

Johns Hopkins Center for Excellence
in Environmental Public Health Tracking

**Methods to Address Challenges in
Displaying and Disseminating
Tracking Data Part II: Analytical Methods**

Johns Hopkins School of Public Health
Baltimore, Maryland
August 2-3, 2005

Training Overview:

- *This intermediate statistical methods training builds upon trainings provided in summer 2004 and spring 2005 focusing on spatial analysis and GIS, and case-crossover and time-series analyses for EPHT applications.*
- *This course is designed for epidemiologists, statisticians, and analysts with a strong working knowledge of statistical methods and EPHT experience.*
- *Each session will cover analytical methods and software tools, guidance on interpretation of results, options for display and explanation of uncertainty.*

DRAFT Course Agenda

Tuesday, Aug. 2nd
