**Fun Facts about our study babies!**

- **Girl, 49.7%**
- **Boy, 50.3%**

**Bar Chart:**
- Child age (years) as of 12/2013

**Pie Chart:**
- Prior pregnancy 42%
- First pregnancy 58%
Frequent flyers - How many siblings were in the study?

Length of labor (hours)

- > 15: 21.2%
- 10 to 15: 23.4%
- 5 to 10: 34.9%
- 1 to 5: 20.5%

And 1 woman four times!
Approximately how many minutes of ultrasound has Kathleen done for the study data collection?

a) 2701 min  
b) 3237 min  
c) 5798 min  
d) 7009 min

Why do we do 50-min fetal monitoring session for our prenatal study protocol?

a) Kathleen needs to get home to take the dog out.  
b) It generally takes that long to determine patterns of the fetal heart.  
c) 50 minutes represents the average fetal sleep-wake cycle.  
d) That is the length of data recording that fits on a 3.5 floppy disk, which is the only storage device available when we began in 1991!

Answers: C, D
