

**Using Social Marketing to Reach Women with
The Heart Truth**

heart DISEASE IS THE #1 KILLER OF WOMEN

The Facts about Heart Disease and Women

- Heart disease is the **#1 killer** of women in America.
- One in four** women dies of heart disease.
- About **one-third** of women still underestimate their own personal risk of heart disease – they fail to make a connection between risk factors, such as high blood pressure and high cholesterol, and their personal risk.
- Having just **one risk factor doubles** the risk of developing heart disease; risk skyrockets with each added risk factor.
- Fully **80%** of midlife women have one or more of the risk factors for heart disease.

The Heart Truth Campaign in Brief

- Launched:** September 2002 by NHLBI/NIH
- Objective:** Increase awareness of heart disease as women's #1 killer; motivate women to take action to reduce their risk
- Audience:** Women ages 40 – 60
- Overall approach:** Social marketing campaign incorporating a strong branding strategy
- Implementation strategy:** Partnership development, media, community action; focus on women of color
- Based on strong foundation of target audience research:** Leverage women's interest in their outward appearance to focus on what's inside (heart); strong wake up call about personal risk; hard-hitting approach - a deliberate departure from campaign executions that existed at the time

**Brand Power:
The Red Dress**

Creation of a women and heart disease brand – the **Red Dress** – as the national symbol for women and heart disease awareness

"Heart Disease Doesn't Care What You Wear – It's the #1 Killer of Women"

Strong appeal to wide diversity of women; materials use images of "real" women

Central driving force of the campaign - fashion industry partnership; unique platform for other partnerships, high profile events, media

heart DISEASE IS THE #1 KILLER OF WOMEN

Making a Impact

Awareness of #1 killer - In 2000, 34% of women aware that heart disease is their #1 killer; in 2009, increased to 68%.

Awareness of Red Dress Symbol - In 2009, 69% of women recognized the Red Dress as the symbol of women and heart disease awareness, up from 25% in 2005.

Heart Disease Deaths - decreased in American women each year from 1999 to 2006 (latest data); longest consecutive decline so far.

- In 2003, 1 in 3 women died of heart disease. In 2006, 1 in 4 deaths in women due to heart disease.
- Major impact of improved prevention and treatment, but combined education efforts of many groups - with *The Heart Truth* as a catalyst - have surely played a role.
