Conference Agenda and Learning Objectives

Introduction to Terrorism Preparedness and Response

Describe the major categories of current terrorism threats, including biological, chemical, radiological, nuclear and explosive.

Radiation Terrorism: Current Preparedness and Response Concepts

Compare and contrast radiation terror with other terrorism modalities.

Dirty Bomb Response: A HazMat Perspective

Describe the approaches that local fire departments have taken to address the threat of radiation terror.

Dirty Bombs Response: A Bomb Squad Perspective

Explain the physical threats associated with dirty bombs from the perspective of a bomb squad commander.

Incident Command Systems in Radiation Terror Response

Describe current and future challenges in radiation terror preparedness from an Incident Command Systems perspective.

Risk Communication and Radiation Terror

Describe the unique challenges attendant to effective risk communication to the general public about the threat of dirty bombs.

Mental Health Issues in Radiation Terror Preparedness and Response

Explain the unique characteristics of radiation terror as a mode of inflicting psychological injury on a population.

Radiation Terror: A Local Public Health Perspective

Describe how radiation terror preparedness and response fits into the emerging all-hazards model of local public health preparedness.

Radiation Terror Readiness and Response: A Hospital/Emergency Department Perspective

Define the current unique requirements for hospitals and other healthcare facilities in radiation terror preparedness and response.

Law Enforcement and Radiation Terror Preparedness and Response

Describe current concepts in radiation terror from a federal law enforcement readiness and response perspective.
