Funding Resources

At the Johns Hopkins Bloomberg School of Public Health, each academic department administers and awards scholarship assistance; no application is required to be considered for funding. Scholarships are, most often, limited to full-time students. All students in the full-time Master of Public Health program are considered for funding and there is a limited amount of funding for part-time study. Most departments provide some level of assistance for doctoral study. Excluding the Master of Public Health program, students in most master's programs that exceed 4 terms may qualify to receive up to a 75% tuition reduction in the 2nd year of the program. You may review a listing of institutional scholarships on our [Funding Opportunities](#) web page. Questions regarding these opportunities should be directed to your department.

As institutional funding is limited, students are encouraged to pursue private scholarships to assist in meeting their education costs. This document provides a listing of possible external private scholarships for which you may apply. You will also find useful scholarship search engines here and on our [website](#). Please contact the organization directly for more details and application procedures.

General External Private Scholarships:

Agency for Healthcare Research and Quality (US Dept. of Health and Human Services):

<http://www.ahrq.gov/fund/grantix.htm>

The Agency for Healthcare Research and Quality at the Dept. of Health and Human Services supports research to improve the quality, effectiveness, accessibility and cost effectiveness of health care.
