

Speaker Fact Sheet

Chesapeake PDC: April 15th 2021

TOPIC: Big Data: How organizations leverage leading indicators to manage risk and improve safety culture

SPEAKER: Mr. Nick Goodell

THREE LEARNING OBJECTIVES: (at least)

1. Learn what metrics organizations are using to analyze Leading Indicator data.
2. Learn how data can improve the safety culture at your company.
3. Prepare for executive conversations about predictive analytics in safety and risk management.

DESCRIPTION OF PRESENTATION: (min, 2-3 sentences)

Many organizations have corporate initiatives to leverage data to improve safety performance but don't know where to start. This presentation provides examples of how companies successfully implement programs and use leading indicators from inspections, audits, and observations to act in the absence of an incident. By examining the observation intelligence organizations can also gain insight into their safety cultures. Almost all safety programs require a certain amount of risk assessment, but does this impact how many people get hurt? In this session we will share the 4 Safety Truths that lead to fewer incidents.

SPEAKER TITLE AND EMPLOYER: (as you wish it to be displayed)

Director of Process Improvement

Intelex/Predictive Solutions – An Industrial Scientific Company

SPEAKER BIO: (paragraph)

Nick Goodell is the Director of Process Improvement with Intelex/Predictive Solutions. His team is responsible for implementing process and culture needed to support software and advanced analytic initiatives for clients. Nick has 20 years of experience in software and risk management. He was previously a Managing Partner at Echo-Bell where he worked with companies to implement useful applications for risk management, human resources, and compliance software products. In his early career Nick worked directly for insurance companies and earned an MBA from the University of Pittsburgh Katz Graduate School of Business
