What is a Community Food Assessment?
A Community Food Assessment (CFA) is a collaborative and participatory process that systematically examines a broad range of community food issues and assets, to take action to make the community more food secure. CFAs discover challenges in the local food system and food environment and also identify community assets to improve these weaknesses.

Assessment Objectives
• Understand residents’ current habits regarding how and where they currently access food.
• Identify reported barriers and readiness for change at the neighborhood level.
• Describe residents’ satisfaction with food available in their neighborhood.
• Gauge residents’ awareness of diet and disease.
• Determine interest and feasibility of a community garden/urban agriculture project.

Health Conditions
Reported in the household:
• Diabetes (50%)
• Obesity/overweight (6%)
• High blood pressure (12%)
• Heart Disease (13%)
• No health conditions (33%)

Perceived Relationship of Health Conditions to Diet

Fruit and Vegetable Consumption per Day

Gardening
• 51% are somewhat or very interested in learning to grow their own food.
• 6% already participate in a community garden.
• 37% were interested in growing their own food in a community garden specifically.

Lifestyles and Diet
• Only 21% report eating 5 or more servings of fruits and vegetables daily, while 67% eat 1-2 servings daily.
• 54% are sometimes unable to buy healthy food because of financial hardship.
• 74% were very or fairly interested in learning how to prepare meals from scratch.
• 53% believe that their or their family member’s health condition is strongly related to diet. Another 35% believe that their or their family member’s health condition is somewhat related to diet.

In 2009, 53 people were surveyed for this report.
**Results from a Community Food Assessment: Oliver**

**Reported Barriers**
to accessing healthy foods:
- Affordability (47%)
- Taste (28%)
- Preparation time (23%)
- Need more knowledge of how to prepare (30%)
- Family preference (11%)
- Other (6%)

**Current Habits**

**Cooking Habits:** 19% prepare meals from scratch daily, 25% several times a week, 15% weekly, 12% monthly, 17% a few times a year, and 12% never prepare meals from scratch.

**Transportation:** When asked how they get to the supermarket, 68% reported that they walk, 13% drive themselves, 23% get a ride from someone else, 19% take the bus, 11% use a hack, and 2% use other transportation.

**Neighborhood Food Satisfaction**

Most visited shopping locations:
- Corner store/Convenience store (12.5 vpm)
- Supermarket/Grocery store (8.9 vpm)
- Carry-out Shop (3.05 vpm)

* vpm = visits per month
