Since 2002-3, PAXIS Institute has been the implementation partner at Johns Hopkins of the Good Behavior Game®/PAX Good Behavior Game®[1] for systematic replications of the Cohort 1 GBG studies[2-4], Cohort 2 studies [5-7] and new innovations. Dr. Embry and his colleagues have faithfully replicated and expanded the ease of training, implementation, and coaching of the original Hopkins GBG manual and training by Dr. Jaylan Turkkan who was then a professor at Hopkins [8]. PAXIS Institute has demonstrated that original landmark studies are replicable and feasible in the real world as well as in high quality research conditions.

Entities that wish to implement the Good Behavior Game® and achieve results consistent with the publications previous Hopkins studies should contact PAXIS Institute for training, materials, and technical assistance (www.goodbehaviorgame.org) or call PAXIS Institute at 520-299-6770.

Since 1998, PAXIS Institute has trained more 25,000 teachers in the United States (38 states), Canada, Europe and Australia. Since 2016, more than 15,000 teachers have received training using the 4th Edition Manual alone. There are peer-reviewed publications replicating Hopkins findings or processes consistent with Cohort 1 and 2 findings in the United States, Canada and Europe, using the commercially available version of the Good Behavior Game®/PAX Good Behavior Game® from PAXIS Institute [9-27].
