Candidates for the **Master of Public Policy**

May 7, 2018

Colson K. Campbell, of Yorktown Heights, New York; B.A., The Johns Hopkins University. Health Policy and Management.

Ari Adam Davis, of Boulder, Colorado; B.A., Claremont McKenna College. Health Policy and Management.

Eleanor Jeanne Evans, of Tacoma, Washington; B.A., Linfield College. Health Policy and Management.

Lasanthi Fernando, of Gaithersburg, Maryland; B.S., The Pennsylvania State University. Health Policy and Management.

Danielle Rene Gilmore, of Oklahoma City, Oklahoma; B.S., University of Central Oklahoma. Health Policy and Management.

Xue He, of Chengdu, People's Republic of China; B.S., University of Washington. Health Policy and Management.

Rachel Keller Landis, of Harrodsburg, Kentucky; B.A., University of Kentucky. Health Policy and Management.

Joy J. Lee, of Washington, District of Columbia; B.S., University of Illinois at Urbana-Champaign. Health Policy and Management.

Kaitlin Paige Spear, of Skaneateles, New York; B.A., Vanderbilt University. Health Policy and Management.

Kathryn Nancy Walsh, of New York, New York; B.A., Boston College. Health Policy and Management.

Lindsay Wang, of Beijing, People's Republic of China; B.S. & B.A., University of California, Los Angeles. Health Policy and Management.

Jingwen Ye, of Hohhot, People's Republic of China; B.A., Nanjing University. Health Policy and Management.

Wanying Zhang, of Xiangyang Hubei, People's Republic of China; B.M., Renmin University of China. Health Policy and Management.

Candidates for the Master of Science in Public Health

May 7, 2018

Cara Antonaccio, of Long Valley, New Jersey; B.A. & B.S., The Pennsylvania State University. Population, Family and Reproductive Health.

Oluwatamilore Olamide Areola, of Lagos, Nigeria; B.A., William Smith Colleges. International Health.

Keenan Dunn Bailey, of Elk Rapids, Michigan; B.A., Kalamazoo College. Environmental Health and Engineering.**

Julia Catherine Bennett, of Sammamish, Washington; B.S., University of California, Los Angeles. International Health.

Emily Jean Bergmann, of New Hartford, New York; B.S., Ursinus College. Environmental Health and Engineering.**

Anna Lauren Bickers, of Charlotte, North Carolina; B.A., University of Virginia. Health Policy and Management.

Arlene Scott Bigirimana, of Clifton, New Jersey; B.A., The Johns Hopkins University. Health Policy and Management.

Laurie A. Boettcher, of Chicago, Illinois; B.A., University of Chicago. International Health.

Emma Jae Brofsky, of Lynnbrook, New York; B.S., Cornell University. International Health.

Grant Edward Broussard, of Pittsburgh, Pennsylvania; B.A., University of Pittsburgh. International Health.

Carolyn Jean Brown, of Battle Creek, Michigan; B.A., Calvin College. International Health.

Simon John Brown, of Wainwright, Canada; B.S., Ryerson University. Environmental Health and Engineering.

Emily Ellen Bryce, of Ithaca, New York; B.S., Cornell University. International Health.

Meagan Elisabeth Byrne, of Mineola, New York; B.A., George Washington University. Population, Family and Reproductive Health.

Qiong Cao, of Shanghai, People's Republic of China; B.S., Fudan University. International Health.

Ryan Patrick Carney, of Rochester, New York; B.A., Cornell University. Environmental Health and Engineering.**

Ilene Marie Cervantes del Toro, of Albuquerque, New Mexico; M.A.T., The Johns Hopkins University; B.S. & B.A., University of New Mexico. International Health.

Ashley Marie Charest, of Mount Juliet, Tennessee; B.A., University of Tennessee. Health Policy and Management.

Anam H. Chaudhry, of Manhasset, New York; B.A., The Johns Hopkins University. Health Policy and Management.

Alamelupriya Chidambaram, of Arlington, Virginia; B.S., New York University. Health Policy and Management.

Belinda Chen Chiu, of New York, New York; B.A., Baruch College, City University of New York. International Health.

Rachel Karyn Coller, of Miami Beach, Florida; B.S.P.H., Tulane University. Health Policy and Management.

Ian Patrick Colrick, of San Francisco, California; B.A., The Johns Hopkins University. Health Policy and Management.

Virginia S. Cooper, of Freeport, Bahamas; B.S., Howard University. International Health.

Anita Dam, of Ivyland, Pennsylvania; B.A., The Johns Hopkins University. International Health.

Mindi Wen DePaola, of Manhattan, Kansas; B.S., University of Minnesota. International Health.

Crystal L. El-Khatib, of North Potomac, Maryland; B.S., The Pennsylvania State University. Health Policy and Management.

Christina Louise Espegren, of Sacramento, California; B.A., California Lutheran University. Population, Family and Reproductive Health.

Yarelix Estrada, of Miami, Florida; B.A., The Johns Hopkins University. Health Policy and Management.

Kira Mariana Rosner Finkel, of Bethesda, Maryland; B.A., The Johns Hopkins University. Health Policy and Management.

Micaela C. Garrison-Desany, of Marlborough, Massachusetts; M.S., The Johns Hopkins University; B.A., Harvard University. International Health.

Ashley Maria George, of Crofton, Maryland; B.S., Cornell University. International Health.

Emil Nadir Hafeez, of Bethesda, Maryland; B.S., New York University. International Health.

Danielle Lois Hansen, of Wellesley, Massachusetts; B.S., University of Vermont. International Health.

Candidates for the Master of Science

May 7, 2018

Benjamin William Barrett, of Fairport, New York; B.A., Bucknell University. Epidemiology. *Characterizing the Geospatial Features in Cervical Cancer Screening Uptake Among Amazonian Peruvian Women.*

Fiona Rashna Pamela Bhondoekhan, of Paramaribo, Suriname; B.S., University of California, Los Angeles. Epidemiology. *Improving the Efficiency of Reactive Screen-and-Treat for Malaria Elimination in Southern Zambia.*

Emily Susan Bonkowski, of Seattle, Washington; B.A., University of Chicago. Health, Behavior and Society. *Effects of Communication Complexity on Analogue Clients in a Video Cancer Genetic Counseling Session.*

Jennifer Erin Brophy, of Bloomington, Indiana; B.S., Emory University. Epidemiology. *HIV Risk in Partners of Migrants and Residents in Rakai, Uganda: An Observational Cohort Study.*

Yue Cao, of Hangzhou, People's Republic of China; B.S., Zhejiang University. Biostatistics. *Study of Cryptosporidium Infection and Gut Microbiome in Bangladeshi Infants.*

Chih-Kai Chang, of Kaohsiung, Taiwan; B.S., National Tsing Hua University. Biostatistics. *Quantifying the Difference in Activity between Diabetics and Healthy Controls Using Activity Data Measured by Accelerometers.*

Anna Kathryn Chassevent, of Battle Ground, Washington; B.A., Anderson University. Health, Behavior and Society. *Is it Feasible?: Self-affirmation for Hereditary Breast and Ovarian Cancer Genetic Counseling.*

Mengyin Chen, of Zhejiang, People's Republic of China; B.S., Beijing University of Chemical Technology. Biochemistry and Molecular Biology. *Screening for Genes Related to ZnuABC Transport System in Citrobacter rodentium.*

Shang-Jung Cheng, of Taipei, Taiwan; M.S. & B.S., National Taiwan University. Biochemistry and Molecular Biology. *How Does the WWE Domain of PARP13 Regulate the Assembly of Stress Granules?**

Megan Elizabeth Chesnut, of Lafayette, Louisiana; B.S., Louisiana State University. Environmental Health and Engineering. *Myelination as an Endpoint to Evaluate in vitro Developmental Neurotoxicity in an Organotypic Human Brain Model.*

Allysha Rokeya Choudhury, of Kalamazoo, Michigan; B.S., University of Michigan. Epidemiology. *The Impact of Implementation Fidelity on Safety of a Simplified Antibiotic Treatment for Infants with Clinical Severe Infection in Bangladesh.*

Matthew Kevin Cole, of Baltimore, Maryland; B.S., Sacred Heart University. Biostatistics. *Exploratory Factor Analysis: Model Selection and Identifying Underlying Symptoms.***

Celia Hawa Demby, of Bowie, Maryland; B.Sc., Syracuse University. Molecular Microbiology and Immunology. *Microbial and Restriction Factor-mediated Modulation of Aedes Aegypti Vector Competence for Dengue Virus.**

Gaurav Dhiman, of Logan, Utah; B.S., The George Washington University. Molecular Microbiology and Immunology. *Characterizing the Cytopathogenicity of Zika Virus in Human Schwann Cells.*

Alysha Lenor Ellison, of Muncie, Indiana; B.S., Ball State University. Molecular Microbiology and Immunology. *Exploring the Role of the Stringent Response in Mycobacterium Tuberculosis Dormancy.*

Kyrra Mary Engle, of Sunnyvale, California; B.A., University of Redlands. Biochemistry and Molecular Biology. *The Role of TLR7 on Mediating Sex Differences in Response to Influenza Infection and Vaccination.*

Payam Fathi, of Gaithersburg, Maryland; B.S., University of Maryland. Molecular Microbiology and Immunology. *Design and Characterization of ssDNA Aptamer Candidates to Bind Bacteriodes fragilis Toxin Subtypes BFT-1 and BFT-2.**

Noam S. Finkelstein, of Baltimore, Maryland; B.A., University of Oxford. Biostatistics. *The Wavelet RNN: Timeseries Forecasting using Multiresolution Structure.***

Rachel Hakim Gore, of Newton, Massachusetts; B.A., Clark University. Health, Behavior and Society. *Challenges to Informed Consent for Exome Sequencing: A Best Worst Scaling Experiment.*

Gege Gui, of Huangshi, People's Republic of China; B.S., Sun Yat-sen University. Biostatistics. *High-throughput Sequencing Data Analysis for the Amyotrophic Lateral Sclerosis Patient.*

Bixi He, of Beijing, People's Republic of China; B.S., Beijing Normal University. Biochemistry and Molecular Biology. *The Differential Expression of Cell Wall Proteins in the Human Fungal Pathogen Candida Albicans.*

*indicates students whose degrees were conferred on August 25, 2017

**indicates students whose degrees were conferred on December 29, 2017

- Diana Rocio Higuera Mendieta**, of Bogota, Colombia; M.D., Universidad de los Andes. Epidemiology. *The Path to Measles Elimination in the Americas: A Retrospective Analysis*. *
- Joshua Hsu**, of Westchester, New York; B.A., Drew University. Biochemistry and Molecular Biology. *Nuclear Keratin 17 and its Role in the DNA Damage Response*. *
- Tingju Hsu**, of Lutherville Timonium, Maryland; M.S., University of Michigan. Epidemiology. *Smokeless and Combustible Tobacco Use and Mortality Analysis from the 1987 to 2005 National Health Interview Survey*.
- Yeong Je Jeong**, of Seoul, Republic of Korea; B.S., North Carolina State University. Biochemistry and Molecular Biology. *Identifying the Substrate Specificities of SENP1 and SENP2 in Recognition of Sumoylated Thymine-DNA Glycosylase*.
- Shahzad Khaiat**, of Vancouver, Canada; B.Sc., University of British Columbia. Biochemistry and Molecular Biology. *Candidate Proteins that Regulate the Progression of Mammalian Oocyte Through Meiosis*.
- Yoo Jin Kim**, of Baltimore, Maryland; B.S., The Johns Hopkins University. Biochemistry and Molecular Biology. *The Molecular Role of Mob1 in Lats1 Kinase Activation in Hippo Signaling*.
- Ga Young Lee**, of San Diego, California; B.S., University of California, San Diego. Molecular Microbiology and Immunology. *Pharmacodynamics of Pyronaridine in Combination with Current Antimalarials in a Cytocidal Murine Malaria Model*.
- Ira Lewis Leeds**, of Baltimore, Maryland; M.D., Emory University; M.B.A., University of Oxford; A.B., Princeton University. Clinical Investigation. *Increased Healthcare Utilization for Medical Comorbidities Prior to Colorectal Surgery is Associated with Improved Postoperative Outcomes*.
- Jing Li**, of Chengdu, People's Republic of China; B.S., University of California, Los Angeles. Biostatistics. *Comparative Analysis for Oral Cleft Trio Data*.
- Xuechen Li**, of Baoding, The People's Republic of China; Peking University. Epidemiology. *Prevalence and Risk Factors of E-cigarettes and NRT Use Among HIV-infected and Uninfected Men Who Have Sex with Men*.
- Su Jin Lim**, of Seoul, Republic of Korea; B.A., Grinnell College. Biostatistics. *Evaluating the Finite Sample Properties of Baseline Covariate Adjustment in Randomized Trials: Application to Time to Event Outcomes*.
- Metabel Tori Naa Merle Markwei**, of Accra, Ghana; B.A., Yale University. Biochemistry and Molecular Biology. *Investigating the Role of the Neuropeptide Diuretic Hormone 31 (DH31) in Drosophila oogenesis*. *
- Scott Michael Meredith**, of Hampstead, Maryland; B.S., Bucknell University. Molecular Microbiology and Immunology. *Pharmacodynamic Analysis of P. Falciparum Kill Rates in Monotherapy Clinical Trials and Investigation of Quorum Sensing-dependence of Early Kill Rates in Murine Models*.

The Spirit of Student Assembly Award

This inaugural award is chosen by the Student Assembly President to recognize the top performing student assembly officers who have exemplified superior service to the school, East Baltimore community, and who have also made meaningful contributions to bettering public health.

Angela Ng

Convocation Speaker

Leana S. Wen, M.D., M.Sc., FAAEM

Dr. Leana Wen is the Commissioner of Health for the City of Baltimore. An emergency physician and patient and community advocate, she leads the Baltimore City Health Department (BCHD), the oldest, continuously-operating health department in the United States, formed in 1793. BCHD is an agency with a \$130 million annual budget and 1,000 employees committed to improving well-being and combatting disparities through education, policy/advocacy, and direct service delivery. BCHD's wide-ranging responsibilities include maternal and child health, youth wellness, school health, senior services, animal control, restaurant inspections, emergency preparedness, STI/HIV treatment, and acute and chronic disease prevention.

Facing an unprecedented number of people dying from opioid overdose, Dr. Wen issued a blanket prescription for the opioid antidote, naloxone, to all 620,000 residents of Baltimore. Since 2015, this program has saved over 1,800 lives. Dr. Wen has testified in front of the U.S. Senate and House on Baltimore's efforts to combat the opioid epidemic, and has spoken on panels with President Obama and President Clinton about treating addiction as a public health crisis.

Under her direction, the Baltimore City Health Department leads the country in health innovations, including: B'More for Healthy Babies, a collective impact strategy resulting in a 38 percent reduction of infant mortality in just seven years; Vision for Baltimore, an initiative to provide glasses to every child who needs them; Safe Streets, a program to engage returning citizens and hospitals in treating gun violence as a contagious disease; and Healthy Baltimore 2020, a blueprint for health and well-being that enlists all sectors to achieve the ambitious goal of cutting disparities in half in ten years.

Before her appointment in January 2015, Dr. Wen was an attending physician and Director of Patient-Centered Care in the Department of Emergency Medicine at George Washington University. A professor of Emergency Medicine at the School of Medicine and of Health Policy at the School of Public Health, she co-directed its Residency Fellowship in Health Policy and co-led a new national collaboration on health policy and social mission with Kaiser Permanente. The author of the critically-acclaimed book *When Doctors Don't Listen: How to Avoid Misdiagnoses and Unnecessary Tests*, Dr. Wen has given six popular TED and TEDMED talks on patient-centered care, public health leadership, and healthcare reform. Her TED talk on transparency in medicine has been viewed over 1.8 million times.

Dr. Wen received her medical training from Washington University School of Medicine in St. Louis and Brigham & Women's Hospital/Massachusetts General Hospital in Boston, where she was a Clinical Fellow at Harvard Medical School. A Rhodes Scholar, she studied public policy and economic history at the University of Oxford. She has served as a consultant with the World Health Organization, Brookings Institution, and China Medical Board; an advisor to the Patient-Centered Outcomes Research Institute and the Lown Institute; and as national president of the American Medical Student Association and American Academy of Emergency Medicine-Resident & Student Association. In 2005, she was appointed by the U.S. Secretary of Health & Human Services to serve on the Council on Graduate Medical Education, an advisory commission to Congress. In 2010, she served as Chair of the Young Professionals Council, a global leadership network of medical, nursing, and public health professionals.

In addition to her extensive scholarship in public health and patient safety, Dr. Wen has conducted international health systems research in Rwanda, D.R. Congo, Nigeria, South Africa, China, Singapore, Slovenia, and Denmark. She has been published over 100 articles including in *The Lancet*, *JAMA* and *Health Affairs*. She is regularly featured on National Public Radio, CNN, *The New York Times*, *The Washington Post*, and *USA Today*.

Dr. Wen has received recognition as *The Daily Record's* 100 Most Influential Marylanders, Maryland's Leading Women, and Top 100 Women; *Baltimore Business Journal's* "40 under 40," and *The Baltimore Sun's* 25 Women to Watch. A Fellow of the American Academy of Emergency Medicine and Academy of Medicine, she has been a Visiting Professor for Alpha Omega Alpha Honor Society and is an associate faculty member at George Washington University and Johns Hopkins University. In 2016, Dr. Wen was named by *Modern Healthcare* to be one of the country's 50 Most Influential Physician Executives and Leaders. She was also honored to be the recipient of the American Public Health Association's highest award for local public health work, the Milton and Ruth Roemer Award. In 2017, she was named one of *Governing's* Public Officials of the Year.

Society of Scholars

The Society of Scholars was created on the recommendation of then president Milton S. Eisenhower and approved by the university board of trustees on May 1, 1967. The society—the first of its kind in the nation—inducts former postdoctoral fellows and junior or visiting faculty at Johns Hopkins who had formative experiences at Johns Hopkins and thereafter gained marked distinction in their respective fields.

Each year, the Society of Scholars Selection Committee elects a limited number of scholars from among the candidates nominated by Johns Hopkins University faculty. Since its inception, 658 individuals have been elected to membership in the society, including 16 members elected in 2017. At an investment ceremony held in the spring of each year, newly elected scholars are formally inducted into the society. Faculty members invest inductees with the Johns Hopkins Society of Scholars medallion and present them with an official certificate of membership.

Ronald S. Brookmeyer, PhD Los Angeles, California

Ronald Brookmeyer, a professor of biostatistics in the UCLA Fielding School of Public Health, uses the tools of the statistical, informational and mathematical sciences to address global public health problems. Over three decades, he has developed statistical methods that have sounded the alarm and helped address major global health challenges of our times. With work beginning in the mid-1980s, for example, Dr. Brookmeyer earned worldwide recognition for his prediction of the magnitude of the impending HIV/AIDS epidemic. He also called attention to the looming Alzheimer's epidemic through widely cited studies, and he serves on the board of reviewing editors of *Science* magazine. Dr. Brookmeyer is a member of the National Academy of Medicine, a fellow of the American Association for the Advancement of Science, and a recipient of the American Public Health Association's Spiegelman Gold Medal in health statistics and of the American Statistical Association's Nathan Mantel Lifetime Achievement Award. After completing his PhD in statistics at the University of Wisconsin, he joined the faculty of the Johns Hopkins Bloomberg School of Public Health in 1981. During his 28-year career at Johns Hopkins, he served as the chair of the Bloomberg School's Master of Public Health Program. In recognition of his service, Dr. Brookmeyer was the 2009 recipient of the Johns Hopkins Bloomberg School of Public Health's Ernest Lyman Stebbins Medal for outstanding contributions to the school's educational programs.

Lynn R. Goldman, MD Washington, D.C.

Pediatrician and epidemiologist Lynn R. Goldman is the Michael and Lori Milken Dean of the Milken Institute School of Public Health at George Washington University. She is a renowned expert in pediatric environmental health and public policy surrounding chemicals. As such, she has contributed academic scholarship that has helped shape this field of study. Dr. Goldman also has engaged in translating research to policy through writing analyses and giving congressional testimony supporting efforts, ultimately successful, to achieve passage of reforms to both federal pesticide law and federal chemicals law. From 1999 to 2010, she was a professor of environmental health sciences at the Johns Hopkins Bloomberg School of Public Health. Before joining the Johns Hopkins faculty, Dr. Goldman was assistant administrator for toxic substances at the U.S. Environmental Protection Agency, where she directed the Office of Chemical Safety and Prevention from 1993 to 1998. She also held various positions at the California Department of Public Health, including chief of the Division of Environmental and Occupational Disease Control. She earned her bachelor's and master's degrees from UC Berkeley, her medical degree from UC San Francisco, and a master's degree in public health from Johns Hopkins University; she conducted her pediatric residency training at the UCSF Benioff Children's Hospital in Oakland.

A longtime member of the National Academy of Medicine, she received the Walsh McDermott Award for service to the academy. She is a recipient of the prestigious Heinz Award for her work to protect people from toxic chemicals, and the American Public Health Association Environment Section's Homer N. Calver Award. Dr. Goldman serves on several influential boards, including the National Academy of Sciences Governing Board, the Environmental Defense Fund Board of Trustees and the Food and Drug Administration Science Board.

Tomás R. Guilarte, PhD

Miami, Florida

Tomás R. Guilarte is dean of the Robert Stempel College of Public Health and Social Work at Florida International University, where he is also a professor. His research explores the impact of environmental pollutants on neurological and mental health. Using behavioral, cellular and molecular approaches, his studies range from the primary culture of brain cells to the application of brain-imaging technologies. He is renowned for revealing the effects of low-level lead exposure on the central nervous system during brain development, a discovery that led to strategies for mitigating neurological damage.

Dr. Guilarte's research team has also played an important role in the validation and application of translocator protein 18 kDa (TSPO) as a biomarker for brain injury and inflammation that is used clinically around the world. He has made seminal discoveries on the molecular and cellular mechanisms of manganese-induced parkinsonism, a disorder that causes neurological symptoms closely resembling Parkinson's disease. He has served in many national and international study sections, including as a member of the advisory council for the National Institute of Environmental Health Sciences. Among the many honors Dr. Guilarte has received is the Hispanic Organization of Toxicologists' Distinguished Toxicologist Award. He was a student in the inaugural class, in 1976, of the Department of Environmental Health Sciences (now Environmental Health and Engineering) at the Johns Hopkins University Bloomberg School of Public Health. He received his PhD from that department in 1980 and spent three decades there as a professor and researcher. He went on to serve as the inaugural Leon Hess Endowed Professor and chairman of the Department of Environmental Health Sciences at Columbia University Mailman School of Public Health.

Craig J. Newschaffer, PhD

Philadelphia, Pennsylvania

Craig J. Newschaffer is a professor in the Department of Epidemiology and Biostatistics and associate dean for research at the Dornsife School of Public Health at Drexel University. He is also the founding director of the A.J. Drexel Autism Institute, the first autism research center taking a comprehensive public health science approach to the challenges posed by autism spectrum disorders and related neurodevelopmental conditions. Dr. Newschaffer, a fellow of the American College of Epidemiology, is also past chair of the Department of Epidemiology and Biostatistics at the Dornsife School of Public Health and past vice president of the International Society for Autism Research. He has served on the Department of Defense Autism Research Program Integration Panel, the Autism Speaks Science Advisory Board and, on multiple occasions, the Interagency Autism Coordinating Council Strategic Plan for Autism Spectrum Disorder Research expert review group. Dr. Newschaffer applies epidemiology to study autism spectrum disorder etiology, with a focus on potentially modifiable risk factors and complex mechanisms. His work in this area has been important in sustaining momentum for the responsible study of environmental autism risk factors as well as in furthering our understanding of the morbidity and impairment associated with autism spectrum disorders from a population perspective. Dr. Newschaffer received his PhD in epidemiology from Johns Hopkins University in 1996 and was a member of the faculty of the Johns Hopkins Bloomberg School of Public Health from 1999 to 2006.

The School Mace

The Johns Hopkins Bloomberg School of Public Health Mace carried by a Chief Marshal of the Society of Alumni, was first used in the 1986 Convocation Exercises. The head of the mace displays the names of individuals who have served as Dean of the School and their dates of service. The symbols on the seal illustrate the School's dedication to education, research and service in the diverse fields of public health through the promotion of health preservation, control of disease and delivery of health and medical services.

The Regalia and Symbol

The history of the academic attire can be traced to the medieval period when scholars were also clerics and wore the costume of their monastic order. The hood was originally a cowl attached to the gown, which could be slipped over the head for warmth in the unheated buildings in which they worked. From this necessity evolved the tradition of academic regalia which today is used to identify members of the academic institution by level of degree, academic field, and awarding institutions.

The distinguishing mark of the gown is the sleeve: master—an oblong sleeve open at the wrist; doctor—bell-shaped sleeve with three velvet bars. Academic subjects are identified by the color of the hood trimming. The lining of the hood signifies the colors of the granting institution. The Johns Hopkins University displays a hood lining of gold. The color of the tassel denotes the degree. It may be black or gold thread or the same color as the hood trim. The colors associated with the different academic subjects are:

FIELD	ROBE TRIM	HOOD TRIM
Administration	Black or Golden Yellow	Peacock
Anatomy	Black or Golden Yellow	Golden Yellow
Bacteriology	Black or Golden Yellow	Golden Yellow
Biochemistry	Black or Golden Yellow	Golden Yellow
Biology	Black or Golden Yellow	Golden Yellow

International Declaration of Health Rights

To be recited by the Class of 2018

*Composed by faculty and students on the occasion of
The Johns Hopkins School of Public Health's 75th Anniversary*

We as people concerned about health improvements in the world, do hereby commit ourselves to advocacy and action to promote the health rights of all human beings.

The enjoyment of the highest attainable standard of health is one of the fundamental rights of every human being. It is not a privilege for those with power, money or social standing.

Health is more than the absence of disease, but includes the prevention of illness, development of individual potential, a positive sense of physical, mental and social well-being.

Health care should be based on dialogue and collaboration between citizens, professionals, communities and policy makers. Health services should be affordable, accessible, effective, efficient and convenient.

Health begins with healthy development of the child and a positive family environment. Health must be sustained by the active role of men and women in health and development. The role of women, and their welfare, must be recognized and addressed.

Health care for the elderly should preserve dignity, respect and concern for quality of life and not merely extend life.

Health requires a sustainable environment with balanced human population growth and preservation of cultural diversity.

Health depends on the availability to people of basic essentials; food, safe water, housing, education, productive employment, protection from pollution and prevention of social alienation.

Health depends on protection from exploitation without distinction of race, religion, political belief, economic or social condition.

**Health Requires Peaceful and Equitable
Development and Collaboration of All Peoples**

Environmental Impact

By printing on this combination of papers, the Bloomberg School was able to save:

Trees: 7

Total Energy: 3 million BTUs

Greenhouse Gases: 560lbs CO₂

Wastewater: 3,039 gallons

Solid Waste: 230 lbs

The interior of the JHSPH 2018 Convocation Program was printed on FSC-certified Rolland Opaque 50% pcw. The cover was printed on FSC and SFI-certified Accent Opaque.

This paper was supplied by a SmartWay Transport Partner. Since 2004, SmartWay Partners have saved 50 million barrels of oil and 16.5 million metric tons of CO₂ and other emissions that contribute to climate change through a collaboration between the U.S. Environmental Protection Agency and the freight sector.

Environmental impact estimates were made using the Environmental Paper Network Paper Calculator Version 3.2. For more information visit www.papercalculator.org.
