers to join an energetic, innovative setting where they can collaborate to create the expertise, information, and tools that people and communities need to protect their health—through health promotion, prevention of disease, injury and disability, and preparedness for new health threats.

Apply online between October 3, 2011 and January 13, 2012.
Public Health Informatics Fellowship Program

Looking for a Technology Career in Public Health?

I am interested in applying computer and information science to help solve public health problems.

Is there a field in public health that lets me do this?

Yes, there is! Public health informatics applies information and computer science to public health.

Public Health Informatics Fellowship Program at CDC

The Public Health Informatics Fellowship Program (PHIFP) is a 2-year applied fellowship for professionals with a master's or higher degree. We train professionals to apply information science and technology to the practice of public health.

The Carter Center Internship Program

For more than 20 years, the Carter Center Internship Program has provided more than 2,000 interns with a rewarding complement to classroom experience, enhancing participants' educations and careers in the field of public service.

Carter Center interns come from around the world and make vital contributions to the Center’s work. In turn, the Center provides a substantive learning experience that serves as a basis for interns to explore their career options and to attain professional skills. The goal of the Internship Program is to develop an informed and skilled workforce committed to advancing peace and health worldwide.
Postgraduate Administrative Fellowships

Postgraduate fellowships make good sense for the offering organization, the fellow and the profession.

The purpose of this area is to provide students and early careerists with a list of available postgraduate administrative fellowships, and to provide a place where sponsoring organizations may promote their fellowships and increase visibility for these programs.

Additionally, ACHE includes resources to assist organizations in creating a fellowship.

Please select an action item from the buttons above.

Frequently Asked Questions
Kaiser Media Fellowships and Internships Program

Our Programs

With the ongoing changes in the news media and the launch of the Foundation’s new non-profit news service, Kaiser Health News, the Foundation is redesigning its journalism training and education programs. Any questions about the programs should be addressed to Penny Duckham, the Executive Director of the Fellowships Program.

- **The Kaiser Media Fellowships in Health** — Starting in 2011, the fellowship program provides in-depth briefings and week-long site visits focused on complex health policy issues. These are for invited health and health policy journalists, with invitations tailored to the topics and issues addressed. Visit this page for information on the most current site visits. Prior to 2011, in addition to site visits and briefings, the Media Fellows program provided a group of up to ten selected journalists with a fellowship of several months to undertake individual health policy reporting projects. Visit this page for information about the 2000-2009/2010 Media Fellows and their projects, and links to some of the reporting completed under the program.

- **The Kaiser Media Internships in Health Reporting** — For young U.S. journalists interested in specializing in health reporting, provides an intensive introduction and practical experience reporting on health issues based at newsrooms across the U.S. Click here to see a list of the 2011 Host News Organizations, and the journalists selected for the 16 internships.

- **Kaiser projects on Global Health Reporting** — Starting in 2010, the Kaiser Foundation has launched new projects focused on U.S. global health policy reporting and coverage by U.S. news organizations.
  - Taking the Temperature: The Future of Global Health Journalism, a review of U.S. global health coverage, including the constraints, shifts in coverage, and potential reporting opportunities for U.S. journalists and news organizations, was published in February 2011. The report is based on interviews with 50 senior U.S. editors, reporters and others engaged in global health coverage. A summary note of a follow-up discussion is also available.
  - Kaiser/GlobalPost Partnership and Global Health Reporting Fellowships: In 2011, the Foundation began a new partnership with GlobalPost to help support original reporting on global health policy issues. As part of the partnership, the Foundation is working with GlobalPost to support its coverage of global health, including reporting on U.S. global health policy issues, and is sponsoring the work of three Kaiser/GlobalPost Global Health Reporting Fellows. The Fellows are completing paid internships in the U.S. and abroad starting in Spring 2011. The three fellows were chosen by GlobalPost and the Foundation from students and/or recent graduates of the Columbia Journalism School: Selena Ross, Lomi Knel and Marja Karimpou.
  - The Kaiser Mini-Fellowships Program for Global Health Reporting has ended. Details of past awards and some of the reporting completed under the program are available online. Journalists may also be interested in a tool to navigate the Foundation’s U.S. global health policy work and resources.

- **Robin Toner Distinguished Fellowship in Journalism** — Based with the Foundation’s Kaiser Health News, allows the recipient to pursue in-depth reporting projects on health policy and politics. The Fellowship honors the late Robin Toner, a long-time New York Times reporter whose reporting often framed debate about health policy and politics. Through an internal selection process, veteran award-winning journalist Marilyn Werber Sersen, a former health care and welfare reporter at the National Journal, was chosen as the first recipient and started her fellowship in September 2013.
