SEVERAL DIFFERENT KINDS OF ANTIRETROVIRAL DRUGS ARE CURRENTLY USED TO TREAT HIV INFECTION.

- These medicines do not cure HIV infection or AIDS
- These medicines do not eliminate the risk of passing HIV to others
- HIV medicines must be taken in combination with other HIV medicines
- Not all medicines are right for all people, and treatments may be different for each person; talk with your doctor or other health care provider if you have questions about your treatment

NOTE: Many of these medications pictured may also be available in a generic form, but the generic forms are not pictured here. Tablets and capsules pictured may not be actual size.

The U.S. Department of Health and Human Services created the **HIV/AIDS Prevention & Service Provider Locator**—a first-of-its-kind, location-based search tool that allows you to search for testing services, housing providers, health centers, and other service providers near your current location. You can access this service at <http://www.aids.gov/locator>. You can also scan the QR code with your smart phone to access the locator.
