

Daniel Arthur Caños, PhD, MPH

Director, Evidence Development Division
Centers for Medicare and Medicaid Services (CMS)

Daniel Arthur Caños, PhD, MPH is the Director of the Evidence Development Division in the Centers for Medicare and Medicaid Services (CMS), Coverage and Analysis Group (CAG) in the Center for Clinical Standards and Quality. The Evidence Development Division oversees the CMS Investigational Device Exemptions (IDE) policy, including IDE trial approvals; leads Coverage with Evidence Development policy development; directs the Clinical Trials Policy; houses the CMS side of FDA-CMS Parallel Review Program . Before joining CMS in 2016, Daniel was an Associate Director in the Office of Surveillance and Biometrics in the Division of Epidemiology at the FDA. He originally joined FDA in 2008. His work in the Division of Epidemiology included the development of a national system for medical devices through national and international registry infrastructure development, administrative claims research work, and evidence synthesis in the areas of cardiovascular, neurologic, ophthalmic, ear, nose, throat, anesthesiology, general hospital, respiratory, and dental devices. He received a BA in Psychology from the University of Cincinnati, MPH from the George Washington University, and PhD in Epidemiology from the University of North Carolina at Chapel Hill.
