

## **CHILD REPORT**

### **Variable Name Definitions**

Where variable names are not included, please see documentation pertaining to that scale. The variable name will have a prefix describing the scale, item number, cohort and year after. For example, for peer drug use item 1 year 8 (grade 8):

Prefix: PDU

Item: 1

Cohort: 3

Year: 8

So, the variable name is PDU138.

Scale name take on the same definition minus the item number. So, if we use the above scale, the year 8 scale name would be PDU38. This is the computed peer drug use, cohort 3, year 8 (grade 8).
